P.S. Free & New JN0-336 dumps are available on Google Drive shared by ITExamSimulator: https://drive.google.com/open?id=1KS4bebFAquvdfIDw764Rc1nYMO98Mw_s

The cost of registering a JN0-336 Certification is quite expensive, ranging between \$100 and \$1000. After paying such an amount, the candidate is sure to be on a tight budget. ITExamSimulator provides Juniper JN0-336 preparation material at very low prices compared to other platforms. We also assure you that the amount will not be wasted and you will not have to pay for the certification a second time. For added reassurance, we also provide up to 1 year of free updates. Free demo version of the actual product is also available so that you can verify its validity before purchasing.

How to pass the JN0-336 exam and gain a certificate successfully is of great importance to people who participate in the exam. Here our company can be your learning partner and try our best to help you to get success in the JN0-336 exam. Why should you choose our company with JN0-336 Preparation braindumps? We have the leading brand in this career and successfully help tens of thousands of our customers pass their JN0-336 exam and get admired certification.

Juniper JN0-336 Free Exam Dumps: Security, Specialist (JNCIS-SEC) - ITExamSimulator Reliable Platform

ITExamSimulator offers verified, authentic Juniper JN0-336 Real Questions and answers, which are essential for passing the Security, Specialist (JNCIS-SEC) (JN0-336). These questions and answers have been designed by Sitecore experts and can be easily downloaded on a PC, MacBook, or smartphone for comfortable and convenient learning.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which three statements about SRX Series device chassis clusters are true? (Choose three.)

- A. Heartbeat messages verify that the chassis cluster control link is working.
- B. Chassis cluster control links must be configured using RFC 1918 IP addresses.

- C. Recovery from a control link failure requires that the secondary member device be rebooted.
- **D. Chassis cluster member devices synchronize configuration using the control link.**
- **E. A control link failure causes the secondary cluster node to be disabled.**

Answer: A,D,E

Explanation:

B: Chassis cluster member devices synchronize configuration using the control link: This statement is correct because the control link is used for configuration synchronization among other functions.

C: A control link failure causes the secondary cluster node to be disabled: This statement is correct because a control link failure causes the secondary node to become ineligible for primary role and remain in secondary role until the control link is restored.

E: Heartbeat messages verify that the chassis cluster control link is working: This statement is correct because heartbeat messages are sent periodically over the control link to monitor its status.

NEW QUESTION # 12

Your company is using the Juniper ATP Cloud free model. The current inspection profile is set at 10 MB. You are asked to configure ATP Cloud so that executable files up to 30 MB can be scanned while at the same time minimizing the change in scan time for other file types.

Which configuration should you use in this scenario?

- A. Use the ATP Cloud UI to change the default profile to increase the scan limit for all files to 30 MB.
- B. Use the CLI to create a custom profile and increase the scan limit.
- **C. Use the ATP Cloud UI to update a custom profile and increase the scan limit for executable files to 30 MB.**
- D. Use the CLI to change the default profile to increase the scan limit for all files to 30 MB.

Answer: C

Explanation:

In this scenario, you should use the ATP Cloud UI to create a custom profile and update the scan limit for executable files to 30 MB. This will ensure that executable files up to 30 MB can be scanned, while at the same time minimizing the change in scan time for other file types. To do this, log in to the ATP Cloud UI and go to the Profiles tab. Click the Create button to create a new profile, and then adjust the scan limits for executable files to 30 MB. Once you have saved the custom profile, you can apply it to the desired systems and the new scan limit will be in effect.

NEW QUESTION # 13

After JSA receives external events and flows, which two steps occur? (Choose two.)

- A. After the information is filtered, JSA responds with active measures
- **B. After formatting the data, the data is stored in an asset database.**
- C. Before formatting the data, the data is analyzed for relevant information.
- **D. Before the information is filtered, the information is formatted**

Answer: B,D

Explanation:

When JSA (Juniper Secure Analytics) receives external events and flows, the typical processing steps are:

Option C. Before the information is filtered, the information is formatted.

Data formatting is an initial step in the process where raw data from events and flows is converted into a standard format that can be more easily processed and analyzed by JSA.

Option A. After formatting the data, the data is stored in an asset database.

Once the data is formatted, it is stored in an asset database. This database acts as a repository for all the formatted data, enabling JSA to perform further analysis, correlation, and eventually, to maintain a comprehensive view of the network assets and activities. These steps are part of JSA's comprehensive approach to security event management, which involves collecting, normalizing, and analyzing data to identify potential security threats and vulnerabilities efficiently.

NEW QUESTION # 14

What are two requirements for enabling AppQoE? (Choose two.)

- A. You need two SRX Series device endpoints.
- **B. You need two SRX Series or MX Series device endpoints.**
- **C. You need an APPID feature license.**
- D. You need to configure AppQoE for reverse traffic.

Answer: B,C

Explanation:

AppQoE is a feature that enables you to monitor and optimize the quality of experience for applications on your network. It uses application-aware routing and dynamic path selection to choose the best path for each application based on predefined or custom SLA profiles. AppQoE also provides visibility and reporting on application performance and network conditions.

Two requirements for enabling AppQoE are:

You need two SRX Series or MX Series device endpoints: AppQoE can be configured between two SRX Series device endpoints or between an SRX Series device and an MX Series device in a hub-and-spoke or full mesh topology. The devices must run the same version of Junos OS and have the same AppQoE configuration.

You need an APPID feature license: AppQoE requires an APPID feature license to be installed on the SRX Series device. The APPID feature license enables application identification and classification, which are essential for AppQoE to work.

NEW QUESTION # 15

Exhibit

Referring to the SRX Series flow module diagram shown in the exhibit, where is application security processed?

- A. Forwarding Lookup
- B. Screens
- **C. Services ALGs**
- D. Security Policy

Answer: C

NEW QUESTION # 16

.....

For every candidates, practicing for the pass of the exam is an inevitable process, since we can improve our ability. Our JN0-336 Exam Torrent will provide you the practice. The pass rate is 98.88%, and if you fail to pass the test, money back guarantee. Besides, we also have online chat service staff, if you have any questions, you can have a chat with them, or you can send emails to us, we will give you the reply as quickly as we can.

Exam Discount JN0-336 Voucher: <https://www.itexamsimulator.com/JN0-336-brain-dumps.html>

For most office workers who have no enough time to practice JN0-336 Security, Specialist (JNCIS-SEC) exam dump, it is necessary and important to choosing right study materials for preparing their exam, JN0-336 Security, Specialist (JNCIS-SEC) exam guidance will help you to achieve your goals with high-efficiency and high score, We will give you the most professional answers on the JN0-336 practice engine in the first time, But ITExamSimulator Exam Discount JN0-336 Voucher provide you the most actual information.

Your book is called Do it Wrong Quickly, and there are some JN0-336 questions that come up about how you go about doing that, Growth in Revenues Does Not Equal Growth in Stock Price.

For most office workers who have no enough time to practice JN0-336 Security, Specialist (JNCIS-SEC) exam dump, it is necessary and important to choosing right study materials for preparing their exam.

Get Juniper JN0-336 Practice Test To Gain Brilliant Result [2026]

JN0-336 Security, Specialist (JNCIS-SEC) exam guidance will help you to achieve your goals with high-efficiency and high score, We will give you the most professional answers on the JN0-336 practice engine in the first time.

But ITExamSimulator provide you the most actual information, We are glad to introduce the JN0-336 certification dumps from our
