NewPassLeader also offers a demo of the Amazon AWS-Solutions-Architect-Associate exam product which is absolutely free. Up to 1 year of free AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Architect-Associate) questions updates are also available if in any case the sections of the Amazon AWS-Solutions-Architect-Associate Actual Test changes after your purchase. Lastly, we also offer a full refund guarantee according to terms and conditions if you do not get success in the AWS Certified Solutions Architect - Associate (SAA-C03) exam after using our AWS-Solutions-Architect-Associate product.

The AWS-Solutions-Architect-Associate Certification Exam consists of multiple-choice questions and scenario-based questions that test candidates' knowledge of AWS services and architectures. AWS-Solutions-Architect-Associate exam covers a wide range of topics, including AWS services such as EC2, S3, RDS, DynamoDB, and CloudFormation, as well as AWS architectural principles, security, and best practices for scaling and deploying applications on AWS.

Amazon AWS-Solutions-Architect-Associate Free Sample & AWS-Solutions-Architect-Associate New Braindumps Files

For candidates who are going to buy the AWS-Solutions-Architect-Associate questions and answers online, they pay more attention to the prospect of personal information. We respect the privacy of our customers. If you buy the AWS-Solutions-Architect-Associate exam dumps from us, your personal information such as your email address or name will be protected well. Once the order finishes, the information about you will be concealed. In addition, AWS-Solutions-Architect-Associate Questions and answers are revised by professional specialists, therefore they are high-quality, and you can pass the exam by using them.

The AWS-Solutions-Associate exam consists of multiple-choice questions that cover various topics related to AWS services, including EC2, S3, RDS, VPC, and others. AWS-Solutions-Architect-Associate exam duration is 130 minutes, and the passing score is 720 out of 1000. AWS-Solutions-Architect-Associate Exam is available in multiple languages, including English, Japanese, Korean, and Simplified Chinese.

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q335-Q340):

NEW QUESTION # 335

Please select the most correct answer regarding the persistence of the Amazon Instance Store

- A. The data on an instance store volume persists even after associated Amazon EC2 instance is deleted
- B. The data on an instance store volume is lost when the security group rule of the associated instance is changed.
- C. The data on an instance store volume persists only during the life of the associated Amazon EC2 instance

Answer: C

NEW QUESTION # 336

A company has a website running on Amazon EC2 instances across two Availability Zones. The company is expecting spikes in traffic on specific holidays, and wants to provide a consistent user experience. How can a solutions architect meet this requirement?

- A. Use lifecycle hooks.
- B. Use step scaling.
- C. Use simple scaling.
- D. Use scheduled scaling.

Answer: D

NEW QUESTION # 337

Your company is getting ready to do a major public announcement of a social media site on AWS. The website is running on EC2 instances deployed across multiple Availability Zones with a Multi-AZ RDS MySQL Extra Large DB Instance. The site performs a high number of small reads and writes per second and relies on an eventual consistency model. After comprehensive tests you discover that there is read contention on RDS MySQL. Which are the best approaches to meet these requirements? (Choose 2 answers)

- A. Implement sharding to distribute load to multiple RDS MySQL instances
- B. Deploy ElasticCache in-memory cache running in each availability zone
- C. Increase the RDS MySQL Instance size and Implement provisioned IOPS
- D. Add an RDS MySQL read replica in each availability zone

Answer: B,C

NEW QUESTION # 338

A company will deployed a web application on AWS. The company hosts the backend database on Amazon RDS for MySQL with

a primary DB instance and five read replicas to support scaling needs. The read replicas must log no more than 1 second behind the primary DB Instance. The database routinely runs scheduled stored procedures.

As traffic on the website increases, the replicas experience additional lag during periods of peak load. A solutions architect must reduce the replication lag as much as possible. The solutions architect must minimize changes to the application code and must minimize ongoing overhead.

Which solution will meet these requirements?

Migrate the database to Amazon Aurora MySQL. Replace the read replicas with Aurora Replicas, and configure Aurora Auto Scaling. Replace the stored procedures with Aurora MySQL native functions.

Deploy an Amazon ElastiCache for Redis cluster in front of the database. Modify the application to check the cache before the application queries the database. Replace the stored procedures with AWS Lambda functions.

- A. Deploy an Amazon ElastiCache for Redis cluster in front of the database. Modify the application to check the cache before the application queries the database. Replace the stored procedures with AWS Lambda functions.
- B. Migrate the database to a MySQL database that runs on Amazon EC2 instances. Choose large, compute optimized EC2 instances for all replica nodes. Maintain the stored procedures on the EC2 instances.
- C. Migrate the database to Amazon DynamoDB. Provision number of read capacity units (RCUs) to support the required throughput, and configure on-demand capacity scaling. Replace the stored procedures with DynamoDB streams.
- **D. Migrate the database to a MySQL database that runs on Amazon EC2 instances. Choose large, compute optimized for all replica nodes. Maintain the stored procedures on the EC2 instances.**

Answer: D

NEW QUESTION # 339

In the Amazon RDS Oracle DB engine, the Database Diagnostic Pack and the Database Tuning Pack are only available with

- A. Oracle Express Edition
- B. Oracle Standard Edition
- C. None of these
- **D. Oracle Enterprise Edition**

Answer: D

NEW QUESTION # 340
