## Salesforce Communications Cloud Accredited Professional (AP) Exam Sample Questions (Q33-Q38):

### NEW QUESTION # 33

Universal Containers (UC) is implementing communication cloud. One of the KPIs for their digital transformation is to reduce time to market for new product and products changes since it is currently takes three-month end to end to launch new product. Which two actions will help measure product time to market in communication cloud?

- A. Create a Salesforce Report on the Product object to track the product time to market
- B. Create a Product Time to market app from template in CRM analytics to track the product time to market
- C. Leverage the EPC functionality to track the product related configuration.
- **D. Create Salesforce report on EPC project object to track the product time to market.**

**Answer: D**

### NEW QUESTION # 34

A company uses an in-house legacy order management system for order fulfillment and inventory management. The order fulfillment support team complains that the items that makes callouts to the inventory management system get stuck and fail for days and manual intervention is required. The company has decided to move the industries Order management (OM) system. How would industries OM Fallout Management reduce this issue for the company.

- A. By automatically balancing order processing tasks across multiple orchestration items
- B. By automatically balancing order processing tasks across multiple orchestration queues
- C. By automatically queuing the fulfillment request to retry according to fallout analysis report.
- **D. By automatically queuing the fulfillment request to retry according to predefined retry policy.**

**Answer: D**

Explanation:

Salesforce Industries Order Management's Fallout Management feature can address the issue of stuck order items by automatically queuing fulfillment requests to retry according to a predefined retry policy (C). This functionality helps manage temporary integration failures or delays without manual intervention, improving the overall reliability and efficiency of order processing tasks. References: Salesforce Industries OM Fallout Management documentation.

### NEW QUESTION # 35

Universal Containers (UC) is a communication service provider using communication cloud. UC negotiate customer specific pricing with a B2B customer, which will subsequently be used for the pricing order by the customer, which two actions must a consultant take to meet this requirements?

- A. Create New Offering, Configure Price List Entries for the customer specific pricing and mark it as a frame agreement offering
- B. Create a Quote, add customer contract based discounts for the customer specific pricing and create a Frame Agreement from the Quote
- **C. Create a Contract, add Contract line items for the customer specific pricing and mark it as a Frame Agreement Contract**
- **D. Create a New Promotion, Configure Price Overrides for the customer specific pricing and mark it as a Frame Agreement Promotion**

**Answer: C,D**

Explanation:

To accommodate customer-specific pricing in a B2B context, creating a new Promotion with price overrides (A) and establishing a Frame Agreement Contract with contract line items reflecting the negotiated prices (B) are effective strategies. These actions ensure that the pricing reflects the negotiated terms and is applied consistently across orders, providing a structured and scalable approach to managing customer-specific agreements. References: Salesforce CPQ documentation on promotions, price overrides, and contract management.

### NEW QUESTION # 36

ABC telecom is using communication cloud for their enterprise customers. ABC telecom has a requirement wherein assets must be synchronized to the assurance platform as soon as the sale of MACD order placed by each reseller throughout the day. There are hundreds of active reseller user present in the system. How should consultant recommend that ABC telecom integrate communication cloud with their assurance platform?

- A. Use an on-demand data pull from communication cloud using REST API from service assurance
- B. Use a Bulk API connector via middleware
- C. Use platform events and GetAsset API
- **D. Use industry order management to inform the assurance platform as a part of the orchestration plan**

**Answer: D**

Explanation:

To synchronize assets with the assurance platform in real-time, utilizing Industries Order Management as part of the orchestration plan (A) is the most integrated approach. This enables the automatic notification of the assurance platform upon any sales or MACD order placement, ensuring timely asset synchronization without the need for manual intervention or periodic data pulls. References: Salesforce Industries Order Management documentation on orchestration and real-time integration best practices.

### NEW QUESTION # 37

UC rolling out new offer, which must be fulfilled using industries order management. Orchestration must integrate with the provisioning system, which accepts a different payload for activating the service. What is the recommendation approach for designing the orchestration while minimizing unnecessary configurations?

- **A. Create two orchestration plans, one having the activation Orchestration item and other with the deactivation. Configure one scenario to map activation to Add action and deactivation to disconnect action**
- B. Create one orchestration plan definition with two orchestration definitions having mutually exclusive conditions. Configure the scenario to include both Add and disconnect actions.
- C. Create two orchestration plans, one having the activation Orchestration item and other with the deactivation. Configure scenario to map activation to add action and deactivate
- D. Create two orchestration plans, one having the activation orchestration item and other with deactivation item. Configure the orchestration items based on the products

**Answer: A**

### NEW QUESTION # 38
