

Certification Zscaler ZDTA Test Answers - Test ZDTA Price

ZDTA EXAM QUESTIONS AND ANSWERS 100% CORRECT.

ZCC - ANSWERS Lightweight app that sits on users, endpoint, and enforces security policies and access controls, regardless of device location or application

- Creates tunnel to Zero trust Exchange for protection of SaaS and internet-bound traffic
- persistent control plane
- dynamic, micro-segmented data plane tunnels to the ZTE for internal app protection
- traffic delivered to application via corresponding outbound only data plane tunnel from Zscaler app connector

Time to check for software updates - ANSWER Every 2 hours

Time when ZCC will connect and download any policy updates for the app profiles and forwarding profiles - ANSWER Every hour

Time when ZCC will download the PAC file of the app profiles and forwarding profiles - ANSWER Every 15 minutes

Forwarding Profile PAC - ANSWER S

OWASP - ANSWER (Open Web Application Security Project) A charity and community publishing a number of secure application development resources.

SSPM - ANSWER SaaS Security Posture Management

ZCSPM - ANSWER Zscaler Cloud Security Posture Management

DTLS - ANSWER (Datagram Transport Layer Security) TLS used with UDP applications, such as some VPN solutions.

ZDTA - ANSWER Zscaler Digital Transformation Administrator

ZTE - ANSWER Zero Trust Exchange

Authenticated tunnels options - ANSWER

- ZTunnel - Packet Filter Based
- ZTunnel - Route-Based
- ZTunnel with local proxy

ZTunnel 1.0 - ANSWER HTTP CONNECT tunnel

doesn't encapsulate traffic

adds some information header, ZTE to understand user information and data passed to it

100% Pass 2026 Perfect Zscaler ZDTA: Certification Zscaler Digital Transformation Administrator Test Answers

I can assure you that we will provide considerate on line after sale service for you in twenty four hours a day, seven days a week. Therefore, after buying our ZDTA study guide, if you have any questions about our ZDTA study materials, please just feel free to contact with our online after sale service staffs. We are pleased to give you the best and the most professional suggestions on every aspect on the ZDTA learning questions. You can contact and ask your question now!

Zscaler Digital Transformation Administrator Sample Questions (Q87-Q92):

NEW QUESTION # 87

What does Advanced Threat Protection defend users from?

- A. Vulnerable JavaScripts
- B. Large iFrames
- C. Command injection attacks
- **D. Malicious active content**

Answer: D

Explanation:

Advanced Threat Protection (ATP) defends users from malicious active content, which includes malware, exploit kits, malicious scripts, and other forms of active content designed to compromise user systems. ATP employs multiple techniques such as sandboxing, malware scanning, and threat intelligence to detect and block these threats before they reach the user.

NEW QUESTION # 88

In support of data privacy about TLS/SSL inspection, when you subscribe to ZIA, you enter into what kind of agreement?

- A. Zscaler Privacy Policy
- B. Acceptable Use Policy
- C. Zscaler Compliance Policy
- **D. Zscaler Data Processing Agreement**

Answer: D

Explanation:

When you sign up for Zscaler Internet Access - and enable TLS/SSL inspection - you enter into Zscaler's Data Processing Agreement, which governs how customer data (including decrypted TLS traffic) is handled in compliance with privacy laws.

NEW QUESTION # 89

An organization has more than one ZIA instance, each on different clouds. The organization is using the same login domain for both and upon login users are given this menu in ZCC asking which cloud they would like to join. What steps could an Administrator take to avoid having this menu appear?

- A. Federate the login domain between two different IDP instances.
- B. Create only one SAML integration with the desired ZIA instance.
- **C. Customize an MSI version of the ZCC file specifying the CLOUDNAME variable.**
- D. Customize an MSI version of the ZCC file specifying the USERDOMAIN variable.

Answer: C

Explanation:

To avoid prompting users with a cloud selection menu in the Zscaler Client Connector (ZCC), administrators should customize the MSI installation package with the CLOUDNAME parameter. This setting ensures the ZCC automatically connects to the correct ZIA cloud instance without user intervention. The CLOUDNAME corresponds to the designated cloud name for the organization's ZIA tenant, effectively bypassing the prompt.

This is outlined under Zscaler's deployment and configuration instructions for ZCC.

NEW QUESTION # 90

While troubleshooting a user's slow application access, can a ZDX administrator see degradations in Wi-Fi signal strength?

- A. Yes, but the current Wi-Fi signal strength is only displayed when doing a deep trace.
- B. Yes, the Wi-Fi hop latency is shown on a cloud path probe.
- **C. Yes, a low Wi-Fi signal may be seen in either the results of a Cloud Path Probe or in the device health Wi-Fi signal indicator.**
- D. No, ZDX only works on hardwired devices.

Answer: C

Explanation:

ZDX collects Wi-Fi signal strength as part of its Endpoint Monitoring metrics and also displays it in Cloud Path Probe results, so you can spot low signal quality either in the device health Wi-Fi indicator or when examining the Cloud Path visualization.

NEW QUESTION # 91

Which is an example of Inline Data Protection?

- A. Analyzing a customer's M365 tenant for security best practices.
- B. Preventing the copying of a sensitive document to a USB drive.
- **C. Blocking the attachment of a sensitive document in webmail.**
- D. Preventing the sharing of a sensitive document in OneDrive.

Answer: C

Explanation:

Inline Data Protection is the process of inspecting data as it transits the network in real time, enforcing policies that prevent sensitive data from being leaked or transmitted improperly. Blocking the attachment of a sensitive document in webmail represents inline data protection because it intercepts and controls data transmission at the network level, stopping sensitive content before it leaves the organization.

Preventing copying to a USB drive is endpoint control and does not happen inline in network traffic.

Preventing sharing in OneDrive is cloud access security broker (CASB) activity, often done through API integrations, not inline network control. Analyzing M365 tenant security is an audit or advisory activity, not real-time inline protection.

Therefore, the correct example of inline data protection in Zscaler's cloud security services is blocking the attachment of a sensitive document in webmail.

NEW QUESTION # 92

.....

Why do we need so many certifications? One thing has to admit, more and more certifications you own, it may bring you more opportunities to obtain a better job, earn more salary. This is the reason why we need to recognize the importance of getting the test ZDTA certification. Therefore, our ZDTA Study Tool can help users pass the qualifying examinations that they are required to participate in faster and more efficiently as our ZDTA exam questions have a pass rate of more than 98%. Just buy our ZDTA practice guide, then you will pass your ZDTA exam.
