

# 1z0-1093-25 Pass Guaranteed | Certification 1z0-1093-25 Test Answers

P.S. Free & New 1z0-1093-25 dumps are available on Google Drive shared by ValidVCE: [https://drive.google.com/open?id=1aaXyMImE6-XwHAyMjxzbP91eOK4KipC\\_](https://drive.google.com/open?id=1aaXyMImE6-XwHAyMjxzbP91eOK4KipC_)

As we all know, office workers have very little time to prepare for examinations. It would be too painful to waste precious rest time on the subject. But if they have 1z0-1093-25 practice materials, things will become different. Our 1z0-1093-25 study materials not only include key core knowledge, but also allow you to use scattered time to learn, so that you can learn more easily and achieve a multiplier effect. And after you study with our 1z0-1093-25 Exam Questions for 20 to 30 hours, you will be able to pass the 1z0-1093-25 exam for sure.

Different person has different goals, but our ValidVCE aims to help you successfully pass 1z0-1093-25 exam. Maybe to pass 1z0-1093-25 exam is the first step for you to have a better career in IT industry, but for our ValidVCE, it is the entire meaning for us to develop 1z0-1093-25 exam software. So we try our best to extend our dumps, and our ValidVCE elite comprehensively analyze the dumps so that you are easy to use it. Besides, we provide one-year free update service to guarantee that the 1z0-1093-25 Exam Materials you are using are the latest.

>> 1z0-1093-25 Pass Guaranteed <<

## Certification 1z0-1093-25 Test Answers | 1z0-1093-25 Download Demo

Actual Oracle Cloud Database Services 2025 Professional (1z0-1093-25) dumps are designed to help applicants crack the Central Finance in 1z0-1093-25 test in a short time. There are dozens of websites that offer 1z0-1093-25 exam questions. But all of them are not trustworthy. Some of these platforms may provide you with Oracle Cloud Database Services 2025 Professional (1z0-1093-25) invalid dumps. Upon using outdated Central Finance in 1z0-1093-25 dumps you fail in the 1z0-1093-25 test and lose your resources. Therefore, it is indispensable to choose a trusted website for real Central Finance in 1z0-1093-25 dumps.

### Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.</li> </ul>

## Oracle Cloud Database Services 2025 Professional Sample Questions (Q67-Q72):

### NEW QUESTION # 67

Which data formats are directly supported by the HeatWave Lakehouse feature for querying data in object storage?

- A. CSV, Parquet, and Avro files.
- B. Only XML files.
- C. Only Parquet files.
- D. Only JSON files.
- E. Only CSV (Comma Separated Values) files.

**Answer: A**

Explanation:

C: CSV, Parquet, and Avro files:

\* HeatWave Lakehouse can directly query data stored in OCI Object Storage without loading it into MySQL.

\* Supports widely-used data formats:

\* CSV (Comma Separated Values): Simple, text-based data format.

\* Parquet: Columnar storage format optimized for analytical queries.

\* Avro: Row-oriented format used for data serialization.

\* This versatility allows integrating data from various sources and querying directly.

Why the other options are incorrect:

\* A. Only CSV files: HeatWave supports more than just CSV.

\* B. Only Parquet files: HeatWave also supports CSV and Avro.

\* D. Only JSON files: JSON is not directly supported by HeatWave Lakehouse.

\* E. Only XML files: XML is not directly supported.

### NEW QUESTION # 68

Which two are valid mechanisms for accessing OS-level metrics on a Base Database Service Virtual Machine?

- A. All OS metrics are automatically pushed to the Cloud Exadata Service Dashboard, and are not available outside of this service.

- B. Access OS metrics programmatically via the OCI Monitoring APIs, which allow retrieval of metrics collected by the Oracle Cloud Agent.
- C. Utilize the vmcli utility, which allows access to OS-level metrics specific to the DB System.
- D. Access OS metrics using the OCI Metrics Explorer within the OCI Console leveraging the Oracle Cloud Agent.
- E. The only way to access OS-level metrics is through a custom monitoring agent installed directly on the VM.

**Answer: B,D**

Explanation:

B: Access OS metrics using the OCI Metrics Explorer within the OCI Console leveraging the Oracle Cloud Agent.

\* OCI Metrics Explorer is part of the OCI Monitoring service.

