

350-701 Online Training - 350-701 Valid Test Forum

2026 Latest TestPassKing 350-701 PDF Dumps and 350-701 Exam Engine Free Share: https://drive.google.com/open?id=1SmXeelqa151mpv2fu4OTCB8v7O_AsOLg

TestPassKing provides you with Cisco 350-701 exam questions in 3 different formats to open up your study options and suit your preparation tempo. The Cisco 350-701 PDF is the most convenient format to go through all exam questions easily. It is a compilation of actual Cisco 350-701 exam questions and answers.

TestPassKing is one of the most reliable platforms to get actual Cisco 350-701 dumps. It offers the latest and valid real Implementing and Operating Cisco Security Core Technologies (350-701) exam dumps. The product of TestPassKing is available in Cisco 350-701 PDF, EXAM CODE desktop practice exam software, and web-based Implementing and Operating Cisco Security Core Technologies (350-701) practice test.

350-701 Valid Test Forum, 350-701 Hot Questions

The TestPassKing is committed from the day first to ace the Implementing and Operating Cisco Security Core Technologies (350-701) exam questions preparation at any cost. To achieve this objective TestPassKing has hired a team of experienced and qualified Cisco 350-701 certification exam experts. They utilize all their expertise to offer top-notch Implementing and Operating Cisco Security Core Technologies (350-701) exam dumps. These 350-701 exam questions are being offered in three different but easy-to-use formats.

Key Details of 350-701

The Cisco 350-701 Exam has a duration of 120 minutes and is offered in the English and Japanese languages. The official test can feature different types of questions from multiple-choice single response to multiple-choice multiple answers, testlet, fill in the blank, and drag and drop. In general, this security core exam should be taken by those individuals aiming for an exciting security role in information technology and now ready to advance. This group includes security engineers, network engineers, network designers, network administrators, systems engineers, technical solutions architects, consulting systems engineers, and network managers.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q383-Q388):

NEW QUESTION # 383

A network engineer has entered the `snmp-server user andy myv3 auth sha cisco priv aes 256 cisc0380739941` command and needs to send SNMP information to a host at 10.255.254.1. Which command achieves this goal?

- A. `snmp-server host inside 10.255.254.1 snmpv3 myv3`
- B. `snmp-server host inside 10.255.254.1 version 3 andy`

- C. snmp-server host inside 10.255.254.1 snmpv3 andy
- D. snmp-server host inside 10.255.254.1 version 3 myv3

Answer: B

NEW QUESTION # 384

Which portion of the network do EPP solutions solely focus on and EDR solutions do not?

- A. core
- B. server farm
- C. perimeter
- D. East-West gateways

Answer: C

Explanation:

EPP solutions solely focus on the perimeter of the network, which is the boundary between the internal and external networks. The perimeter is where most of the endpoints, such as laptops, desktops, mobile devices, and IoT devices, are located and connected to the network. EPP solutions aim to prevent, detect, and remediate security threats on these endpoints by using technologies such as antivirus, data encryption, and data loss prevention. EPP solutions rely on signatures and other indicators of intrusion by known threats to block malicious activity and malware on the endpoints¹².

EDR solutions do not focus on the perimeter, but rather on the entire network, including the core and the East-West gateways. The core is the central part of the network that connects different segments and provides high-speed data transmission. The East-West gateways are the points of communication between different segments within the network, such as between different data centers or cloud environments. EDR solutions provide continuous and comprehensive visibility into endpoint activities across the network by using threat hunting tools for behavior-based endpoint threat detection. EDR solutions monitor and record endpoint data, detect anomalies and malicious behavior, and respond to threats that EPP and other security tools did not catch. EDR solutions also enable security teams to proactively investigate and contain incidents by using incident data search, alert triage, threat validation, and malicious activity blocking¹³⁴.

NEW QUESTION # 385

Which two aspects of the cloud PaaS model are managed by the customer but not the provider? (Choose two)

- A. virtualization
- B. applications
- C. data
- D. operating systems
- E. middleware

Answer: B,C

Explanation:

Customers must manage applications and data in PaaS.

NEW QUESTION # 386

An organization received a large amount of SPAM messages over a short time period. In order to take action on the messages, it must be determined how harmful the messages are and this needs to happen dynamically.

What must be configured to accomplish this?

- A. Configure the Cisco ESA to receive real-time updates from Talos
- B. Configure the Cisco WSA to modify policies based on the traffic seen.
- C. Configure the Cisco ESA to modify policies based on the traffic seen.
- D. Configure the Cisco WSA to receive real-time updates from Talos.

Answer: C

NEW QUESTION # 387

What are two features of NetFlow flow monitoring? (Choose two)

- A. Can track ingress and egress information
- B. Include the flow record and the flow importer
- C. Does not require packet sampling on interfaces
- D. Copies all ingress flow information to an interface
- E. Can be used to track multicast, MPLS, or bridged traffic

Answer: A,E

Explanation:

The following are restrictions for Flexible NetFlow:

- + Traditional NetFlow (TNF) accounting is not supported.
- + Flexible NetFlow v5 export format is not supported, only NetFlow v9 export format is supported.
- + Both ingress and egress NetFlow accounting is supported.
- + Microflow policing feature shares the NetFlow hardware resource with FNF.
- + Only one flow monitor per interface and per direction is supported.

Reference:

consolidated_guide/b_consolidated_3850_3se_cg_chapter_011010.html

When configuring NetFlow, follow these guidelines and restrictions:

- + Except in PFC3A mode, NetFlow supports bridged IP traffic. PFC3A mode does not support NetFlow bridged IP traffic.
- + NetFlow supports multicast IP traffic.

The Flexible NetFlow - MPLS Egress NetFlow feature allows you to capture IP flow information for packets that arrive on a router as Multiprotocol Label Switching (MPLS) packets and are transmitted as IP packets. This feature allows you to capture the MPLS VPN IP flows that are traveling through the service provider backbone from one site of a VPN to another site of the same VPN

NEW QUESTION # 388

.....

In the such a brilliant era of IT industry in the 21st century competition is very fierce. Naturally, Cisco Certification 350-701 Exam has become a very popular exam in the IT area. More and more people register for the exam and passing the certification exam is also those ambitious IT professionals' dream.
