# 100% Pass Quiz 2026 2V0-13.25: Accurate VMware Cloud Foundation 9.0 Architect Latest Exam Test

DOWNLOAD the newest TestPassed 2V0-13.25 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1o6to-3_wxSn8zwpckvOuQ55Mp7NOsEgP

Our 2V0-13.25 test questions provide free trial services for all customers so that you can better understand our products. You can experience the effects of outside products in advance by downloading clue versions of our 2V0-13.25 exam torrent. In addition, it has simple procedure to buy our learning materials. After your payment is successful, you will receive an e-mail from our company within 10 minutes. After you click on the link and log in, you can start learning using our 2V0-13.25 test material. You can download our 2V0-13.25 test questions at any time.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
Topic 2	• IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 3	• VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.

Topic 4	• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.
Topic 5	• Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.

Sample 2V0-13.25 Questions Pdf - 2V0-13.25 Reliable Test Cram

We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our 2V0-13.25 actual exam is. In order to let you have a general idea about the shining points of our 2V0-13.25 training materials, i would like to introduce the free demos of our 2V0-13.25 study engine for you. There are the real and sample questions in the free demos to show you that how valid and latest our 2V0-13.25 learning dumps are. So just try now!

VMware Cloud Foundation 9.0 Architect Sample Questions (Q98-Q103):

NEW QUESTION # 98
Which VMware tools help ensure security and compliance in VMware Cloud Foundation?

- A. VMware vSAN
- B. VMware vRealize Suite
- C. VMware vSphere
- D. VMware NSX

Answer: B,D

Explanation:
VMware NSX and vRealize Suite provide essential security and compliance features within VMware Cloud Foundation environments.

NEW QUESTION # 99
The following requirements were identified in an architecture workshop for a virtual infrastructure design project.
REQ001: All virtual machines must meet the Recovery Time Objective (RTO) of twenty-four hours or less in a disaster recovery (DR) scenario.
Which two test cases will verify these requirements?

- A. Simulate or trigger an outage of the primary datacenter. All virtual machines must be restored within twenty-four hours or less.
- B. Simulate or trigger an outage of the primary datacenter. All virtual machines must not lose more than four hours of data prior to the outage.
- C. Simulate or trigger an outage of the primary datacenter. All virtual machines must not lose more than twenty-four hours of data prior to the outage.
- D. Simulate or trigger an outage of the primary datacenter. All virtual machines must be restored within four hours or less.

Answer: A,C

Explanation:
RTO measures time to restore VMs after a DR event (24 hours here).
Option B directly tests this: restoration within 24 hours meets the requirement.
Option C tests data loss (RPO-like), but in DR context, ensuring no more than 24 hours of data loss complements RTO by verifying the recovery process's effectiveness, a common validation in VCF with tools like Site Recovery Manager (SRM).
Option A (4 hours) is stricter than required, and D (4-hour data loss) tests RPO, not RTO. B and C align with VCF DR testing best

practices.

NEW QUESTION # 100
Which Broadcom solutions optimize network performance in VMware Cloud Foundation?

- A. Broadcom RAID controllers
- B. Broadcom Ethernet adapters
- C. Broadcom Fibre Channel HBAs
- D. Broadcom NVMe SSDs

Answer: B

Explanation:
Broadcom Ethernet adapters optimize network performance in VMware Cloud Foundation.

NEW QUESTION # 101
An architect is designing a VMware Cloud Foundation (VCF) solution for a customer. During the discovery phase, the customer outlined the following availability requirements:
* Business-critical workloads:RPO = 2 hours
* Infrastructure components:RTO = 8 hours
Based on this context, what does the RTO metric represent?

- A. The minimum volume of data loss tolerated in the event of a disruption
- B. The maximum allowable time within which a system or service must be restored to a usable state
- C. The minimum acceptable duration required to recover a service to an operational state
- D. The maximum amount of data loss that is considered acceptable during a failure

Answer: B

Explanation:
* RTO (Recovery Time Objective)measures themaximum downtime toleratedbefore a service must be restored.
* RPO (Recovery Point Objective)measures themaximum tolerable data loss.
In this scenario:
* Business-critical workloads tolerate2 hours of data loss(RPO).
* Infrastructure must be operational again within8 hours(RTO).
Thus, RTO =maximum allowable recovery time for service restoration.

NEW QUESTION # 102
What are key considerations for network design when integrating VMware Cloud Foundation with Broadcom hardware?

- A. vCenter Server
- B. 25GbE Ethernet Adapter
- C. vSphere DRS
- D. vSAN

Answer: B

Explanation:
The 25GbE Ethernet Adapter is the key element for network design in VMware Cloud Foundation environments.

NEW QUESTION # 103
......

We provide free PDF demo for each exam. This free demo is a small part of the official complete VMware 2V0-13.25 training dumps. The free demo can show you the quality of our exam materials. You can download any time before purchasing. You can tell if our products and service have advantage over others. I believe our VMware 2V0-13.25 training dumps will be the highest value with competitive price comparing other providers.
