PDII-JPN free study torrent & PDII-JPN latest training dumps & PDII-JPN test practice vce

We can guarantee that you are able not only to enjoy the pleasure of study but also obtain your Salesforce PDII-JPN certification successfully, which can be seen as killing two birds with one stone. And you will be surprised to find our superiorities of our Salesforce PDII-JPN Exam questions than the other vendors.

Salesforce Sample Questions (Q87-Q92):

NEW QUESTION # 87

ユニバーサル コンテナ (UC) に関する次の情報を考慮します。

* UC は顧客を Salesforce のアカウントとして表します。

* すべての顧客は、UC のシステム全体で一意の Customer__Number__c を持っています。

* UC には、外部システムから送信される請求書を表す、アカウントへのルックアップを備えたカスタムの Invoice__c オブジェクトもあります。

UC は、請求書データを Salesforce に統合して、営業担当者が顧客がいつ期日通りに請求書を支払うかを確認できるようにしたいと考えています。

これを実装する最適な方法は何ですか？

- A. 顧客番号が外部 ID であり、カスタム フィールドの請求書番号が外部 ID であることを確認し、請求書データを毎晩更新/挿入します。
- B. 各顧客の Salesforce アカウント ID を使用してカスタム請求システムに相互参照テーブルを作成し、毎晩請求書データを挿入します。
- C. Salesforce Connect と外部データ オブジェクトを使用して、カスタム コードを使用せずに請求書データを Salesforce にシームレスにインポートします。
- D. 呼び出しごとに Account オブジェクトをクエリして請求書データを挿入し、請求書の顧客番号に対応する Salesforce ID を取得します。

Answer: B

NEW QUESTION # 88

会社にはカスタム オブジェクト Order__c があり、そのカスタム選択リスト フィールド Status__c の値は

「New」、「In Progress」、または「Fulfilled」、および参照フィールド Contact__c は Contact です。

「履行済み」注文がないすべての取引先責任者レコードの一意のリストを返す SOQL クエリはどれですか？

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: D

Explanation:

Option A is the correct SOQL query that will return a unique list of all the Contact records that have no 'Fulfilled' Orders. Option A uses a subquery to filter the Contact records based on the related Order__c records. The subquery uses the NOT IN operator to exclude the Order__c records that have the Status__c value of 'Fulfilled'. The subquery also uses the SELECT Id clause to return only the Ids of the Order__c records, which is more efficient than returning all the fields. The main query uses the DISTINCT keyword to return only the unique Contact records, and the ORDER BY clause to sort the records by the Name field. The query also uses the SELECT Id, Name clause to return only the Id and Name fields of the Contact records, which is more efficient than returning all the fields. The query also uses the LIMIT 100 clause to limit the number of records returned to 100, which is a good practice to avoid hitting the governor limits. Reference: [SOQL Subqueries], [SOQL SELECT Clause], [SOQL Functions]

NEW QUESTION # 89

□ テスト用のコントローラ拡張機能を作成するには、上記の単体テストのセットアップの指定された場所に何を追加する必要がありますか？

- A. AccountControllerExt 拡張機能 = 新しい AccountControllerExt (acct);
- B. AccountControllerExt 拡張子 = 新しい AccountControllerExt (acct.Id);
- C. ApexPages.StandardController sc = 新しい ApexPages. 標準コントローラ (acct.Id); AccountControllerExt 拡張子 = 新しい AccountControllerExt(sc); ああ
- D. ApexPages.StandardController sc = new ApexPages.StandardController(acct); AccountControllerExt 拡張子 = 新しい AccountControllerExt(sc);

Answer: D

Explanation:

For the unit test to create the controller extension, the correct setup is to instantiate a new ApexPages.StandardController with the Account record and then use it to instantiate the AccountControllerExt. This sets up the controller extension with the context of the

NEW QUESTION # 90

企業は、エンタープライズ リソース プランニング (ERP) の `order__c` レコードで、取引先へのルックアップ フィールドを使用して顧客の注文を受け付けます。Account オブジェクトには、外部 ID 項目

`ERP_Customer_ID__c` があります。

正しいアカウントに自動的に関連付けられる新しい `Order__c` レコードを作成するには、統合で何を使用する必要がありますか？

- A. `Order__c` オブジェクトをマージし、`ERP_Customer_ID__c` を指定します。
- B. `Order__c` オブジェクトに挿入し、続いて `Order__c` オブジェクトを更新します。
- C. `Order__c` オブジェクトをアップサートし、`ERP_Customer_ID__c` を指定します。
- D. アカウントをアップサートし、`ERP_Customer_ID__c` を指定します。

Answer: B

NEW QUESTION # 91

開発者は、Lightning Web コンポーネントのスタイルと動作を制御する変数を保存する必要があります。

本番環境とすべてのサンドボックスの両方で変数を確実にテストできるようにするには、どの機能を使用できますか？

- A. カスタム変数
- B. カスタム設定
- C. カスタムオブジェクト
- D. カスタムメタデータ

Answer: D

Explanation:

The feature that can be used to store variables to control the style and behavior of a Lightning Web Component and ensure that the variables are testable in both Production and all Sandboxes is custom metadata. Custom metadata is data that describes other data and can be used to define the structure for application metadata. Custom metadata can be accessed in Apex, SOQL, validation rules, formulas, and flows. Custom metadata can also be deployed, packaged, and upgraded like other metadata. Custom setting is a type of custom object that can store data that applies to a specific organization, profile, or user. Custom setting data is cached and can be accessed in Apex, SOQL, validation rules, formulas, and flows. However, custom setting data is not included in change sets or packages and must be manually migrated to other environments. Custom object is a type of object that can store data that is specific to an organization or application. Custom object data can be accessed in Apex, SOQL, validation rules, formulas, and flows. Custom object data can also be deployed, packaged, and upgraded like other metadata. However, custom object data is not cached and may have performance implications when used to control the style and behavior of a Lightning Web Component. Custom variable is not a valid feature in Salesforce. Reference: [Custom Metadata Types], [Custom Settings], [Custom Objects]

NEW QUESTION # 92

.....

Are you worried for passing your PDII-JPN Exam? You must not be confused about selecting some authentic website as we are offering an authentic TestInsides PDII-JPN exam questions in pdf and testing engine for your assistance. It is the ultimate solution for your worries. Our designed PDII-JPN Braindumps are not only authentic but approved by the expert faculty. It offers professional skills, perfection utility and efficiency for beating PDII-JPN.

Exam PDII-JPN Duration: <https://www.testinsides.top/PDII-JPN-dumps-review.html>

Material Guarantee, You can download the TestInsides Exam PDII-JPN Duration products on a maximum number of Two PCs, There are a group of professional experts who did exhaustive study about contents of PDII-JPN practice materials, Salesforce PDII-JPN Updated Test Cram 100% is our guarantee, Salesforce PDII-JPN Updated Test Cram The online test engine can support any electronic equipment and it can also support offline use, Please believe that PDII-JPN learning materials will be your strongest backing from the time you buy our PDII-JPN practice braindumps to the day you pass the exam.
