

UiPath-ABAAv1試験の準備方法 | ユニークな UiPath-ABAAv1再テスト試験 | 素晴らしい UiPath Automation Business Analyst Associate Exam (2023.10)模擬問題

BONUS!!! CertShiken UiPath-ABAAv1ダンプの一部を無料でダウンロード: <https://drive.google.com/open?id=1vJG3ekIEEGsdBS7xEmtxEmggYdDf0JbE>

当社CertShikenは、お客様に信頼できる学習プラットフォームを提供できることを嬉しく思います。UiPath-ABAAv1クイズトレントは、急速な発展の世界のさまざまな分野の多くの専門家や教授によって設計されました。同時に、UiPath-ABAAv1試験問題集に質問がある場合は、プロの個人が短時間であなたの質問に答えることができます。つまり、UiPath-ABAAv1クイズ準備を購入することを選択した場合、当社が提供する権威ある学習プラットフォームを楽しむことができます。最新のUiPath-ABAAv1試験トレントが最適な選択になると確信しています。さらに重要なことは、最新のUiPath-ABAAv1試験トレントのデモを無料で入手できることです。

UiPath UiPath-ABAAv1 Exam Syllabus Topics:

Section	Objectives
Solution Design and Validation	- Testing and Validation • 1. Test case preparation • 2. UAT coordination - Solution Design Document (SDD) • 1. Automation design principles • 2. Edge case handling

UiPath Ecosystem and RPA Concepts	- RPA Fundamentals • 1. Automation lifecycle • 2. Attended vs unattended automation - UiPath Platform Overview • 1. UiPath Studio, Orchestrator, Robots • 2. Automation types
Project Delivery and Governance	- Governance and Best Practices • 1. Compliance considerations • 2. Automation maintenance strategy - Agile and RPA Delivery Lifecycle • 1. Sprint planning and execution • 2. Change management
Business Analysis Fundamentals	- Role of a Business Analyst in Automation Projects • 1. BA responsibilities in RPA lifecycle • 2. Stakeholder management - Process Discovery and Assessment • 1. As-is process identification • 2. Automation suitability assessment
Requirements Gathering and Documentation	- Process Modeling • 1. Process mapping techniques • 2. Flowcharts and BPMN basics - Business Requirement Documentation • 1. User stories and acceptance criteria • 2. BRD creation

変化する地域に対応するには、問題を解決する効率を改善する必要があります。これは、試験に対処するだけでなく、多くの側面を反映しています。UiPath-ABAAv1実践教材は、あなたがそれを実現するのに役立ちます。これらの時間に敏感な試験の受験者にとって、重要なニュースで構成される高効率のUiPath-ABAAv1実際のテストは、最高の助けになります。定期的にそれらを練習することによってのみ、あなたはあなたに明らかな進歩が起こったのを見るでしょう。

UiPath Automation Business Analyst Associate Exam (2023.10) 認定 UiPath-ABAAv1 試験問題 (Q17-Q22):

質問 # 17

Which document helps validate if an automation idea is suitable for automation?

- A. Application Tracker

- B. Process Assessment Tool
- C. Solution Design Document
- D. Project Plan

正解: B

解説:

The Process Assessment Tool is used to validate whether an automation idea is suitable for automation. It helps determine both the business value and the technical feasibility of a given process by evaluating parameters such as complexity, frequency, volume, standardization, and exception rate.

This tool is particularly useful during the Discovery phase or Business Case and Technical Validation stage.

It enables the Automation Business Analyst and stakeholders to prioritize the right automation candidates and avoid wasting resources on processes that offer little value or are difficult to automate.

The result is a data-driven decision-making process that ensures only high-impact, feasible processes move forward into implementation.

質問 # 18

Which document is finalized during the Process Analysis stage and outlines the current state of the process?

