

Latest GH-100 Exam Testking, Positive GH-100 Feedback

BONUS!!! Download part of VCETorrent GH-100 dumps for free: <https://drive.google.com/open?id=1YeJ1pEaKgH8TcOigQTDvLa3fmsnLzFE>

In order to meet the request of current real test, the technology team of research on VCETorrent Microsoft GH-100 exam materials is always update the questions and answers in time. We always accept feedbacks from users, and take many of the good recommendations, resulting in a perfect VCETorrent Microsoft GH-100 Exam Materials. This allows VCETorrent to always have the materials of highest quality.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML, SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 2	<ul style="list-style-type: none"> Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.
Topic 3	<ul style="list-style-type: none"> Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI CD pipelines.
Topic 4	<ul style="list-style-type: none"> Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.

Topic 5	<ul style="list-style-type: none">• Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI• CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.

Positive GH-100 Feedback & GH-100 Best Preparation Materials

Practice on Microsoft GH-100 practice test software improves your problem-solving skills and enables you to complete the Microsoft GH-100 exam within the time set. Practice with GH-100 practice test software to increase your capability to understand the queries and solve them quickly during the GH-100 Exam. VCETorrent is a reliable platform, offering Microsoft GH-100 pdf questions and practice tests for the last many years. Thousands of candidates have already used them for their Microsoft GH-100 exam preparation and gave positive feedback.

Microsoft GitHub Administration Sample Questions (Q31-Q36):

NEW QUESTION # 31

Which Git operation is not included in the Git activity audit log?

- A. Clone
- B. Push
- C. Delete branch
- D. Fetch

Answer: C

Explanation:

Delete branch operations aren't tracked as Git-activity events; the Git activity audit log only records Git events such as clone, fetch (pull), and push.

NEW QUESTION # 32

How does GitHub handle secrets found via secret scanning in a public repository?

- A. It immediately blocks the commit to protect the secret.
- B. It alerts the service provider (e.g., AWS, Stripe).
- C. It notifies the admin via webhook.
- D. It deletes the secret from the repository automatically.

Answer: B

Explanation:

When secret scanning detects a supported credential in a public repository, GitHub notifies the issuing service provider so they can revoke or rotate the exposed secret.

NEW QUESTION # 33

How does metered billing work in GitHub Enterprise Cloud with Enterprise Managed Users (EMU)?

- A. Billing is based on the number of users created in Azure AD
- B. Billing is based on number of total users in the enterprise
- C. Billing is based on owners and members of GitHub organizations
- D. Billing is based on total users in the enterprise that are not dormant

Answer: B

Explanation:

Billing for GitHub Enterprise Cloud under metered (usage-based) billing is calculated by the total number of Enterprise Managed Users (and other license-consuming accounts) in your enterprise - each EMU consumes a seat and contributes to the monthly bill.

NEW QUESTION # 34

You are planning GitHub account management for a healthcare organization with strict compliance requirements. Which THREE of the following statements accurately describe GitHub Enterprise Managed Users (EMU) accounts? (Choose three.)

- A. EMU accounts are owned by the organization and cannot be unlinked.
- B. EMU accounts restrict users to enterprise-related activities only
- C. EMU accounts can be used for both personal and enterprise repositories.
- D. EMU accounts are managed through an identity provider such as Azure AD.
- E. EMU accounts are created and managed by individual users.
- F. EMU accounts allow users to create and manage their own credentials.

Answer: A,B,D

Explanation:

Enterprise Managed User accounts are provisioned and authenticated exclusively through your identity provider (for example, AzureAD), so the IdP handles their creation, attribute updates, and deprovisioning.

Managed user accounts cannot create public content or interact with repositories outside your enterprise; they're confined to private and internal repos within the enterprise.

EMU accounts are owned and controlled by the enterprise (via the IdP) and cannot be converted into or unlinked as personal accounts outside that enterprise.

NEW QUESTION # 35

You need to contact GitHub Premium Support. What are valid reasons for submitting a support ticket? (Each answer presents a complete solution. Choose two.)

- A. hardware setup issues or errors
- B. business impact from security issues within your organization
- C. license renewal
- D. outages on GitHub.com affecting core Git functionality

Answer: B,D

Explanation:

Business-impact security issues (for example, a critical vulnerability affecting your organization) are classified as High-priority tickets and are covered under your Premium Support SLA.

Outages on GitHub.com that disrupt core Git or web application functionality trigger Urgent-priority responses under Premium Support's SLA.

NEW QUESTION # 36

.....

In addition to the environment, we also provide simulations of papers. You really have to believe in the simulation paper of our GH-100 study materials. With our GH-100 practice engine, you can know that practicing the questions and answers are a enjoyable experience and it is an interactive system. If you are answering the questions rightly, then the result will show right, and if you choose the wrong answer, then it will show wrong. And when you finish the GH-100 Exam Questions, the scores will come up as well.
