# Hot NSE7_SSE_AD-25 Latest Test Simulator 100% Pass | Valid NSE7_SSE_AD-25: Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator 100% Pass

The clients only need 20-30 hours to learn the NSE7_SSE_AD-25 exam questions and prepare for the test. Many people may complain that we have to prepare for the NSE7_SSE_AD-25 test but on the other side they have to spend most of their time on their most important things such as their jobs, learning and families. But if you buy our NSE7_SSE_AD-25 Study Guide you can both do your most important thing well and pass the test easily because the preparation for the test costs you little time and energy.

The catch is that passing the Fortinet NSE7_SSE_AD-25 exam is not as easy as it seems to be. It requires sheer determination, a thorough understanding of each topic, and critical thinking when posed with tricky problems. That is the reason why ExamsReviews have come up with a solution by providing the most updated prep material created under the supervision of 90,0000 experienced Fortinet professionals. This NSE7_SSE_AD-25 Exam Dumps is made to polish your abilities, help you understand every topic, and pass you Fortinet NSE7_SSE_AD-25 exam on your first attempt.

2026 Authoritative Fortinet NSE7_SSE_AD-25 Latest Test Simulator

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take NSE7_SSE_AD-25 tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, may also not make the right choice. A good choice can make one work twice the result with half the effort, and our NSE7_SSE_AD-25 Study Materials will be your right choice.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41
A customer configured the On/off-net detection rule to disable FortiSASE VPN auto-connect when users are inside the corporate network. The rule is set to Connects with a known public IP using the company's public IP address. However, when the users are on the corporate network, the FortiSASE VPN still auto-connects.

The customer has confirmed that traffic is going to the internet with the correct IP address.

Which configuration is causing the issue? (Choose one answer)

- A. Exempt endpoint from FortiSASE auto-connect is disabled when it should be enabled.
- B. The On-net rule set configuration is incorrect.
- C. Allow local LAN access when endpoint is on-net is disabled when it should be enabled.
- D. Is connected to a known DNS server should be enabled and configured.

Answer: A

Explanation:
The FortiSASE On/off-net detection feature is a two-part configuration designed to optimize bandwidth and user experience by determining when a device is in a trusted environment.
* Rule Set Definition: The first part involves defining what constitutes an "on-net" or "on-fabric" status.
In this scenario, the customer successfully configured a rule set named CERT-PUBLIC-IP using the Connects with a known public IP detection type. This tells FortiSASE that if the endpoint's public WAN IP matches the corporate gateway, it is considered to be on the corporate network.
* Profile Exemption Logic: Defining the rule set is not enough to stop the VPN connection. Within the Endpoint Profile (under the Connection tab > On/off-net Settings), there is a specific toggle labeled Exempt endpoint from FortiSASE auto-connect when endpoint is on-net (or in some versions, Bypass FortiSASE when endpoint is on-net).
* Exhibit Analysis: Looking at the provided exhibit (image_57097d.jpg), the "Exempt endpoint from FortiSASE auto-connect..." toggle is clearly disabled (switched to the left).
* Root Cause: Because this toggle is disabled, FortiClient identifies that it is "on-net" based on the IP rule, but it has no instruction to skip the VPN connection. Consequently, the "Automatically" initiate tunnel setting remains the dominant instruction, causing the VPN to connect regardless of the network location.
To resolve the issue, the administrator must enable the Exempt endpoint from FortiSASE auto-connect when endpoint is on-net option in the SASECert01 profile.

NEW QUESTION # 42
An organization needs to resolve internal hostnames using its internal rather than public DNS servers for remotely connected endpoints. Which two components must be configured on FortiSASE to achieve this?
(Choose two.)

- A. Split DNS rules
- B. Split tunnelling destinations
- C. SSL deep inspection
- D. DNS filter

Answer: A,B

Explanation:
To resolve internal hostnames using internal DNS servers for remotely connected endpoints, the following two components must be configured on FortiSASE:
* Split DNS Rules:
* Split DNS allows the configuration of specific DNS queries to be directed to internal DNS servers instead of public DNS servers.
* This ensures that internal hostnames are resolved using the organization's internal DNS infrastructure, maintaining privacy and accuracy for internal network resources.
* Split Tunneling Destinations:
* Split tunneling allows specific traffic (such as DNS queries for internal domains) to be routed through the VPN tunnel while other traffic is sent directly to the internet.
* By configuring split tunneling destinations, you can ensure that DNS queries for internal hostnames are directed through the VPN to the internal DNS servers.
References:
FortiOS 7.6 Administration Guide: Provides details on configuring split DNS and split tunneling for VPN clients.
FortiSASE 23.2 Documentation: Explains the implementation and configuration of split DNS and split tunneling for securely resolving internal hostnames.

NEW QUESTION # 43
Which two benefits come from integrating SoCaaS with FortiSASE? (Choose two answers)

- A. Provides bandwidth usage analytics
- B. Centralized visibility of all threat events
- C. Continuous threat monitoring of all connected endpoints
- D. Eliminates the need of endpoint projection software

Answer: B,C

NEW QUESTION # 44

Which secure internet access (SIA) use case minimizes individual workstation or device setup, because you do not need to install FortiClient on endpoints or configure explicit web proxy settings on web browser-based end points?

- A. SIA for site-based remote users
- B. SIA for inline-CASB users
- C. SIA for SSLVPN remote users
- D. SIA for agentless remote users

Answer: A

Explanation:
In this use case, secure internet access (SIA) is configured at the site level rather than on individual devices. This approach eliminates the need for individual endpoint setup, such as installing FortiClient or configuring web proxy settings on each workstation or device. It allows centralized management and secure internet access for all users at the site level, simplifying deployment and maintenance.

NEW QUESTION # 45

When configuring the DLP rule in FortiSASE using Regex format, what would be the correct order for the configuration steps? (Place the four correct steps in order)

Answer:

Explanation:
Explanation:
1. DLP Data Pattern
2. DLP Dictionary
3. DLP Sensor
4. DLP Profile
The FortiSASE Data Loss Prevention (DLP) framework follows a hierarchical object-oriented structure.
When creating a custom DLP rule using Regular Expressions (Regex), the administrator must build the components from the most granular level upward to the policy level.
* DLP Data Pattern: This is the first step where the actual Regex string is defined. The pattern specifies what specific data string (e.g., a specific credit card format or employee ID) the engine should look for.
* DLP Dictionary: Once the pattern is created, it must be added to a Dictionary. The dictionary acts as a container that groups one or more data patterns together for easier management.
* DLP Sensor: The dictionary is then linked to a DLP Sensor. Within the sensor, you define the "Rule" which specifies the dictionary to use and the action to take (such as block, log, or quarantine) when a match occurs.
* DLP Profile: Finally, the sensor is applied to a DLP Profile. This profile is the high-level object that is ultimately selected within a FortiSASE Security Policy to inspect traffic for sensitive data.

NEW QUESTION # 46

......

Our NSE7_SSE_AD-25 study materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials. 99% people who have used our NSE7_SSE_AD-25 study materials passed their exam and got their certificate successfully, it is no doubt that it means our NSE7_SSE_AD-25 study materials have a 99% pass rate. So our product will be a very good choice for you. If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our NSE7_SSE_AD-25 Study Materials as your study tool, our product will lend you a good helping hand. If you are willing to take our NSE7_SSE_AD-25 study materials into more consideration, it must be very easy for you to pass your

exam in a short time.
