Getting the Endpoint Administrator certification exam is necessary in order to get a job in your desired tech company. Success in the Endpoint Administrator (MD-102) certification exam gives you an edge over the others because you will have certified skills. The Endpoint Administrator certification exam badge will make a good impression on the interviewer. Most of the people planning to attempt the MD-102 Exam are confused that how will they prepare and pass MD-102 exam with good grades.

The desktop Endpoint Administrator (MD-102) practice test software is similar to the web-based MD-102 format as far as its features are concerned. But it works offline only on the Windows operating system. The offline MD-102 practice exam can be taken easily just by just installing the software on your Windows laptop or computer. All three Endpoint Administrator (MD-102) formats of TestBraindump are according to the latest content of the Microsoft MD-102 examination.

>> **Detail Microsoft MD-102 Explanation** <<

Endpoint Administrator Learn Dumps Can Definitely Exert Positive Effect on Your Exam - TestBraindump

PDF version of MD-102 training materials is legible to read and remember, and support printing request, so you can have a print and practice in papers. Software version of practice materials supports simulation test system, and give times of setup has no restriction. Remember this version support Windows system users only. App online version of MD-102 Exam Questions is suitable to all kinds of equipment or digital devices and supportive to offline exercise on the condition that you practice it without mobile data.

Microsoft Endpoint Administrator Sample Questions (Q313-Q318):

NEW QUESTION # 313

You have a Microsoft 365 tenant that uses Microsoft Intune and contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	macOS 

In Microsoft Intune Endpoint security, you need to configure a disk encryption policy for each device.

Which encryption type should you use for each device, and which role-based access control (RBAQ) role in Intune should you use to manage the encryption keys? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Device1:

- FileVault
- Cryptsetup
- Encrypting File System (EFS)
- BitLocker Drive Encryption (BitLocker)

Device2:

- FileVault
- Cryptsetup
- Encrypting File System (EFS)
- BitLocker Drive Encryption (BitLocker)

RBAC role:

- Help Desk Operator
- Application Manager
- Intune Role Administrator
- Policy and Profile Manager

Answer:

Explanation:

Answer Area

Device1:

- FileVault
- Cryptsetup
- Encrypting File System (EFS)
- BitLocker Drive Encryption (BitLocker) 1

Device2:

- FileVault 1
- Cryptsetup
- Encrypting File System (EFS)
- BitLocker Drive Encryption (BitLocker)

RBAC role:

- Help Desk Operator
- Application Manager
- Intune Role Administrator — 1
- Policy and Profile Manager

Explanation:

NEW QUESTION # 314

You have a Microsoft Intune subscription that has the following device compliance policy settings:

Mark devices with no compliance policy assigned as: Compliant

Compliance status validity period (days): 14

On January 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group2

On January 4, you create the following two device compliance policies:

Name: Policy1

Platform: Windows 10 and later

Require BitLocker: Require

Mark device noncompliant: 5 days after noncompliance

Scope (Tags): Tag1

Name: Policy2

Platform: Windows 10 and later

Firewall: Require

Mark device noncompliant: Immediately

Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
On January 8, Device2 is marked as compliant.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
On January 8, Device2 is marked as compliant.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No.

Policy1 and Policy2 apply to Group1 which Device1 is a member of. Device1 does not meet the firewall requirement in Policy2 so the device will immediately be marked as non-compliant.

Box 2: No

For the same reason as Box1.

Box 3: Yes

Policy1 and Policy2 apply to Group1. Device2 is not a member of Group1 so the policies don't apply.

The Scope (tags) have nothing to do with whether the policy is applied or not. The tags are used in RBAC.

NEW QUESTION # 315

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse.

What should you use to create the report?

- A. the Company Portal app

- **B. Microsoft Power BI**
- C. the Azure portal app
- D. Endpoint analytics

Answer: B

Explanation:

You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides connection settings to your tenant so that you can view the following sample reports and charts related to:

Devices

Enrollment

App protection policy

Compliance policy

Device configuration profiles

Software updates

Device inventory logs

Note: Load the data in Power BI using the OData link

With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.

Sign in to the Microsoft Endpoint Manager admin center.

Select Reports > Intune Data warehouse > Data warehouse.

Retrieve the custom feed URL from the reporting blade, for example:

<https://fef.{yourtenant}.manage.microsoft.com/ReportingService/DataWarehouseFEService/dates?api-version=v1.0> Open Power BI Desktop.

Choose File > Get Data. Select OData feed.

Choose Basic.

Type or paste the OData URL into the URL box.

Select OK.

If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.

Select Organizational account.

Type your username and password.

Select Sign In.

Select Connect.

Select Load.

NEW QUESTION # 316

You have an Azure subscription.

You have an on-premises Windows 11 device named Device 1.

You plan to monitor Device1 by using Azure Monitor.

You create a data collection rule (DCR) named DCR1 in the subscription.

To what should you associate DCR1 ?

- A. a Log Analytics workspace
- B. a Monitored Object
- **C. Device1**
- D. Azure Network Watcher

Answer: C

Explanation:

Explanation

To monitor Device1 by using Azure Monitor, you should associate DCR1 with Device1. A data collection rule (DCR) defines the data collection process in Azure Monitor, such as what data to collect, how to transform it, and where to send it. A DCR can be associated with multiple virtual machines and specify different data sources, such as Azure Monitor Agent, custom logs, or Azure Event Hubs1. To associate a DCR with a virtual machine, you need to install the Azure Monitor Agent on the machine and then select the DCR from the list of available rules2. You can also use Azure Policy to automatically install the agent and associate a DCR

with any virtual machines or virtual machine scale sets as they are created in your subscription³.

The other options are not correct for this scenario because:

Azure Network Watcher is a service that provides network performance monitoring and diagnostics for Azure resources. It is not related to data collection rules or Azure Monitor⁴.

A Log Analytics workspace is a destination where you can send the data collected by a data collection rule. It is not an entity that you can associate a DCR with⁵.

A Monitored Object is not a valid term in the context of Azure Monitor or data collection rules.

References: Data collection rules in Azure Monitor, Configure data collection for Azure Monitor Agent, Use Azure Policy to install Azure Monitor Agent and associate with a DCR, What is Azure Network Watcher?, Log Analytics workspaces in Azure Monitor

NEW QUESTION # 317

User1 and User2 plan to use Sync your settings.

On which devices can the users use Sync your settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1:

- No devices
- Device4 and Device5 only
- Device1, Device2 and Device3 only
- Device1, Device2, Device3, Device4, and Device5

User2:

- No devices
- Device4 and Device5 only
- Device1, Device2 and Device3 only
- Device1, Device2, Device3, Device4, and Device5

Answer:

Explanation:

Answer Area

User1:

- No devices
- Device4 and Device5 only
- Device1, Device2 and Device3 only
- Device1, Device2, Device3, Device4, and Device5

User2:

- No devices
- Device4 and Device5 only
- Device1, Device2 and Device3 only
- Device1, Device2, Device3, Device4, and Device5

Explanation:

User1:

- No devices
- Device4 and Device5 only
- Device1, Device2 and Device3 only
- Device1, Device2, Device3, Device4, and Device5

User2:

- No devices
- Device4 and Device5 only
- Device1, Device2 and Device3 only
- Device1, Device2, Device3, Device4, and Device5
