There are many other advantages. To gain a full understanding of our product please firstly look at the introduction of the features and the functions of our FCP_FGT_AD-7.6 exam torrent. The page of our product provide the demo and the aim to provide the demo is to let the you understand part of our titles before their purchase and see what form the software is after the you open it. The client can visit the page of our product on the website. So the client can understand our FCP_FGT_AD-7.6 Quiz torrent well and decide whether to buy our product or not at their wishes. The client can see the forms of the answers and the titles.

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.
Topic 2	<ul style="list-style-type: none">• Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Topic 3	<ul style="list-style-type: none">• Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.
Topic 4	<ul style="list-style-type: none">• VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.
Topic 5	<ul style="list-style-type: none">• Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which three pieces of information does FortiGate use to identify the hostname of the SSL server when SSL certificate inspection is enabled? (Choose three.)

- A. The serial number in the server certificate.
- B. The subject field in the server certificate.
- C. The host field in the HTTP header.
- D. The subject alternative name (SAN) field in the server certificate.
- E. The server name indication (SNI) extension in the client hello message.

Answer: B,D,E

Explanation:

When using SSL certificate inspection, FortiGate is not decrypting the traffic. During the exchange of hello messages at the beginning of an SSL handshake, FortiGate parses the server name indication (SNI) from client Hello, which is an extension of the TLS protocol. The SNI tells FortiGate the hostname of the SSL server, which is validated against the DNS name before receipt of the server certificate. If there is no SNI exchanged, then FortiGate identifies the server by the value in the server by the value in the Subject field or SAN (Subject Alternative Name) field in the server certificate.

NEW QUESTION # 43

What are two features of collector agent advanced mode? (Choose two.)

- A. Advanced mode uses the Windows convention - NetBios: Domain\Username.
- B. In advanced mode, FortiGate can be configured as an LDAP client and group filters can be configured on FortiGate.
- C. In advanced mode, security profiles can be applied only to user groups, not individual users.
- D. Advanced mode supports nested or inherited groups.

Answer: B,D

Explanation:

Advanced mode supports nested or inherited groups, allowing FortiGate to recognize users that belong to subgroups within AD. In advanced mode, FortiGate can be configured as an LDAP client and apply group filters, giving more granular control over user authentication and authorization.

NEW QUESTION # 44

An administrator wants to configure dead peer detection (DPD) on IPsec VPN for detecting dead tunnels. The requirement is that FortiGate sends DPD probes only when there is no inbound traffic.

Which DPD mode on FortiGate meets this requirement?

- A. On Idle
- B. Disabled
- C. Enabled
- D. On Demand

Answer: C

Explanation:

The "On Idle" DPD mode configures FortiGate to send DPD probes only when no inbound traffic is detected, meeting the requirement to send probes only when the tunnel is idle.

NEW QUESTION # 45

An administrator needs to analyze and resolve port conflicts between SSL VPN and HTTPS administrative access on the same interface.

In which two ways can this be done? (Choose two.)

- A. Run SSL VPN on one interface using port 443 and enable HTTPS administrative access on a different interface, also using port 443.
- B. Keep port 443 for both SSL VPN and HTTPS administrative access on the same interface without any problems.
- C. Change the port number for either the SSL VPN service or the HTTPS administrative service if both are on the same interface.
- D. Disable SSL VPN if HTTPS administrative access is using port 443 on any interface.

Answer: A,C

Explanation:

You can keep port 443 for SSL VPN on one interface and also use port 443 for HTTPS admin access on a different interface. Since the services are bound to different interfaces, no conflict occurs.

If both SSL VPN and HTTPS admin access are required on the same interface, you must change the port number for one of the services to avoid a port conflict.

NEW QUESTION # 46

When configuring firewall policies which of the following is true regarding the policy ID?

- A. You can create a policy in CLI with policy ID 0.
- B. A firewall policy ID identifies the order of policy execution in firewall policies.
- C. It is mandatory to provide a policy ID while creating a firewall policy regardless of GUI or CLI.
- **D. A policy ID cannot be edited once a policy is created.**

Answer: D

Explanation:

Once a firewall policy is created, its policy ID is fixed and cannot be changed; this ID uniquely identifies the policy within the FortiGate configuration.

NEW QUESTION # 47

.....

For candidates who want to enter a better company through getting the certificate, passing the exam becomes important. FCP_FGT_AD-7.6 study guide of us will help you pass the exam successfully. With the skilled experts to compile and verify, the FCP_FGT_AD-7.6 exam dumps are high-quality and accuracy, therefore you can use FCP_FGT_AD-7.6 Exam Questions And Answers at ease. What's more, we offer you free update for one year after purchasing. That is to say, you can get the latest version in the following year for free.