\* The Oracle Cloud Agent collects OS-level metrics and makes them available through the OCI Console.

\* Users can view metrics like CPU usage, memory utilization, and disk I/O.

E: Access OS metrics programmatically via the OCI Monitoring APIs:

\* The Oracle Cloud Agent collects OS metrics and exposes them via OCI Monitoring APIs.

\* This approach allows for automated data retrieval and integration with external monitoring tools.

Why the other options are incorrect:

\* A. vmcli utility: This is not a standard tool for accessing OS-level metrics on Base Database Service VMs.

\* C. Custom monitoring agent: While possible, it is not the primary or only method. Oracle Cloud Agent is the default tool.

\* D. Automatically pushed to the Cloud Exadata Service Dashboard: This statement is incorrect as OS metrics are available through OCI Monitoring.

#### NEW QUESTION # 69

What is the primary purpose of installing and configuring the Oracle Management Agent when enabling Database Management Service for a cloud database on a Compute instance?

- A. To manage the underlying operating system of the Compute instance.
- B. To automate database patching and upgrades.
- C. To provide a secure communication channel between the Database Management Service and the database.
- D. To handle database backups and recovery operations.

**Answer: C**

Explanation:

A: Secure Communication Channel:

\* The Oracle Management Agent acts as a bridge between the Database Management Service and the database.

\* Enables secure data collection, monitoring, and performance analysis.

\* Uses encryption to protect data during transmission.

\* Facilitates monitoring, alerting, and management through OCI services.

Why the other options are incorrect:

\* B. Backup and recovery operations: These are typically handled by backup tools, not the management agent.

\* C. OS management: The agent does not manage the operating system itself.

\* D. Patching and upgrades: While it can assist, it is not specifically designed for patch management.

#### NEW QUESTION # 70

Which two of the following statements are true regarding security considerations for managing Exadata Cloud Infrastructure and VM Clusters?

- A. Customers are responsible for configuring host-based firewalls on the Exadata Infrastructure to protect against unauthorized access.
- B. Customers are responsible for configuring and maintaining the security of the operating system and database software within the VM Clusters.
- C. Customers have full access to the Exadata Infrastructure's hypervisor and can implement custom security policies.
- D. Oracle manages all security aspects of the Exadata Infrastructure, relieving customers of any security responsibilities.
- E. Network Security Groups (NSGs) can be used to control network traffic to and from VM Clusters, enhancing security.

**Answer: B,E**

Explanation:

B: Network Security Groups (NSGs) for traffic control:

- \* NSGs allow customers to define ingress and egress rules to control network traffic.
- \* Enhances security by restricting access to only authorized IP ranges and protocols.
- \* Applied at the VM Cluster level to manage connectivity efficiently.

E: Responsibility for OS and database security:

\* While Oracle manages the infrastructure layer, customers are responsible for securing the operating system and database within the VM Clusters.

\* This includes applying security patches, configuring firewalls, and implementing user access controls.

Why the other options are incorrect:

- \* A. Host-based firewalls on Exadata Infrastructure: Oracle, not the customer, configures the infrastructure-level security.
- \* C. Oracle managing all security: Incorrect, as customers manage VM-level security.
- \* D. Access to hypervisor: Customers do not have hypervisor-level access for security configuration.

### NEW QUESTION # 71

Which aspect of NoSQL Database Cloud Service is LEAST impacted by the choice of SDK used in an application?

- A. Syntax for querying data.
- B. Method for authenticating with the service.
- **C. Underlying database architecture and scalability characteristics.**
- D. Error handling mechanisms.

**Answer: C**

Explanation:

C: Underlying database architecture and scalability characteristics:

\* The architecture and scalability of Oracle NoSQL Database Cloud Service are inherent to the platform and do not change based on the SDK.

\* SDKs are designed to provide language-specific interfaces for data interaction but do not alter the core architecture.

\* Whether using Java, Python, or another SDK, the database's sharding, replication, and consistency characteristics remain constant.

Why the other options are impacted:

- \* A. Query syntax: SDKs may offer different syntax or query formats.
- \* B. Authentication method: Varies between SDKs, e.g., API keys vs. IAM tokens.
- \* D. Error handling: Each SDK may implement error handling differently, influencing how exceptions are processed.

### NEW QUESTION # 72
