

CIS-PA Valuable Feedback | CIS-PA Practice Test Fee

A) contact your lawyer; the policy is a violation of the "fair trade" laws.

B) refer the person elsewhere; receipt of a salary constitutes voluntary agreement with the employer's policies.

C) inform the client of the policy and let the client decide how to proceed.

D) contact a consultant; then do as the consultant suggests.. Answer:
CORRECT ANSWER:

C) inform the client of the policy and let the client decide how to proceed.

• A married couple comes to you, as a counselor in private practice and tells you that they are having marital difficulties and have sought counseling for resolution of them. In the course of an initial session with them, one of the spouses reports being a new and active member of the local Alcoholics Anonymous (AA-) group. You should

A) investigate the nature of the local AA's activities and continue counseling if those activities do not include accepted definitions of counseling.

B) terminate counseling with the one spouse but continue to work with the spouse who is not an AA participant.

Currently ServiceNow products are important for enterprises information solutions, relative job opportunities are increasing more and more. CIS-PA latest dumps vce will be useful. IT skills are regarded as an important standard for enterprises. No matter which field you work in, IT staff must keep on learning to keep up with the changes. CIS-PA Latest Dumps vce will be a shortcut for ServiceNow certification and valid for your examinations.

ServiceNow CIS-PA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> This section addresses identifying and resolving issues using Spotlight diagnostic tools to monitor system health and performance.
Topic 2	<ul style="list-style-type: none"> Administration and Solutions: This domain covers administrative tasks using the Admin Console and accelerating deployment with pre-built Content Packs.
Topic 3	<ul style="list-style-type: none"> Architecture and Deployment: This domain covers the foundational components of the Performance Analytics solution and the proper deployment sequence in ServiceNow environments.
Topic 4	<ul style="list-style-type: none"> Perform Diagnostics and Troubleshooting
Topic 5	<ul style="list-style-type: none"> Data Visualization: This section focuses on presenting data through widgets, interactive filters, appropriate visualizations, dashboards, and analyzing data using Analytics Hub and KPI Details.

Pass Guaranteed Quiz 2026 CIS-PA: Certified Implementation Specialist - Platform Analytics Unparalleled Valuable Feedback

The ServiceNow CIS-PA PDF questions file of Test4Engine has real ServiceNow CIS-PA exam questions with accurate answers. You can download ServiceNow PDF Questions file and revise Certified Implementation Specialist - Platform Analytics CIS-PA exam questions from any place at any time. We also offer desktop CIS-PA practice exam software which works after installation on Windows computers. The CIS-PA web-based practice test on the other hand needs no software installation or additional plugins. Chrome, Opera, Microsoft Edge, Internet Explorer, Firefox, and Safari support the web-based CIS-PA Practice Exam. You can access the ServiceNow CIS-PA web-based practice test via Mac, Linux, iOS, Android, and Windows. Test4Engine Certified Implementation Specialist - Platform Analytics CIS-PA practice test (desktop & web-based) allows you to design your mock test sessions. These ServiceNow CIS-PA exam practice tests identify your mistakes and generate your result report on the spot.

ServiceNow Certified Implementation Specialist - Platform Analytics Sample Questions (Q57-Q62):

NEW QUESTION # 57

Choose 2 options.

Which types of calendars are supported on an Indicator Source?

- A. Docket Calendar
- B. Resource Calendar
- C. Custom Calendar
- D. Standard Calendar
- E. Fiscal Calendar

Answer: C,D

Explanation:

Indicator Sources in Platform Analytics support Standard calendars and Custom calendars to control how data collection aligns with business time definitions. The Standard Calendar uses regular system time, while Custom Calendars allow organizations to define business-specific working days, holidays, and schedules.

Fiscal calendars are used for financial reporting but are not supported directly by Indicator Sources. Resource and Docket calendars are unrelated to analytics collection. ServiceNow documentation explicitly states that Indicator Sources rely on standard or custom calendars for accurate time-based aggregation, making options B and E the correct answers.

NEW QUESTION # 58

Which user should you run Data Collections as?

