

training materials. It not only can help you to pass the exam, you can also improve your knowledge and skills. Help you in your career in your advantage successfully. As long as you have the Network Appliance NS0-094 Certification, you will be treated equally by all countries.

## Network Appliance NetApp Hardware Support Engineer Professional Exam Sample Questions (Q77-Q82):

### NEW QUESTION # 77

What should be the first step taken after detecting a NetApp WAFL inconsistency?

- A. Run waffiron.
- B. Force offline the affected aggregate.
- C. Run a dump to null.
- D. Stabilize the system.

**Answer: D**

Explanation:

When a WAFL inconsistency is detected, the first step is to stabilize the system before attempting any repairs or recovery.

Steps to Handle WAFL Inconsistency:

Stabilize the System:

Ensure that the system is not experiencing ongoing hardware or software issues.

Avoid making changes to the affected aggregate or volume until the system is stable.

Assess the Impact:

Determine which aggregates or volumes are affected and the severity of the inconsistency.

### NEW QUESTION # 78

Which three commands can be used to manually generate a kernel core file? (Choose three.)

- A. `::> reboot -node <node_name> -dump true`
- B. `SP> system core`
- C. `::> system node panic -node <node_name>`
- D. `::> halt -dump true -node <node_name>`
- E. `SP> system power cycle`

**Answer: A,C,D**

Explanation:

To manually generate a kernel core file in ONTAP, the following commands can be used:

1. `::> reboot -node <node_name> -dump true`

What it does:

Reboots the specified node and generates a core dump before rebooting.

Example Usage:

`reboot -node <node_name> -dump true`

2. `::> halt -dump true -node <node_name>`

What it does:

Halts the specified node and generates a core dump before shutting down.

Example Usage:

`halt -dump true -node <node_name>`

3. `::> system node panic -node <node_name>`

What it does:

Forces a panic on the specified node, which triggers a kernel core dump.

Example Usage:

`system node panic -node <node_name>`

### NEW QUESTION # 79

Which statement best describes the functionality of RAID Error Propagation (REP)?

- A. An unrecoverable error on a user data block does not trigger a NetApp WAFL inconsistency.
- B. A recoverable error on a user data block triggers a NetApp WAFL inconsistency.
- C. An unrecoverable error on a metadata block does not trigger a NetApp WAFL inconsistency.
- D. An unrecoverable error on a user data block triggers a NetApp WAFL inconsistency.

**Answer: A**

Explanation:

Functionality of RAID Error Propagation (REP):

RAID Error Propagation (REP) ensures that errors on the disk layer, such as unrecoverable read errors, do not propagate as inconsistencies into the WAFL (Write Anywhere File Layout) metadata layer.

WAFL is designed to manage data blocks, and if an error occurs on a user data block, WAFL can identify and handle it gracefully without flagging an inconsistency.

Why Option A Is Correct:

REP ensures that errors on a user data block are isolated and do not trigger WAFL inconsistencies.

Instead, the error is handled at the RAID layer or higher without corrupting metadata.

This design provides a robust mechanism to protect against data integrity issues caused by disk errors.

### NEW QUESTION # 80

You have replaced a failed boot device. You perform boot\_recovery and receive no errors.

However, when the node reboots, it reports that it has no disks. What are two possible causes?

(Choose two.)

- A. The SAS cables were incorrectly reconnected after reinstalling the motherboard.
- B. The interconnect is down.
- C. The disks that are owned by this node have been marked as failed.
- D. The node is booting a lower version of ONTAP software than was last used.

**Answer: A,D**

Explanation:

Possible Causes for "No Disks" Error:

A (Incorrect SAS Cabling): If the SAS cables are incorrectly reconnected or swapped after replacing the boot device, the disks may not be detected because the physical connection to the shelves is compromised. Verifying and reseating the SAS cables is essential.

C (Lower ONTAP Version): If the node boots into an ONTAP version that is lower than the version previously used, it might not recognize the RAID labels or disk metadata created by the higher ONTAP version.

### NEW QUESTION # 81

On a NetApp FAS9000 system, which two field replaceable units (FRUs) are supported for replacement without takeover?

(Choose two.)

- A. DCPM module
- B. I/O module
- C. caching module
- D. NVRAM module

**Answer: B,D**

Explanation:

FRUs on FAS9000 Supporting Replacement Without Takeover:

A). (I/O Module): I/O modules can be replaced hot (without takeover) to maintain system uptime during hardware servicing.

D). (NVRAM Module): NVRAM modules on FAS9000 can also be replaced without a node takeover, ensuring data integrity during replacement.

### NEW QUESTION # 82

.....

One of the most important functions of our NS0-094 preparation questions are that can support almost all electronic equipment, including the computer, mobile phone and so on. If you want to prepare for your exam by the computer, you can buy the Software and APP online versions of our NS0-094 training quiz, because these two versions can work well by the computer. Moreover, the APP online version of our NS0-094 learning materials can also apply the IPAD, phone, laptop and so on.

**Reliable NS0-094 Exam Materials:** [https://www.actual4test.com/NS0-094\\_examcollection.html](https://www.actual4test.com/NS0-094_examcollection.html)

Network Appliance Reliable NS0-094 Study Materials The clients trust our products and treat our products as the first choice, Network Appliance Reliable NS0-094 Study Materials Our company is a professional certificate study materials provider, You can study NS0-094 exam engine anytime and anyplace for the convenience our three versions of our NS0-094 study questions bring, Firmly believe in an idea, the NS0-094 exam questions are as long as the user to follow our steps, follow our curriculum requirements, users can be good to achieve their goals, to obtain the NS0-094 qualification certificate of the target.

Soyka, Kevin Wilhelm, and Eric G, While the tool offers almost innumerable NS0-094 uses, the intent here is to show you how it works and to lead you to think about new ways to improve your own images.

## **Trustable Reliable NS0-094 Study Materials & Leading Offer in Qualification Exams & Verified Network Appliance NetApp Hardware Support Engineer Professional Exam**

The clients trust our products and treat our products NS0-094 Test Centres as the first choice, Our company is a professional certificate study materials provider, You can study NS0-094 Exam Engine anytime and anyplace for the convenience our three versions of our NS0-094 study questions bring.

Firmly believe in an idea, the NS0-094 exam questions are as long as the user to follow our steps, follow our curriculum requirements, users can be good to achieve their goals, to obtain the NS0-094 qualification certificate of the target.

To prepare for NS0-094 exam, you do not need read a pile of reference books or take more time to join in related training courses, what you need to do is to make use of our Actual4test exam software, and you can pass the exam with ease.
