If you want to get something done, just roll up your sleeves and do it. If you want to clear L5M10 exam, let our training online files help you. The more difficult the thing is the more important and useful it is. CIPS L5M10 training online files help your difficult thing become simple. Professionals be professionals! People can be defeated, but can't be beat. If you are determined to get a IT certification, you should not give up if you fail exam. Our L5M10 Training Online files will be the right exam materials for your choice.

CIPS L5M10 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Understand Capacity Planning and Control in Logistics Management: This section of the exam measures the skills of Operations Planners and focuses on the techniques and systems used to manage capacity, demand, and resource planning across logistics activities. It explains how organizations balance planning with real-time control, adjust to fluctuating demand, and schedule workloads effectively. Candidates are expected to understand capacity concepts, constraints, demand forecasting, capacity measurement, and different planning approaches such as level planning, chase demand strategies, and demand management methods. The section also examines the use of technology in capacity planning, particularly Materials Requirements Planning (MRP), MRP II, ERP systems, master production scheduling, inventory data, and bills of materials, while recognizing the limitations of these tools. Finally, it covers the role of reverse logistics, emphasizing the handling of customer returns, the development of return policies, and how returned items are reintegrated into the supply chain.
Topic 2	<ul style="list-style-type: none"> • Analyse the Role and Activities of Logistics Management: This section of the exam measures the skills of Logistics Managers and covers the essential concepts, functions, and strategic importance of logistics within modern supply chains. It explains what logistics is, how its key elements work together—such as transportation, warehousing, inventory, packaging, information flow, and security—and how these components support procurement, production, distribution, after-sales processes, and product disposal. The section explores how logistics integrates with broader supply chain management and introduces the idea of total logistics and total cost thinking, showing how multimodal transport and pipeline inventory contribute to efficiency. Candidates must understand how logistics creates competitive advantage by aligning operations with business strategy, managing customer service levels, measuring service quality, and recognizing its financial impact. This heading also evaluates the increasing role of technology in logistics, including barcoding, RFID, e-fulfilment systems, warehouse management systems, automated data capture, and the integration of digital tools across the logistics network.

Maybe there are so many candidates think the L5M10 exam is difficult to pass that they be beaten by it. But now, you don't worry about that anymore, because we will provide you an excellent exam material. Our L5M10 exam materials are very useful for you and can help you score a high mark in the test. It also boosts the function of timing and the function to simulate the exam so you can improve your speed to answer and get full preparation for the test. Trust us that our L5M10 Exam Torrent can help you pass the exam and find an ideal job. If you have any question about the content of our L5M10 exam materials, our customer service will give you satisfied answers online.

CIPS Logistics Management Sample Questions (Q42-Q47):

NEW QUESTION # 42

Paul is a Warehouse Manager of plumbing supplies. He is planning to change the layout by placing fast- moving items near the front, slower further back, and rarely used items in separate storage. What type of system is Paul using?

- A. VED analysis
- **B. FSN analysis**
- C. HML analysis
- D. ABC analysis

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

FSN groups items by movement speed: Fast-moving, Slow-moving, Non-moving. It's used to position stock for efficient access and handling based on usage frequency. (CIPS L5M10 Study Guide, p. 147)

NEW QUESTION # 43

Which pieces of information would you require to calculate aBOM exposure? Select TWO

- A. Lead-time of the materials
- B. Current inventory levels
- C. Materials required to complete an order
- D. Price of the materials

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

ABOM exposure determines net requirements by expanding the Bill of Materials for an order and offsetting it against current inventory/receipts to find what must be procured or made. Prices and lead times are relevant for scheduling/costing, not for the netting calculation itself. (CIPS L5M10 Study Guide, p. 182)

NEW QUESTION # 44

In an MRP system, which inputs need to be programmed into the system in order to generate a purchase order for new stock? Select THREE

- A. Production Plan
- B. Materials Movement Plan
- C. Master Production Levels
- D. Master Production Schedule
- E. Bill of Materials

Answer: C,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Core inputs to MRP include the Master Production Schedule (MPS), master/engineered production levels and the Bill of Materials (BOM). Items like the production plan and materials movement plan are outputs / derived plans produced by running the MRP logic. (CIPS L5M10 Study Guide, p. 171)

NEW QUESTION # 45

A Transport Management System (TMS) comprises several functions. Which of the following is NOT one of these?

- A. Fleet maintenance
- B. Transport execution
- C. Planning and decision-making
- D. Measurement and reporting

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Core TMS functions typically include: planning & decision-making (e.g., carrier/route selection), transport execution (e.g., tendering, dispatch), transport follow-up/visibility, and measurement & reporting (KPIs).

Fleet maintenance is generally a separate fleet/asset management function, not a standard TMS core function.

(Reference: CIPS L5M10 Study Guide, TMS functions, p. 91)

NEW QUESTION # 46

Which of the following is a commonly used indicator for measuring capacity and manufacturing productivity and is usually expressed as the percentage of time a machine is truly productive?

- A. Effective Operational Measure
- B. Overall Equipment Effectiveness
- C. Machine downtime
- D. Actual output

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Overall Equipment Effectiveness (OEE) combines availability, performance, and quality to indicate how much of scheduled time a resource is genuinely productive. Downtime is a component that reduces OEE;

"actual output" is an absolute measure, not an effectiveness percentage. (Reference: CIPS L5M10 Study Guide, OEE definition, p. 109)

NEW QUESTION # 47

• • • • •

All contents are being explicit to make you have explicit understanding of this exam. Some people slide over ticklish question habitually, but the experts help you get clear about them and no more hiding anymore. Their contribution is praised for their purview is unlimited. None cryptic contents in L5M10 practice materials you may encounter.
