

1Z0-182 Übungsmaterialien & 1Z0-182 realer Test & 1Z0-182 Testvorbereitung

2026 Die neuesten ZertFragen 1Z0-182 PDF-Versionen Prüfungsfragen und 1Z0-182 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=1-HPixuqWvcB6cEBJ_Mu23NG80FkOyMH

Wir ZertFragen sind die professionellen Anbieter der Schulungsunterlagen zur Oracle 1Z0-182 Zertifizierungsprüfung. Seit langem betrachten wir ZertFragen das Angebot der besten Prüfungsunterlagen zur Oracle 1Z0-182 Zertifizierungsprüfung als unser Ziel. Verglichen zu anderen Webseiten, wir ZertFragen sind immer von anderen vertraut. Warum? Weil wir ZertFragen vieljährige Erfahrungen haben, aufmerksam auf die IT-Zertifizierung-Studie machen und viele Prüfungsregeln sammeln. Damit können wir ZertFragen sehr hohe Hit-Rate haben. Das gewährleistet die Durchlauftrate.

Oracle 1Z0-182 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).
Thema 2	• Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.
Thema 3	• Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.
Thema 4	• Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.

Thema 5	Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.
Thema 6	Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting.
Thema 7	Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.
Thema 8	Employ Oracle-Supplied Database Tools: This section evaluates the abilities of Database Engineers and Support Specialists in identifying and using Oracle-supplied tools for managing databases. It focuses on leveraging tools to monitor, troubleshoot, and optimize database performance effectively.

1Z0-182 Bestehen Sie Oracle Database 23ai Administration Associate! - mit höhere Effizienz und weniger Mühen

Wir versprechen, dass alle Kandidaten, die Shunglunsunterlagen von ZertFragen benutzt haben, Ihre Oracle 1Z0-182 Prüfung 100% bestehen können, ohne Ausnahme. Wenn Sie heute ZertFragen wählen, fangen Sie dann mit Ihrem Training an. Sie können die nächste Oracle 1Z0-182 Zertifizierungsprüfung sicher bestehen und die besten Ressourcen mit der Marktkohärenz und zuverlässiger Garantie bekommen

Oracle Database 23ai Administration Associate 1Z0-182 Prüfungsfragen mit Lösungen (Q60-Q65):

60. Frage

Which three statements are true about row chaining and row migration done by Oracle database block space management?

- A. Update statements can result in one or more migrated rows.
- B. Insert statements can result in a migrated row.
- C. Row pieces of a chained row must always reside in different blocks.
- D. A migrated row results in an update to any index on the table to point the row ID in the index to the row's new location.
- E. Update statements can result in one or more chained rows.

Antwort: A,D,E

Begründung:

- A .True. Migration updates index ROWIDs.
- B .True. Updates can migrate rows if space is insufficient.
- C .True. Large updates can chain rows across blocks.
- D .False. Chained rows may span blocks but aren't required to.
- E .False. Inserts don't migrate; they chain if too large initially.

61. Frage

What are the three components of Oracle Database Automatic Maintenance Tasks?

- A. A set of tasks that are started automatically at regular intervals to perform maintenance operations on the database.
- B. The maintenance windows managed by Oracle Database Scheduler, which are predefined time intervals permitting scheduled tasks.
- C. Oracle Database Resource Manager, which enables you to manage and configure system resources used by the Automatic Maintenance Tasks.
- D. A database alert log that stores details about major database operations and errors, which is used to manage cluster performance.
- E. A diagnostic system that collects database error logs and details about database failures that can be found to diagnose complete file.
- F. A packaging system that allows you to combine all error and failure logs to share with Oracle Support.

Antwort: A,B,C

Begründung:

- A .False. Diagnostic collection is ADR, not AMT.
- B .True. Resource Manager allocates resources to AMTs.
- C .True. Scheduler defines maintenance windows.
- D .False. Packaging is IPS/ADR, not AMT.
- E .False. Alert log is separate from AMTs.
- F .True. Tasks like stats collection are AMTs.

62. Frage

Which two Oracle database space management features require the use of locally managed tablespaces?

- A. Oracle Managed Files (OMF).
- B. Free space management with bitmaps.
- C. Automatic data file extension (AUTOEXTEND).
- D. Server-generated tablespace space alerts.
- E. Online segment shrink.

Antwort: B,E

Begründung:

- A .False. Works with DMTs too.
- B .True. LMTs use bitmaps, unlike DMT freelists.
- C .False. OMF is independent of management type.
- D .False. Alerts work with both.
- E .True. Shrink requires LMTs with ASSM.

63. Frage

Which two statements are true about Fine-Grained Auditing (FGA)?

- A. FGA policies can only be created by a user with SYSDBA privilege.
- B. FGA policies can be created by a user having granted the CREATE_FGA_POLICY role.
- C. FGA policies can be created by a user having the AUDIT_ADMIN privilege.
- D. FGA policies by default can be created by a schema owner on an object in their schema.
- E. FGA policies can be created by a user having EXECUTE privilege on the DBMS_FGA package.

Antwort: C,E

Begründung:

- A .False. Schema owners need EXECUTE on DBMS_FGA.
- B .False. Not limited to SYSDBA.
- C .True. AUDIT_ADMIN includes FGA creation rights.
- D .False. No such role exists.
- E .True. DBMS_FGA.ADD_POLICY requires this privilege.

64. Frage

- A. A dedicated server process communicates directly with a client or middle-tier process once the session is established.
- B. A dedicated server process may be reused by a new session after the session using that process terminates.
- C. The DBA configures the maximum number of dedicated server processes that can share the same dispatcher process.
- D. Each dedicated server process has its own dispatcher process.
- E. A dedicated server process can be spawned by the listener when using local clients.
- F. A dedicated server process can be spawned without a listener when using local clients.

Begründung:

- A .False. Dispatchers are for shared servers, not dedicated.
- B .False. Dedicated processes die with the session.
- C .True. Direct client-server communication occurs.
- D .False. No dispatchers in dedicated mode.
- E .True. Listener spawns for local/remote clients.
- F .True. Local logins (e.g., sqlplus /) bypass the listener.

.....

Es gibt ein Sprichwort, das Spiel beendet, wenn Sie es aufgeben. Die Prüfung ist ähnlich wie das Spiel. Viele geben die Oracle 1Z0-182 Zertifizierungsprüfungen auf, wenn sie nicht genug Zeit haben. Aber Sie können 1Z0-182 Prüfung mit guter Note bestehen, wenn Sie die richtige exam Fragen benutzen trotz kurzer Zeit. Glauben Sie nicht? Dann müssen sie die 1Z0-182 Prüfungsunterlagen von ZertFragen probieren.
