We assure you that we will never sell users' information because it is damaging our own reputation.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q86-Q91):

NEW QUESTION # 86
Cloud Kicks has received a Request to be Forgotten by a customer. In which two ways can Data Cloud honor this request?

- A. Use Data Explorer to locate and manually remove the Individual
- B. Delete the data from the incoming data stream and perform a full refresh
- C. Add the Individual Id to a headerless file and use the delete from file functionality
- D. Use the Consent API to suppress processing and delete the individual and related records from source data streams

Answer: C,D

Explanation:
Explanation
These two ways can help Data Cloud honor a request to be forgotten by a customer. The Consent API allows you to set a consent flag for an individual that prevents further processing of their data and deletes their records from source data streams. The delete from file functionality allows you to upload a file with individual IDs that will be deleted from Data Cloud. NEW QUESTION # 87

What are the two minimum requirements needed when using the Visual Insights Builder to create a Calculated Insight?

- A. At least one measure
- B. At least one dimension
- C. WHERE clause is required
- D. At least two objects to join

Answer: A,B

Explanation:
Explanation
These two requirements are needed when using the Visual Insights Builder to create a Calculated Insight. A dimension is an attribute that can be used to group or filter data, such as product category or customer segment. A measure is an attribute that can be used to perform calculations, such as revenue or quantity.

NEW QUESTION # 88

An organization wants to enable users with the ability to identify and select text attributes from a picklist of options. Which Data Cloud feature can help with this use case?

- A. Value Suggestion
- B. Global Picklists
- C. Transformation Formulas
- D. Data Harmonization

Answer: A

Explanation:
Explanation
Value suggestion is a feature of Data Cloud that allows you to identify and select text attributes from a picklist of options. You can use value suggestion to standardize values across different data sources and improve data quality.

NEW QUESTION # 89

Cumulus Financial needs to create a composite key on an incoming data source that combines the fields Customer Region and Customer Identifier.
Which formula function should a consultant use to create a composite key when a primary key is not available in a data stream?

- A. CAST
- B. COMBIN
- C. CONCAT
- D. COALE

Answer: C

Explanation:
Composite Keys in Data Streams: When working with data streams in Salesforce Data Cloud, there may be situations where a primary key is not available. In such cases, creating a composite key from multiple fields ensures unique identification of records.
Formula Functions: Salesforce provides several formula functions to manipulate and combine data fields.
Among them, the CONCAT function is used to combine multiple strings into one.

Creating Composite Keys: To create a composite key using CONCAT, a consultant can combine the values of Customer Region and Customer Identifier into a single unique identifier.

Example Formula: CONCAT(Customer_Region, Customer_Identifier)

Salesforce Documentation: Formula Functions

Salesforce Data Cloud Guide

NEW QUESTION # 90

Which two applications automatically create activation targets at the time the application is connected to Data Cloud?

- A. Personalization powered by Interaction Studio
- B. B2C Commerce
- C. Amazon S3
- D. Marketing Cloud Engagement

Answer: A,B

Explanation:

Explanation

These two applications automatically create activation targets when they are connected to Data Cloud. You can use these targets to activate segments or calculated insights to these applications.
