

# Up to 365 days of free updates of the CrowdStrike IDP practice material

Our IDP real exam can be downloaded for free trial before purchase, which allows you to understand our IDP sample questions and software usage. It will also enable you to make a decision based on your own needs and will not regret. If you encounter any problems in the process of purchasing or using IDP Study Guide you can contact our customer service by e-mail or online at any time, we will provide you with professional help.

How far is the word from the deed? If you are a man of strong will, victory is at hand. Since you want to pass CrowdStrike IDP Exam, you must get the CrowdStrike IDP certification. CramPDF provide you with the latest certification training information and the most accurate tests answers. Real questions and answers can make your dream come true.

## Latest CrowdStrike IDP Exam Price | IDP New Real Test

There is no doubt that advanced technologies are playing an important role in boosting the growth of CrowdStrike companies. This is the reason why the employees have now started upgrading their skillset with the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) certification exam because they want to work with those latest applications and save their jobs. They attempt the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam to validate their skills and try to get their dream job.

## CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q14-Q19):

### NEW QUESTION # 14

What is the purpose behind creating Policy Rules?

- A. Policy Rules determine how the console tracks and learns behavior for users in the environment
- B. Policy Rules determine what actions an admin in the console can take before making adjustments
- C. Policy Rules determine what actions to take in response to certain triggers/conditions observed within the environment
- D. Policy Rules determine the scope in which the sensor collects information on the environment

**Answer: C**

**Explanation:**

Policy Rules in Falcon Identity Protection are designed to automate enforcement and response actions based on identity-related conditions observed in the environment. According to the CCIS curriculum, Policy Rules evaluate identity signals such as authentication behavior, risk levels, privilege status, and detection outcomes, then execute predefined actions when specific criteria are met.

These actions may include blocking authentication, enforcing MFA, generating alerts, or triggering Falcon Fusion workflows. This design supports Falcon's Zero Trust and continuous validation model, where trust decisions are dynamically enforced rather than statically assigned. Policy Rules therefore act as the operational bridge between identity analytics and enforcement.

The incorrect options confuse Policy Rules with other platform components. Administrative permissions are governed by RBAC,

sensor data collection scope is controlled through configuration settings, and behavioral learning is handled by Falcon's analytics engine-not Policy Rules.

The CCIS documentation explicitly defines Policy Rules as logic-based enforcement mechanisms, making Option A the correct and verified answer.

### NEW QUESTION # 15

What is the recommended action for the "Guest Account Enabled" risk?

- A. Apply a policy rule with an "Access" trigger and "Block" action on the Guest account
- B. Disable the endpoint in Active Directory
- C. **Disable Guest accounts on all endpoints**
- D. Add related endpoints to a watchlist

**Answer: C**

Explanation:

In Falcon Identity Protection, the "Guest Account Enabled" risk highlights the presence of local or domain guest accounts that remain active across endpoints. Guest accounts are inherently high-risk because they typically lack strong authentication controls, are rarely monitored, and are frequently abused by attackers for lateral movement and persistence.

The CCIS curriculum explicitly recommends disabling Guest accounts on all endpoints as the primary remediation action. This is because guest accounts often bypass standard identity governance processes and violate the principles of least privilege and Zero Trust, both of which are foundational to Falcon Identity Protection's security model. Disabling these accounts removes an unnecessary and dangerous authentication path from the environment.

Other options are incorrect because:

- \* Adding endpoints to a watchlist does not remediate the risk.
- \* Blocking access via a policy rule is less effective than eliminating the account entirely.
- \* Disabling endpoints in Active Directory does not directly address the guest account exposure.

Falcon Identity Protection prioritizes elimination of weak identity configurations, and disabling guest accounts is a direct, effective action that immediately lowers identity risk scores and reduces attack surface.

Therefore, Option C is the correct and verified answer.

### NEW QUESTION # 16

Which section of the Falcon menu is used to investigate the Event Analysis dashboard?

- A. Threat Hunter
- B. Configure
- C. **Explore**
- D. Enforce

**Answer: C**

Explanation:

In Falcon Identity Protection, the Explore section of the Falcon menu is used to investigate analytical views such as the Event Analysis dashboard. This aligns with the CCIS framework, which defines Explore as the primary area for interactive investigation, analytics, and risk exploration across identity data.

The Event Analysis dashboard is designed to help administrators analyze identity-related authentication events, behavioral patterns, and anomalous activity derived from domain traffic inspection and domain controller telemetry. These analytical capabilities are intentionally placed under Explore because this menu category supports hypothesis-driven investigation rather than enforcement or configuration actions.

