SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q38-Q43):

NEW QUESTION # 38
A logistics company is looking to reduce delivery delays and improve inventory management. Which SAP AI- powered solutions should they implement? Note: There are 3 correct answers to this question.

- A. SAP Digital Manufacturing Cloud
- B. SAP Cloud ERP
- C. SAP AI Business Services
- D. SAP Predictive Analytics
- E. SAP BusinessObjects Planning

Answer: A,C,D

Explanation:
For a logistics company aiming to reduce delivery delays and optimize inventory management, SAP offers AI- powered solutions

that enhance supply chain efficiency and forecasting. The correct answers are SAP AI Business Services, SAP Predictive Analytics, and SAP Digital Manufacturing Cloud, as these solutions directly address logistics challenges with AI-driven capabilities.

SAP documentation highlights: "Create a risk-resilient and sustainable supply chain with built-in AI that is connected and contextualized. Enabling you to predict customer demand and adjust to change." SAP AI Business Services provide reusable AI capabilities, such as machine learning for demand forecasting and anomaly detection, which help "optimize supply chain operations by analyzing real-time data and market trends." SAP Predictive Analytics, embedded in solutions like SAP S/4HANA, supports "predicting customer demand and adjusting inventory levels" to minimize delays and overstocking. SAP Digital Manufacturing Cloud leverages AI to "optimize production scheduling and inventory management," ensuring efficient logistics operations by integrating real-time data from manufacturing and supply chain processes.

The incorrect options-SAP BusinessObjects Planning and SAP Cloud ERP-are not primarily AI-driven for logistics. SAP BusinessObjects Planning focuses on financial planning and analytics, not logistics-specific AI applications. SAP Cloud ERP, while encompassing AI capabilities, is too broad and not specifically tailored to logistics compared to the selected solutions. SAP's case study on Henkel illustrates how AI in SAP Business Technology Platform enhances supply chain resilience, supporting the relevance of the chosen solutions.

NEW QUESTION # 39

(What are some generative AI tools for an SAP Cloud ERP transformation? Note: There are 3 correct answers to this question.)

- A. Process automation
- B. Integration generator
- C. Extension builder wizard
- D. ABAP Business Object generator
- E. Process model generator

Answer: A,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI tools for SAP Cloud ERP transformation include process automation capabilities in SAP Build Process Automation for generating and automating business processes, the process model generator in SAP Signavio for creating process models using AI, and the ABAP Business Object generator in Joule for developing ABAP-based business objects to extend ERP functionalities. These tools facilitate efficient migration, customization, and optimization during cloud ERP transformations by leveraging generative AI to streamline code, processes, and extensions.

Exact extracts supporting this:

Process automation: "SAP Build Process Automation integrates with generative AI to generate and edit business processes, decisions, forms, and script tasks using natural language descriptions."sap.com This supports automation in ERP transformations. Process model generator: "SAP Signavio uses generative AI to assist in process modeling, recommending performance indicators and generating models based on best practices."learning.sap.com ABAP Business Object generator: "Joule generates ABAP business objects using the ABAP RESTful Application Programming Model (RAP) for extensions in SAP S/4HANA Cloud."learning.sap.com "Generative AI in ABAP Cloud includes business object generation."community.sap.com Other options are incorrect because:

Option B: While extension building is simplified with wizards in SAP Build Code, it is not specifically a "generative AI tool" but rather a guided process; generative aspects come from Joule integration.

Option C: Integration generation is supported in SAP BTP, but not highlighted as a distinct generative AI tool for ERP transformation; focus is on code and process generation.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from SAP Learning Journey "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI," units on generative AI in SAP Signavio, Build Process Automation, and ABAP Cloud. Supported by SAP Community blogs on generative AI for S/4HANA migration and SAP Help Portal, aligning with C_BCBAI_2502 certification for tools in cloud ERP transformations.

NEW QUESTION # 40

(What are some key differentiators of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Ecosystem of Innovation
- B. Predictive Analytics
- C. Embedded AI
- D. AI Foundation
- E. Large Foundation Models

Answer: A,C,D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.
Exact extracts supporting this:
Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com
AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.) Ecosystem of Innovation: "Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."sap.com Implies ecosystem.
Other options are incorrect because:
Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.
Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business grounding.
Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," units on market point of view and role of Business AI, highlighting embedded AI, foundation, and ecosystem as differentiators, per C_BCBAI_2502 materials.
