Fortinet FCP_FMG_AD-7.4 Exam | FCP_FMG_AD-7.4 Exam Course - FCP_FMG_AD-7.4: FCP - FortiManager 7.4 Administrator

The immediate downloading feature of our FCP_FMG_AD-7.4 study materials is an eminent advantage of our products. Once the pay is done, our customers will receive an e-mail from our company. There is a linkage given by our e-mail, and people can begin their study right away after they have registered in. Our FCP_FMG_AD-7.4 study materials are available for downloading without any other disturbing requirements as long as you have paid successfully, which is increasingly important to an examinee as he or she has limited time for personal study. Therefore, our FCP_FMG_AD-7.4 Study Materials are attributive to high-efficient learning.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which two statements about the integrity of databases on FortiManager are correct? (Choose two.)

- A. The diagnose cdb check adom-integrity command can correct issues related to looked devices.
- B. Not following the correct upgrade path may cause inconsistencies in the databases.
- C. Scheduled backups run database integrity commands automatically.
- D. You should fix all database integrity issues before performing a backup.
- E. The diagnose dvm check-integrity command attempts to fix a corrupted file system.

Answer: B,C

NEW QUESTION # 55

Which configuration setting for FortiGate is part o an ADOM-level database on FortiManager?

- A. Routing
- B. SNMP
- C. Security profiles
- D. NSX-T Service Template

Answer: C

Explanation:
Security profiles are part of the ADOM-level database in FortiManager. These configurations allow for centralized management of security settings like antivirus, web filtering, application control, and intrusion prevention. Security profiles are created and managed under the Policy & Objects section, which operates at the ADOM level.

NEW QUESTION # 56

What does a policy package status of Never Installed indicate?

- A. The policy configuration has been changed on FortiManager and changes have not yet been installed on the managed device.
- B. FortiManager is unable to determine the policy package status.
- C. The policy configuration has been changed on a managed device and changes have not yet been imported into FortiManager.
- D. The policy package was never imported after a device was registered on FortiManager.

Answer: D

NEW QUESTION # 57

Refer to the exhibit.

FortiManager script

Create New Script

Script Name	Routing
Comments	
Type	CLI Script
Run script on	Device Database
Script details	Search...

```
 1 config router prefix-list
 2 edit public
 3 config rule
 4 edit 1
 5 set prefix 0.0.0.0/0
 6 set action permit
 7 next
 8 edit 2
 9 set prefix 8.8.8.8/32
10 set action deny
11 end
```

Revert All Changes

Advanced Device Filters >

Which two results occur if the script is run using the Device Database option? (Choose two.)

- **A. The device Config Status is tagged as Modified.**
- B. The script history shows successful installation of the script on the remote FortiGate device.
- C. The successful execution of a script on the Device Database creates a new revision history.
- **D. You must install these changes on a managed device using the Install Wizard.**

Answer: A,D

Explanation:
If the script is run using the "Device Database" option on FortiManager, the following occurs:
* A.You must install these changes on a managed device using the Install Wizard.
* Running the script on the Device Database updates only the configuration in the FortiManager's database, not on the actual FortiGate device. To apply the changes, you need to use the Install Wizard to push these configurations to the managed device.
* D.The device Config Status is tagged as Modified.
* After running the script on the Device Database, FortiManager tags the device's configuration status as "Modified," indicating that there are pending changes that have not yet been installed on the device.
Options B and C are incorrect because:
* Bsuggests a new revision history is created, but this only happens when changes are actually installed on the managed device.
* Cimplies the script is directly executed on the FortiGate, which is not the case when using the Device Database option.
FortiManager References:
* Refer to FortiManager 7.4 Administrator Guide: Scripting and Configuration Management.

NEW QUESTION # 58
What is a characteristic of the FortiManager high availability (HA) feature?

- A. All secondary units must be in the same network as the primary unit.
- B. When a secondary unit is removed, FortiManager updates the managed devices using TCP port 5199.
- C. Each cluster member must be upgraded manually, starting with the primary unit.
- **D. The primary unit synchronizes all configuration revision with the seconday units.**

Answer: D

NEW QUESTION # 59

......

In the learning process, many people are blind and inefficient for without valid FCP_FMG_AD-7.4 exam torrent and they often overlook some important knowledge points which may occupy a large proportion in the Fortinet FCP_FMG_AD-7.4 exam, and such a situation eventually lead them to fail the exam. While we can provide absolutely high quality guarantee for our FCP - FortiManager 7.4 Administrator FCP_FMG_AD-7.4 practice materials, for all of our learning materials are finalized after being approved by industry experts.