By contrast:

- \* Enforce is used to apply policy rules and automated controls.
- \* Threat Hunter is focused on proactive hunting using queries and detection pivots.
- \* Configure is used to manage settings, connectors, policies, and integrations.

The CCIS documentation explicitly associates dashboards such as Risk Analysis and Event Analysis with the Explore menu, emphasizing its role in understanding why risk exists before taking action. Therefore, Option C (Explore) is the correct and verified answer.

### NEW QUESTION # 17

Falcon Identity Protection monitors network traffic to build user behavioral profiles to help identify unusual user behavior. How can this be beneficial to create a Falcon Fusion workflow?

- A. Falcon Fusion works with your IT policy enforcement through the use of identity and behavioral analytics
- B. Falcon Fusion is not identity based
- C. Falcon Fusion will only work with certain users
- D. Falcon Fusion will only send emails to the user

**Answer: A**

Explanation:

Falcon Identity Protection continuously inspects authentication traffic and network behavior to establish behavioral baselines for users and accounts. These baselines enable the platform to detect deviations that indicate potential compromise, misuse, or insider threat activity. This behavioral intelligence directly enhances the effectiveness of Falcon Fusion workflows.

Falcon Fusion leverages identity and behavioral analytics as decision points within workflows, allowing automated actions to be triggered when abnormal behavior is detected. For example, a workflow can automatically enforce MFA, notify administrators, isolate risky sessions, or initiate remediation when a user deviates from their established baseline.

The CCIS curriculum highlights that Falcon Fusion is designed to integrate identity risk signals with IT policy enforcement, enabling Zero Trust-aligned automation. This capability goes far beyond simple notifications and supports coordinated responses across security and IT teams.

Options A, B, and C are incorrect because Falcon Fusion is fully identity-aware, applies broadly across users and entities, and supports a wide range of actions beyond email notifications. Therefore, Option D accurately describes how behavioral profiling strengthens Falcon Fusion workflows.

### NEW QUESTION # 18

Which of the following IDaaS connectors will allow Identity to ingest cloud activity along with applying SSO Policy?

- A. Okta SSO
- B. Azure NPS
- C. ADFS
- D. SAML

**Answer: A**

Explanation:

Falcon Identity Protection integrates with Identity-as-a-Service (IDaaS) providers to ingest cloud authentication activity and enforce identity-based policies. According to the CCIS curriculum, Okta SSO is a supported IDaaS connector that enables Falcon to ingest cloud authentication events while also applying Single Sign-On (SSO) policies.

Okta SSO provides rich identity telemetry, including login attempts, device context, and authentication outcomes. This data allows Falcon Identity Protection to correlate on-premises and cloud-based identity activity, extending identity risk analysis beyond Active Directory.

The other options are incorrect:

- \* ADFS is an on-premises federation service, not a cloud IDaaS.
- \* Azure NPS is used for RADIUS-based MFA, not SSO ingestion.
- \* SAML is a protocol, not an IDaaS connector.

Because Okta SSO provides both cloud activity ingestion and SSO enforcement, Option B is the correct and verified answer.

### NEW QUESTION # 19

.....

CramPDF is a leading platform that is committed to offering to make the CrowdStrike Exam Questions preparation simple, smart, and successful. To achieve this objective CramPDF has got the services of experienced and qualified IDP Exam trainers. They work together and put all their efforts and ensure the top standard of CramPDF CrowdStrike IDP exam dumps all the time.

**Latest IDP Exam Price:** <https://www.crampdf.com/IDP-exam-prep-dumps.html>

Our IDP exam torrent is compiled by professional experts that keep pace with contemporary talent development and makes every learner fit in the needs of the society, CrowdStrike Exam IDP Braindumps There are many functions about our study materials

beyond your imagination, By doing this the successful IDP candidates can gain several personal and professional benefits in their career and achieve their professional career objectives in a short time period, And you will find our IDP practice materials are easy to download.

Working with Project Definition Files, In his current role, he is dedicated to helping his team and his students build a better web, Our IDP exam torrent is compiled by professional experts that keep Latest IDP Exam Price pace with contemporary talent development and makes every learner fit in the needs of the society.

## **IDP Exam Braindumps: CrowdStrike Certified Identity Specialist(CCIS) Exam & IDP Certification Training**

There are many functions about our study materials beyond your imagination, By doing this the successful IDP candidates can gain several personal and professional benefits IDP in their career and achieve their professional career objectives in a short time period.

And you will find our IDP practice materials are easy to download, To pass the hard CrowdStrike Certified Identity Specialist(CCIS) Exam IDP exam on the first try, you must invest more time, effort, and money.
