DEP-2025 Reliable Dumps Questions, Valid DEP-2025 Exam Online

Some candidates may wonder that if the payment is quite complex and hard, in fact it is quite easy and simple. Once you have selected the DEP-2025 study materials, please add them to your cart. Then when you finish browsing our web pages, you can directly come to the shopping cart page and submit your orders of the DEP-2025 learning quiz. Our payment system will soon start to work. Then certain money will soon be deducted from your credit card to pay for the DEP-2025 preparation questions. And we will send them to you in 5 to 10 minutes after your purchase.

Apple Deployment and Management Exam Sample Questions (Q233-Q238):

NEW QUESTION # 233

You're remotely erasing a supervised iPad. What can you preserve to speed up redeployment?

- A. Installed apps
- B. User data and settings
- **C. Existing eSIM**
- D. Device passcode

Answer: C

Explanation:

Preserving eSIM speeds redeployment. The Mobile Device Management Protocol Reference states, "When erasing a supervised iPad, the preserveDataPlan option retains the existing eSIM, avoiding reactivation delays." References: Mobile Device Management Protocol Reference, "EraseDevice Command" section. iOS Deployment Reference, "eSIM Preservation" section.

NEW QUESTION # 234

You want to reset a user's forgotten password on a FileVault-encrypted Mac. What should you have escrowed in MDM to enable this?

- A. Bootstrap Token
- B. Institutional recovery key
- **C. Personal recovery key**
- D. Secure Token

Answer: C

Explanation:

On FileVault-enabled Macs, disk encryption ties directly to the user password. If the password is lost, recovery relies on keys. Apple supports two key models: the personal recovery key (PRK) and the institutional recovery key (IRK). The PRK is unique per device and can be escrowed securely to an MDM solution. In the event of a forgotten password, the IT administrator can retrieve the PRK from MDM and provide it to the user for unlocking the Mac. Apple strongly recommends escrow of PRKs in enterprise deployments to ensure encrypted Macs remain recoverable without requiring device erasure. References: Apple Platform Security - "FileVault"; Apple Platform Deployment - "Manage FileVault with MDM."

NEW QUESTION # 235

Users report slow Wi-Fi after moving from their offices to the conference room. You notice that their devices aren't joining the closer access point. Why don't the devices associate with the closer access point?

- **A. The signal strength hasn't met the device's trigger threshold.**
- B. The trigger thresholds aren't properly configured in the Wi-Fi profile.
- C. Fast roaming isn't turned on for the wireless access controller.
- D. The broadcast signal of the first access point has a higher maximum data rate.

Answer: A

Explanation:

Devices wait for a threshold drop. The Apple Platform Deployment Guide states, "Apple devices use a roaming trigger threshold; they won't switch to a closer access point until the current signal falls below this level." Reference: Apple Platform Deployment Guide, "Wi-Fi Roaming" section. macOS Deployment Reference, "Network Behavior" section.

NEW QUESTION # 236

Your organization is buying books through Apple Business Manager. Which of these is an assignment criteria for books?

- A. Mac computers
- B. Shared iPad devices
- **C. Users with a Managed Apple Account**
- D. iPhone and iPad devices

Answer: C

Explanation:

Apple Business Manager allows organizations to purchase and distribute books (such as textbooks or reference material) using the Apps and Books section. Apple Learning states that books can only be assigned to users, not to devices. Specifically, the users must have a Managed Apple Account in order to receive the content.

Unlike apps, which can be assigned either to users or devices, books are linked to the individual account. This ensures that digital rights management (DRM) is preserved while also protecting user access. Books cannot be assigned directly to iPhones, iPads, or Macs as standalone hardware, nor can they be tied to Shared iPad device pools. Therefore, the correct assignment criteria for books in Apple Business Manager is Managed Apple Account users.

References: Apple Business Manager User Guide - "Distribute books to users with Managed Apple Accounts."

NEW QUESTION # 237

Which enrollment type is required to supervise an iPhone?

- **A. Automated Device Enrollment**
- B. Profile-driven Enrollment
- C. Account-driven Device Enrollment
- D. Account-driven User Enrollment

Answer: A

Explanation:

Supervision provides enhanced management capabilities on iPhones and iPads, such as enabling Managed Lost Mode or enforcing restrictions. Apple Learning materials are clear that the only enrollment method that automatically enables supervision for iOS and iPadOS devices is Automated Device Enrollment (ADE) through Apple Business Manager or Apple School Manager. Account-driven and User Enrollment methods focus on user-based or BYOD scenarios and do not grant supervision. Profile-driven enrollment, once used in older iOS versions, no longer provides supervision in modern deployments. ADE ensures devices are flagged as organization-owned during initial setup, activating the supervised state automatically. This distinction is crucial because many advanced management and security features require supervision and cannot be applied to devices enrolled through BYOD workflows.
