Reliable NSE4_FGT_AD-7.6 Practice Questions & Certification Success Guaranteed, Easy Way of Training & Fortinet Fortinet NSE 4 - FortiOS 7.6 Administrator

Pass rate is 98.65% for NSE4_FGT_AD-7.6 exam cram, and we can help you pass the exam just one time. NSE4_FGT_AD-7.6 training materials cover most of knowledge points for the exam, and you can have a good command of these knowledge points through practicing, and you can also improve your professional ability in the process of learning. In addition, NSE4_FGT_AD-7.6 Exam Dumps have free demo for you to have a try, so that you can know what the complete version is like. We offer you free update for one year, and the update version will be sent to your mail automatically.

Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q106-Q111):

NEW QUESTION # 106

Refer to the exhibit, which shows a routing table.

Network	Gateway IP	Interfaces	Distance	Metric	Priority	Type
10.0.11.0/24	0.0.0.0	port4	0	0	0	Connected
10.0.12.0/24	0.0.0.0	port5	0	0	0	Connected
10.0.13.0/24	0.0.0.0	port6	0	0	0	Connected
100.65.0.0/24	0.0.0.0	port2	0	0	0	Connected
100.66.0.0/24	0.0.0.0	port3	0	0	0	Connected
172.20.1.0/24	100.66.0.254	port3	9	0	2	Connected
192.168.0.0/16	0.0.0.0	port1	0	0	0	Connected

An administrator wants to create a new static route so the traffic to the subnet 172.20.1.0/24 is routed through port2 only. What are the two criteria that the administrator can use to achieve this objective? (Choose two.)

- A. The new static route must have the priority set to 3.
- B. The existing static route through port3 must have the distance set to 11.
- C. The new static route must have the distance set to 9.
- D. The new static route must have the metric set to 1.

Answer: A,B

Explanation:

Currently, subnet 172.20.1.0/24 is routed through port3 with distance 9 and priority 2. To force routing through port2, the administrator must:

- Increase the distance of the existing route via port3 (e.g., to 11), making it less preferred.
- Configure the new static route on port2 with a higher priority value (e.g., 3) so it overrides the current port3 route when distances are equal.

NEW QUESTION # 107

Refer to the exhibits. An administrator configured the Web Filter Profile to block access to all social networking sites except Facebook. However, when users try to access Facebook.com, they are redirected to a FortiGuard web filtering block page. Based on the exhibits, which configuration change must the administrator make to allow Facebook while blocking all other social networking sites?

Web filter configuration

Edit Web Filter Profile

Feature set **Flow-based** Proxy-based

☒ FortiGuard Category Based Filter

☒ Allow ☒ Monitor ☐ Block ☐ Warning ☐ Authenticate

Name	Action
Web-based Applications	<input checked="" type="radio"/> Allow
Entertainment	<input checked="" type="radio"/> Allow
Arts and Culture	<input checked="" type="radio"/> Allow
Education	<input checked="" type="radio"/> Allow
Health and Wellness	<input checked="" type="radio"/> Allow
Job Search	<input checked="" type="radio"/> Allow
Medicine	<input checked="" type="radio"/> Allow
News and Media	<input checked="" type="radio"/> Allow
Social Networking	<input type="radio"/> Block

53% 95

☐ Allow users to override blocked categories

☒ Search Engines

Enforce 'Safe Search' on Google, Yahoo!, Bing, Yandex ☐

☒ Static URL Filter

Block invalid URLs ☐

URL Filter ☒

[+ Create New](#)

[Edit](#)

[Delete](#)

Search

URL	Type	Action	Status
www.facebook.com	Wildcard	<input checked="" type="radio"/> Monitor	<input checked="" type="radio"/> Enable

- A. Change the Feature set of Web Filter Profile as Proxy-based.
- B. Change the type as Simple in the Static URL Filter section.
- C. Set the Social Networking action as warning in the FortiGuard Category Based Filter.
- **D. Set the Action as Exempt for www.facebook.com in the Static URL Filter.**

Answer: D

Explanation:

The FortiGuard category filter is blocking Social Networking, which includes Facebook. Although a static URL filter entry for www.facebook.com exists, its action is set to Monitor, so it does not override the category block. To allow Facebook while blocking other social networking sites, the action for www.facebook.com in the Static URL Filter must be set to Exempt. This explicitly bypasses category filtering for that URL.

NEW QUESTION # 108

Which three statements explain a flow-based antivirus profile? (Choose three.)

- A. If a virus is detected, the last packet is delivered to the client.
- **B. Flow-based inspection uses a hybrid of the scanning modes available in proxy-based inspection.**
- **C. Flow-based inspection optimizes performance compared to proxy-based inspection.**

- D. FortiGate buffers the whole file but transmits to the client at the same time.
- E. The IPS engine handles the process as a standalone.

Answer: B,C,D

Explanation:

Flow-based antivirus buffers the entire file while simultaneously transmitting data to the client to minimize latency.

Flow-based inspection combines multiple scanning techniques from proxy-based modes for efficient detection.

Flow-based inspection provides better performance by processing traffic on the fly without full proxy overhead.

NEW QUESTION # 109

An administrator needs to analyze and resolve port conflicts between SSL VPN and HTTPS administrative access on the same interface.

In which two ways can this be done? (Choose two.)

- A. Run SSL VPN on one interface using port 443 and enable HTTPS administrative access on a different interface, also using port 443.
- B. Keep port 443 for both SSL VPN and HTTPS administrative access on the same interface without any problems.
- C. Disable SSL VPN if HTTPS administrative access is using port 443 on any interface.
- D. Change the port number for either the SSL VPN service or the HTTPS administrative service if both are on the same interface.

Answer: A,D

Explanation:

You can keep port 443 for SSL VPN on one interface and also use port 443 for HTTPS admin access on a different interface.

Since the services are bound to different interfaces, no conflict occurs.

If both SSL VPN and HTTPS admin access are required on the same interface, you must change the port number for one of the services to avoid a port conflict.

NEW QUESTION # 110

An administrator manages a FortiGate model that supports NTurbo.

How does NTurbo enhance performance for flow-based inspection?

- A. NTurbo creates a special data path to redirect traffic between the IPS engine its ingress and egress interfaces.
- B. NTurbo offloads traffic to the content processor.
- C. NTurbo creates two inspection sessions on the FortiGate device.
- D. NTurbo buffers the whole file and then sends it to the antivirus engine.

Answer: A

Explanation:

NTurbo creates a special data path to redirect traffic from the ingress interface to the IPS engine, and from the IPS engine to the egress interface.

NEW QUESTION # 111

.....

Our NSE4_FGT_AD-7.6 study materials will provide you with 100% assurance of passing the professional qualification exam. We are very confident in the quality of NSE4_FGT_AD-7.6 guide torrent. Our pass rate of NSE4_FGT_AD-7.6 training braindump is high as 98% to 100%. You can totally rely on our NSE4_FGT_AD-7.6 Practice Questions. We have free demo of our NSE4_FGT_AD-7.6 learning prep for you to check the excellent quality. As long as you free download the NSE4_FGT_AD-7.6 exam questions, you will satisfied with them and pass the NSE4_FGT_AD-7.6 exam with ease.
