From the AP-211 free demo, you will have an overview about the complete exam dumps. The comprehensive questions together with correct answers are the guarantee for 100% pass.

Salesforce Health Cloud Accredited Professional Sample Questions (Q95-Q100):

NEW QUESTION # 95

A pharma customer requires a scheduling tool to book infusions with multiple steps as part of its Health Cloud implementation. It needs a solution for care coordinators to book appointments without having to manually check availability and resources themselves. Which solution should a consultant recommend?

- **A. Advanced Therapy Management**
- B. Intelligent Appointment Management
- C. Salesforce Scheduler
- D. Procedure Scheduling

Answer: A

NEW QUESTION # 96

A payer needs to triage provider and care team inquiries around member plan benefits and member care. The agents also need to be informed about changes in records that require attention.

Which three permission set licenses should a consultant assign to the security model for these users?

- **A. OmniStudio User permission set license**
- **B. Contact Center for Health Cloud permission set license**
- C. CRM Content User permission set license
- D. Service Cloud User permission set license
- **E. Health Cloud Platform permission set license**

Answer: A,B,E

NEW QUESTION # 97

During a sprint demo, a customer wants to update fields in the UI on the Patient Medication Manager component.

Which two objects is a consultant able to add and/or remove fields from?

Choose 2 answers

- **A. Medication Details**
- B. Medication Dispense

- C. Medication Strength
- D. Medication Request

Answer: A,D

Explanation:

The Patient Medication Manager component in Salesforce Health Cloud surfaces data from FHIR-aligned medication objects. When customers request field updates on this UI component, the consultant can configure fields from the underlying objects.

A . Medication Details → Stores key information about a patient's medications. Fields from this object can be exposed or customized on the Patient Medication Manager.

C . Medication Request → Represents a provider's request or order for a medication. Fields from this object are also available to configure in the Patient Medication Manager.

Together, these two objects form the basis of what's displayed and editable in the Patient Medication Manager.

Why not the others?

B . Medication Dispense - Tracks when and how a medication was dispensed. It is not directly configurable for field-level updates in the Patient Medication Manager component.

D . Medication Strength - Captures clinical details about dosage strength, but it isn't one of the configurable objects in the Patient Medication Manager UI.

Salesforce Health Cloud Reference:

Salesforce Health Cloud Medication Management:

"The Patient Medication Manager component displays information from Medication Details and Medication Request objects. Administrators can add or remove fields from these objects to tailor the component."

NEW QUESTION # 98

A new user story requires an OmniScript to update an existing field on a custom SObject.

Which two components should a consultant use to satisfy the requirement?

Choose 2 answers

- A. Integration Procedures
- B. DataRaptors
- C. SOQL Query
- D. API Actions

Answer: A,B

NEW QUESTION # 99

A customer wants to move its existing Patient-Reported Outcome Measures (PROMs) surveys to Health Cloud. It requires a solution that allows for question banks and version control for this standardized survey.

Which solution should a consultant recommend?

- A. Salesforce Feedback Management
- B. Salesforce Surveys
- C. Health Cloud Forms
- D. Discovery Framework

Answer: D

Explanation:

Step-by-Step Explanation:

Discovery Framework for PROMs Surveys:

The Discovery Framework in Health Cloud supports question banks, standardized survey templates, and version control.

Exact Extract:

"Use the Discovery Framework to create assessments with question banks, reusable questions, and versioning to manage standardized surveys such as PROMs." Reference:

Why Not Other Options?

Salesforce Surveys/Salesforce Feedback Management: Support surveys, but do not natively support question banks or version control for standardized, healthcare-specific forms.

Health Cloud Forms: Used for simple data capture, not for full-featured assessments with question banks and versioning.

Conclusion:

The Discovery Framework is the recommended solution for managing PROMs with question banks and version control.

NEW QUESTION # 100

.....

Our experts are responsible to make in-depth research on the exams who contribute to growth of our AP-211 practice guide. Their highly accurate exam point can help you detect flaws on the review process and trigger your enthusiasm about the exam. What is more, AP-211 Study Materials can fuel your speed and the professional backup can relieve you of stress of the challenge. So their profession makes our AP-211 preparation engine trustworthy.
