# Practice NCP-MCA Exam Online–Free PDF Premium Exam Provider for NCP-MCA: Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10)

BONUS!!! Download part of PDFDumps NCP-MCA dumps for free: https://drive.google.com/open?id=1weRlSfYY5RWP786KtzAEFoKPrtH-13We

Though there are three different versions of our NCP-MCA practice guide to cater to all needs of our worthy customers: the PDF, Software and APP online. I love the Software version the most. The software version of our NCP-MCA exam questions can be used in the Windows system, which is designed by the experts from our company. The functions of the software version are very special. For example, the software version of our NCP-MCA Learning Engine can simulate the real exam environment.

To be eligible to take the NCP-MCA certification exam, candidates must have at least six months of experience working with Nutanix technology, as well as experience working with cloud computing and automation tools. NCP-MCA exam is designed to test the knowledge and skills of IT professionals who are responsible for managing complex multicloud environments, and passing the exam is a valuable credential for anyone looking to advance their career in this field.

Nutanix NCP-MCA Certification is a highly sought-after certification for IT professionals who are interested in working with multicloud automation. Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) certification is aimed at individuals who have a deep understanding of the Nutanix platform and are capable of designing and implementing multicloud automation solutions.

NCP-MCA Premium Exam - NCP-MCA Downloadable PDF

Purchasing our NCP-MCA training test is not complicated, there are mainly four steps: first, you can choose corresponding version according to the needs you like. Next, you need to fill in the correct email address. And if the user changes the email during the subsequent release, you need to update the email. Then, the user needs to enter the payment page of the NCP-MCA Learning Materials to buy it. Finally, within ten minutes of payment, the system automatically sends the NCP-MCA study materials to the user's email address. And then you can quickly study and pass the NCP-MCA exam.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q43-Q48):

NEW QUESTION # 43

A director would like to have an up to date Cluster Efficiency Summary report emailed on the first of every month to keep management up to date on how the cluster is being utilized.

How could a playbook be configured to satisfy this request with the least human interaction?

- A. Report Trigger > Wait Until Day of Month > Email
- B. Manual Trigger > Generate Report > Email
- C. Time Trigger > Generate Report > Email
- D. Manual Trigger > Wait Until Day of Month > Generate Report > Email

Answer: C

Explanation:

A time trigger is a type of playbook trigger that allows the user to specify a schedule for running a playbook. This trigger is useful for automating tasks that need to be performed periodically or at a specific time. A manual trigger requires the user to initiate the playbook execution manually, which is not ideal for a recurring task. A report trigger is a type of playbook trigger that allows the user to run a playbook when a specific report is generated. However, this trigger does not guarantee that the report will be generated on the first of every month, as it depends on the report settings. A wait until day of month action is a type of playbook action that pauses the playbook execution until a specified day of the month. This action is unnecessary if the playbook already has a time trigger that specifies the desired schedule.

NEW QUESTION # 44

An administrator is notified of changes made to VMs on an AHV cluster and wants to verify the changes inside of a Calm application.

Where should the administrator check for synchronized changes between Prism Central and Calm?

- A. On the Prism Central Tasks page
- B. On the Overview tab of the Calm application
- C. On the Audit tab of the Calm application
- D. On the Environments tab of the Calm project

Answer: A

NEW QUESTION # 45

An administrator has noticed an increasing number of inactive VMS being left powered on within the environment over the course of OS migrations, using Playbooks, which two Actions should the administrator use to start documenting which VMS are marked as inactive to take future Automated actions on? (Choose two.)

- A. Send an Email with the Source Entity Name Parameter in the body.
- B. Assign the VMS to an Inactive:VM Category as an Action.
- C. Trigger Playbook on Powered Off VM for all applicable VMS.
- D. Trigger Playbook on Alert with the Inactive VM Alert Policy.

Answer: B,D

Explanation:

The administrator should assign the VMs to an Inactive:VM category as an action and trigger a playbook on alert with the Inactive VM alert policy. By doing this, they can create a custom category to group and identify the inactive VMs and use a custom alert policy to trigger a playbook that can perform automated actions on them, such as powering them off, deleting them, or sending notifications. This is based on the general practices in managing VMs in a multicloud environment, as well as the specific features and requirements of Nutanix X-Play and Nutanix Calm. References:

* Nutanix Multicloud Automation Administration (NMCAA) course, Module 3: Nutanix X-Play, Lesson 2: Nutanix X-Play Playbooks
* Nutanix Multicloud Automation Administration (NMCAA) course, Module 4: Nutanix Calm Governance, Lesson 2: Nutanix Calm Alerts

NEW QUESTION # 46
Which is a valid Endpoint in Self-Service?

- A. API Gateway
- B. CentOS
- C. Kubernetes
- D. Windows

Answer: D

NEW QUESTION # 47
What is required to enable Self-Service access for users?

- A. Creating an Environment
- B. Configuring a scheduler job
- C. Assigning RBAC roles
- D. Uploading a VM Image

Answer: C

Explanation:
To provide users with access to Nutanix Self-Service (formerly Calm), an administrator must configure Role- Based Access Control (RBAC) within the context of a Project.
Access to Self-Service is not global; it is defined at the Project level.1An administrator must:
* Add the user (or their Active Directory group) to a Project.
* Assign a Roleto that user within the project.
* Project Admin:Full control over the project.2
* Developer:Can create blueprints and applications.
* Consumer:Can only launch blueprints available in the Marketplace.3
* Operator:Can perform day-2 operations on existing applications.4
Without an assigned role in a project, a user cannot access the Self-Service portal features or view any blueprints.

NEW QUESTION # 48
......

In our lives, we will encounter many choices. Some choices are so important that you cannot treat them casually. The more good choice you choose in your life, the more successful you are. Perhaps our NCP-MCA exam guide can be your correct choice. Our study guide is different from common test engine. Also, the money you have paid for our NCP-MCA Study Guide will not be wasted.
