## NEX Exam Materials, Latest NEX Exam Online

Propulsion occurs when using our NEX practice materials. They can even broaden amplitude of your horizon in this line. Of course, knowledge will accrue to you from our NEX practice materials. There is no inextricably problem within our NEX practice materials. Motivated by them downloaded from our website, more than 98 percent of clients conquered the difficulties. So can you.

### NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q35-Q40):

#### NEW QUESTION # 35

A healthcare provider recommends that a patient take 200 milligrams (mg) of a pain reliever every 4 hours. How many grams of the pain reliever should the patient have taken after 8 hours if the recommendation was followed? (Given 1,000 mg = 1 gram.)

- A. 20 grams
- B. 40 grams
- C. 0.4 grams
- D. 0.2 grams

**Answer: C**

Explanation:

This is a medication dosage problem, a critical area on the NEX exam. First determine how many doses are taken in 8 hours. Since the medication is taken every 4 hours, the patient takes  $8 \div 4 = 2$  doses. Each dose is 200 mg, so the total amount taken is  $200 \times 2 = 400$  mg. Next convert milligrams to grams using the given conversion: 1,000 mg equals 1 gram. Divide  $400 \div 1,000 = 0.4$  grams. Therefore, the correct answer is D. Option B represents only one dose. Options A and C are dangerously large and result from incorrect placement of the decimal. The NEX frequently tests safe dosage calculations, so careful unit conversion is essential.

#### NEW QUESTION # 36

Word Knowledge

The word "initial" most nearly means:

- A. First
- B. Delayed
- C. Lasting
- D. Final

**Answer: A**

Explanation:

"Initial" refers to the first stage or beginning of something. Option B best matches this definition. NEX questions frequently test sequencing vocabulary.

#### NEW QUESTION # 37

Which of the following is the most common route of transmission of respiratory infections?

- A. Coughing
- B. Sexual intercourse
- C. IV drug use
- D. Fecal-oral

**Answer: A**

Explanation:

Respiratory infections are most commonly transmitted through airborne droplets released when an infected person coughs, sneezes, or talks. These droplets may be inhaled directly or land on surfaces where they can be transferred to the respiratory tract. Sexual intercourse and IV drug use are associated with bloodborne or sexually transmitted infections. The fecal-oral route is common for gastrointestinal infections. The NEX Science exam frequently tests routes of transmission as part of infection control and prevention, making coughing the correct and most common route for respiratory infections.

---

**NEW QUESTION # 38**

A car travels 15.6 miles on

3

4

4

3

of a gallon of gas. How many miles can the car travel on 5 gallons of gas?

- A. 20.8 miles
- **B. 104 miles**
- C. 58.5 miles
- D. 78 miles

**Answer: B**

Explanation:

This is a rate and proportion problem. First, determine how many miles the car travels per gallon. Since the car travels 15.6 miles on

3

4

4

3

of a gallon, divide:  $15.6 \div 0.75 = 20.8$  miles per gallon. Next, multiply this rate by the total number of gallons:

$20.8 \times 5 = 104$  miles. Therefore, option C is correct. Option A represents miles per gallon, not total distance.

Option B is a partial multiplication error. Option D results from multiplying before finding the correct rate.

NEX questions frequently assess whether students can correctly identify unit rates before scaling up.

---

**NEW QUESTION # 39**

A doctor lowered a patient's dosage from 50 mg to 40 mg. What percent decrease was this?

- A. 12.5%
- **B. 20%**
- C. 10%
- D. 25%

**Answer: B**

Explanation:

This question tests percent decrease, a common NEX topic. First find the amount of decrease: 50 mg # 40 mg

= 10 mg. Next divide the decrease by the original amount:

$10 \div 50 = 0.2$ .

Convert the decimal to a percent by multiplying by 100:

$0.2 \times 100 = 20\%$ .

Therefore, the correct answer is B. Option D represents the numerical decrease without considering the original value. Option A and C result from incorrect division. On the NEX exam, percent change problems always use the original value as the denominator.

**NEW QUESTION # 40**

.....

Free demo for NEX learning materials is available, you can try before buying, so that you can have a deeper understanding of what you are going to buy. We also recommend you to have a try before buying. In addition, NEX training materials contain both questions and answers, and it's convenient for you to check answers after practicing. NEX Exam Dumps cover most of the knowledge points for the exam, and you can have a good command of the knowledge points by using NEX exam dumps. We have online and offline chat service, if you have any questions, you can consult us.
