But we keep being the leading position in contrast. We are reactive to your concerns and also proactive to new trends happened in this CSC2 Exam.

CSI Canadian Securities Course Exam2 Sample Questions (Q119-Q124):

NEW QUESTION # 119

Which type of market participant is generally regulated as an alternative trading system?

- A. Venture exchange
- B. Dark pool
- C. Pink sheets
- D. Over-the-counter bulletin board.

Answer: B

Explanation:

An alternative trading system (ATS) is a trading platform that is not a formal stock exchange but allows for the buying and selling of securities. A dark pool is a type of ATS where trade details are not displayed until after execution, providing anonymity to large institutional trades. Other options like venture exchanges, pink sheets, and OTC bulletin boards are not considered ATSs.

References:

* Volume 1, Chapter 9, "Alternative Trading Systems".

NEW QUESTION # 120

What is typically a key tax attribute of dividends?

- A. Dividend income is taxed more preferentially than interest income.
- B. Stock dividends are treated differently than regular cash dividends for tax purposes.
- C. Dividends from preferred shares are ineligible for dividend tax credit.
- D. Reinvested dividends are non-taxable to the shareholders.

Answer: A

Explanation:

Dividends are taxed at a preferential rate in Canada due to the dividend tax credit, which reduces the effective tax rate on dividend income. This is intended to prevent double taxation because corporations have already paid taxes on their profits before distributing dividends to shareholders.

- * B. Dividends from preferred shares are ineligible for the dividend tax credit: This is incorrect; dividends from both common and preferred shares are eligible for the dividend tax credit.
- * C. Stock dividends are treated differently than regular cash dividends for tax purposes: Stock dividends are generally taxed similarly to cash dividends.
- * D. Reinvested dividends are non-taxable to the shareholders: Reinvested dividends are taxable in the year they are earned, even if reinvested.

Reference: CSC Volume 2, Chapter 24, "Taxation of Dividend Income" discusses the tax treatment of dividends and the dividend tax credit.

NEW QUESTION # 121

What is an example of a common feature of robo-advisor services?

- A. The portfolios are rarely rebalanced
- B. A telephone call with an advisor verifies that the computer-generated portfolio is suitable for the client.
- C. Portfolios are built primarily with individual stocks and bonds.
- D. The service is exclusively provided to intermediaries such as advisors and employers

Answer: B

Explanation:

Many robo-advisor offer a hybrid model where an automated portfolio recommendation is supplemented by human oversight. A telephone call with an advisor ensures the portfolio generated by the algorithm aligns with the client's risk tolerance and investment objectives. This step helps meet regulatory suitability requirements.

- * A. The service is exclusively provided to intermediaries such as advisors and employers: Robo-advisors are directly available to retail clients and are not exclusive to intermediaries.
- * B. The portfolios are rarely rebalanced: Robo-advisors typically offer frequent or automatic rebalancing to maintain target asset allocations.
- * C. Portfolios are built primarily with individual stocks and bonds: Robo-advisors predominantly use ETFs for diversification and cost-efficiency, not individual securities.

NEW QUESTION # 122

The following financial information is available for fund SKE:

Total Liabilities	\$100,000
Units outstanding	1,000,000
Book value of assets	\$10,000,000
Current market value of assets	\$12,000,000

What is SKE fund's net asset value per share?

- A. \$12,00
- B. \$9,90
- C. **\$11,90**
- D. \$10, 00

Answer: C

Explanation:

A white sheet with black text Description automatically generated

To calculate the Net Asset Value (NAV) per share of the SKE Fund, use the following formula:

$$\text{NAV per share} = \frac{\text{Current Market Value of Assets} - \text{Liabilities}}{\text{Units Outstanding}}$$

Step-by-step Calculation:

1. Current Market Value of Assets: \$12,000,000
2. Liabilities: \$100,000
3. Net Asset Value (NAV) = \$12,000,000 - \$100,000 = \$11,900,000
4. Units Outstanding: 1,000,000

Now calculate NAV per share.

$$\text{NAV per share} = \frac{\text{NAV}}{\text{Units Outstanding}} = \frac{11,900,000}{1,000,000} = 11.90$$

Thus, the NAV per share is \$11.90.

Explanation of Answer Options:

- * Option A (\$9.90): Incorrect; this value does not reflect the subtraction of liabilities.
- * Option B (\$11.90): Correct; it accounts for the subtraction of liabilities and proper division by outstanding units.
- * Option C (\$12.00): Incorrect; it represents the market value of assets per unit without deducting liabilities.
- * Option D (\$10.00): Incorrect; this value does not align with the given data or calculations.

References to Canadian Securities Course Exam 2 Study Materials:

- * Volume 2, Chapter 17- Mutual Funds: Structure and Regulation, Pricing Mutual Fund Units:
- * Discusses the formula for calculating NAV per share, including the treatment of liabilities and market value of assets.
- * Volume 2, Chapter 22- Other Managed Products:

* Covers the concept of valuation for managed funds and its importance for accurate pricing.

* Volume 1, Chapter 11- Corporations and Their Financial Statements:

* Provides foundational knowledge about book and market values used in calculations.

NEW QUESTION # 123

What is a characteristic of the FTSE Canada Universe Bond Index?

- A. It represents a full cross-section of government and corporate bonds.
- B. It measures the total price return on bonds including realized and unrealized gains
- C. It is an equal-weighted bond Index with each bond representing the same weight within the index.
- D. It Includes Canadian investment-grade bonds with a term to maturity of one year or less.

Answer: A

Explanation:

The FTSE Canada Universe Bond Index represents a comprehensive cross-section of investment-grade government and corporate bonds denominated in Canadian dollars. It includes bonds with a term to maturity of one year or more and excludes high-yield (non-investment-grade) bonds.

- * A. It measures the total price return on bonds including realized and unrealized gains: The index does not account for realized gains; it tracks price movements and interest income.
- * C. It includes Canadian investment-grade bonds with a term to maturity of one year or less: Bonds in this index must have a term to maturity of at least one year, not less.
- * D. It is an equal-weighted bond index with each bond representing the same weight within the index:

The FTSE Canada Universe Bond Index is capitalization-weighted, not equal-weighted.

Reference:CSC Volume 1, Chapter 7, "Bond Indexes - FTSE Canada Universe Bond Index" explains the composition and characteristics of the index.