- A. Maintenance account (maint)
- B. System Administrator
- C. A dedicated Performance Analytics service account
- D. Platform Analytics Admin

Answer: C

Explanation:

ServiceNow best practice recommends running Performance Analytics data collections using a dedicated service account specifically created for analytics processing. This ensures consistent permissions, predictable access to data, and improved auditability.

Running collections as individual admins can introduce permission inconsistencies if roles change. The maint account is intended for system upgrades and maintenance, not scheduled analytics jobs. A dedicated Performance Analytics service account minimizes operational risk and aligns with ServiceNow security and governance guidelines.

ServiceNow documentation emphasizes the importance of service accounts for background processing, making option C the correct and recommended choice.

NEW QUESTION # 59

How can a Breakdown be applied to multiple Indicators based on different Facts tables?

- A. Create a separate breakdown mapping for each indicator facts table
- B. Configure the indicators to use the same indicator source
- C. Create a mapping script to define the relationship between the indicator facts tables and the breakdown source
- D. Create a separate breakdown record for each indicator facts table

Answer: A

Explanation:

A single Breakdown can be reused across multiple indicators—even when those indicators are based on different facts tables—by creating a separate Breakdown Mapping for each indicator facts table.

The Breakdown defines what is being analyzed, while the Breakdown Mapping defines how the indicator facts relate to the breakdown source. Because different facts tables may store data differently, each requires its own mapping configuration. A scripted mapping is only required when no direct relationship exists, not simply because facts tables differ. ServiceNow documentation clearly states that reuse across facts tables is achieved through multiple mappings, making option D the correct answer.

NEW QUESTION # 60

Choose 2 options.

Which variables are used in a Performance Analytics script without being defined in the Fields list?

- A. collection_job_end
- B. score_start
- C. collection_job_start
- D. sys_created_on
- E. sys_updated_on
- F. score_end

Answer: B,F

Explanation:

In Performance Analytics scripted indicators, certain system-provided variables are automatically available without being explicitly defined in the Fields list. The variables `score_start` and `score_end` represent the start and end timestamps of the reporting period for which the indicator score is being calculated. These variables are essential for time-aware calculations and historical accuracy.

Fields such as `sys_created_on` and `sys_updated_on` must be explicitly added to the Fields list if they are used in scripts.

`collection_job_start` and `collection_job_end` are not available script variables in indicator calculations. ServiceNow documentation clearly identifies `score_start` and `score_end` as built-in variables available to Performance Analytics scripts, making options B and F the correct answers.

NEW QUESTION # 61

When creating a breakdown on the age of a task, which table can be used as the Facts table of the Breakdown Source?

- A. Task [task]
- B. Bucket Group
- C. Bucket [pa_buckets]
- D. Choice [sys_choice]

Answer: C

Explanation:

When creating a breakdown based on the age of a task, the correct Facts table for the Breakdown Source is Bucket [pa_buckets]. In Platform Analytics, age-based breakdowns (such as 0-5 days, 6-10 days, etc.) are not derived directly from the Task table.

Instead, they use bucketed data, which is generated by bucket groups during data collection.

The `pa_buckets` table stores the calculated bucket values for records at collection time, making it the authoritative facts table for age, duration, and numeric range breakdowns. Bucket Groups define how values are grouped, while the Bucket table stores the actual bucket assignments used in analytics. The Task table itself cannot be used as the facts table for age breakdowns because Platform Analytics requires pre-aggregated, time-aware bucket data to ensure historical accuracy. The Choice table is only used for choice list values and is unrelated to numeric or age-based breakdowns. ServiceNow documentation clearly states that bucket-based

breakdowns must reference thepa_bucketstable to function correctly and produce accurate time series analytics.

NEW QUESTION # 62

.....

Remember that this is a crucial part of your career, and you must keep pace with the changing time to achieve something substantial in terms of a certification or a degree. So do avail yourself of this chance to get help from our exceptional Certified Implementation Specialist - Platform Analytics (CIS-PA) dumps to grab the most competitive ServiceNow CIS-PA certificate. Test4Engine has formulated the Certified Implementation Specialist - Platform Analytics (CIS-PA) product in three versions. You will find their specifications below to understand them better.
