CWNP Certified Wireless Design Professional Sample Questions (Q329-Q334):

NEW QUESTION # 329

In what circumstance would you not enable DFS channels on a WLAN infrastructure?

- **A. In an airport**
- B. In any home office
- C. In any office complex
- D. In any stadium

Answer: A

Explanation:

Dynamic Frequency Selection (DFS) channels are shared with radar systems, such as those used in airports.

Enabling DFS in such environments can lead to interference with radar operations and cause APs to frequently change channels, disrupting WLAN stability. Therefore, DFS channels should not be enabled in airport environments.

The CWDP-305 Official Study and Reference Guide advises against the use of DFS channels in areas where radar systems operate to prevent potential interference and ensure network reliability.