- A. Solution Design Document (SDD)
- B. Project Charter
- C. Statement of Work (SOW)
- D. Process Definition Document (PDD)

正解: D

解説:

The Process Definition Document (PDD) is created and finalized during the Process Analysis stage. It is one of the most critical documents in the automation lifecycle, as it outlines the As-Is state of the process to be automated in exhaustive detail.

The business analyst and solution architect collaborate with the Client Team to observe, document, and analyze how the process currently works. They identify variations, exceptions, input/output data, involved systems, and any manual interventions. This ensures the automation team has a clear understanding of the business process before creating the automated version.

Once the PDD is finalized and approved by all stakeholders, it becomes the baseline for building the To-Be automated solution. Any deviations from the PDD during development must be re-evaluated and approved.

This document also informs other stages such as solution design, development, and UAT planning.

質問 # 19

Which of the following best describes the main benefit of documenting an organized lifecycle for automation projects?

- A. Consistent quality, faster turnaround, and successful implementations
- B. Delays in testing and review
- C. Increased need for manual approval
- D. Reduces the need for communication among teams

正解: A

解説:

Documenting and following an organized lifecycle for automation projects - as outlined in the UiPath Automation Implementation Methodology - leads to consistent quality, faster turnaround times, and more successful implementations.

Each stage in the lifecycle - from Kickoff to Project Closure - has defined roles, responsibilities, deliverables, and checkpoints. This structured approach helps teams stay aligned, reduces misunderstandings, enables better risk management, and ensures that issues are caught early.

With a clear lifecycle, automation projects become repeatable, scalable, and manageable, even as the number of automated processes grows. This approach supports long-term success and helps organizations build sustainable automation programs with measurable value.

質問 # 20

In which three stages should user availability be clearly defined and communicated?

- A. Business Case Validation, Solution Design, UAT
- B. Solution Design, Testing, Discovery
- C. Kickoff, Process Analysis, UAT
- D. Deployment, Hypercare, Project Closure

正解: C

解説:

User availability should be clearly defined and communicated in the Kickoff, Process Analysis, and UAT stages. These stages require direct interaction with Client Team members such as process owners, subject matter experts (SMEs), and end users.

* During Kickoff, availability is discussed to plan for workshops, document reviews, and approvals.

* In Process Analysis, SMEs are needed to walk through the As-Is process for accurate documentation.

* In UAT, end users test the solution to ensure it meets business needs. Their availability is crucial for timely validation and sign-off.

Clear communication of availability in these stages helps avoid scheduling conflicts, delays, and incomplete information gathering.

質問 # 21

Which one of the following statements is TRUE about the Process Definition Document (PDD)?

- A. It is a document used for project closure after deployment
- B. It is prepared solely by the Project Manager
- C. It contains only the To-Be process design and future-state flows
- D. It is filled with only the As-Is process details

正解: D

解説:

The Process Definition Document (PDD) is primarily filled with the As-Is process details, making Option C the correct statement. The PDD captures how the process works today - including steps, inputs/outputs, systems used, exceptions, and roles involved.

It is typically created through collaboration between the Business Analyst and Solution Architect, based on workshops and shadowing sessions with the Client Team. This document forms the foundation for all subsequent steps in the implementation lifecycle, especially the Solution Design stage, where the To-Be process is planned.

The PDD ensures all stakeholders have a shared understanding of the current process before automation design begins. It also helps identify scope boundaries and validate that automation requirements are complete and accurate.

質問 # 22

.....

調査によれば、従業員の一部の新しいメンバーは昇進する機会を求めているが、UiPath-ABAAv1試験の準備に集中するために断片的な時間とエネルギーを利用する必要があるため、厄介な状況に陥っています。UiPath-ABAAv1試験の教材は多くの知識を取り入れており、参照用に利用可能な関連試験バンクを提供します。これは学習習慣に一致し、試験知識の豊富な収穫をもたらします。UiPath-ABAAv1試験の質問だけでなく、UiPath-ABAAv1認定資格を取得することもできます。
