- Protect devices: In this topic, aspiring administrators get knowledge about configuration of endpoint security and management of device updates by using Intune.

## &gt;&gt; Valid MD-102 Test Syllabus &lt;&lt;

**Microsoft MD-102 Valid Test Sample - Best MD-102 Preparation Materials**

The study material to get Microsoft Endpoint Administrator certified should be according to individual's learning style and experience. Real Microsoft MD-102 Exam Questions certification makes you more dedicated and professional as it will provide you complete information required to work within a professional working environment.

**Microsoft Endpoint Administrator Sample Questions (Q38-Q43):****NEW QUESTION # 38**

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set the Startup Type of the Remote Registry service to Automatic
- B. Enable the Allow Remote Shell access setting.
- C. Enable the Windows Defender Firewall: Allow inbound remote administration exception setting.
- D. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- E. Enable the Allow remote server management through WinRM setting.
- F. Enable the Windows Defender Firewall: Allow inbound Remote Desktop exceptions setting.

**Answer: C,D,E**

Explanation:

To enable WinRM on domain computers using Group Policy, you need to perform the following actions:

Enable the Allow remote server management through WinRM setting under Computer Configuration > Policies > Administrative Templates > Windows Components > Windows Remote Management (WinRM) > WinRM Service. This setting allows you to specify the IP address ranges that can connect to the WinRM service.

Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic under Computer Configuration > Preferences > Control Panel Settings > Services. This setting ensures that the WinRM service starts automatically on the computers.

Enable the Windows Defender Firewall: Allow inbound remote administration exception setting under Computer Configuration > Policies > Security Settings > Windows Firewall and Advanced Security > Windows Firewall and Advanced Security > Inbound Rules. This setting creates a firewall rule that allows incoming TCP connections on port 5985 for WinRM. References: How to Enable WinRM via Group Policy, Installation and configuration for Windows Remote Management

**NEW QUESTION # 39**

You have an Azure AD tenant named contoso.com.

You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

Name	Memory	TPM
Device1	16 GB	Microsoft
Device2	8 GB	Version 1.2
Device3	4 GB	Version 2.0

Which devices can be configured by using Windows Autopilot self-deploying mode?

- A. Device2 only
- B. Device3 only
- C. Device 1, Device2, and Device3
- D. Device2 and Devnce3 only

**Answer: D**

Explanation:

Windows Autopilot self-deploying mode requires devices that have a firmware-embedded activation key for Windows 10 Pro or Windows 11 Pro. This feature allows devices to automatically activate Windows Enterprise edition using the subscription license assigned to the user. Device1 does not have a firmware-embedded activation key, so it cannot use self-deploying mode. Device2 and Device3 have firmware-embedded activation keys for Windows 10 Pro, so they can use self-deploying mode. Reference: Windows Autopilot self-deploying mode (Public Preview), Deploy Windows Enterprise licenses

#### NEW QUESTION # 40

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage Windows 11 devices.

You create a new policy set named Set and add five device configuration profiles for Windows 10 and later.

You create a device compliance policy named Policy1.

You need to ensure that when users are assigned the device configuration profiles in Set1, they are always assigned Policy1 also.

What should you configure?

- A. the Set1 configurations
- B. the assignments of Policy1
- C. the Policy1 configurations
- D. the assignments of Set1

**Answer: D**

Explanation:

You can include the following management objects in a policy set:

Apps

App configuration policies

App protection policies

Device configuration profiles

Device compliance policies

Windows autopilot deployment profiles

Enrollment status page

Settings catalog policies

#### NEW QUESTION # 41

You have a Microsoft 365 subscription.

A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed.

You need to configure the laptop to meet the following requirements:

- Modify the layout of the Start menu
- Upgrade Windows 10 to Windows 10 Enterprise
- Join the laptop to a Microsoft Azure Active Directory (Azure AD)

domain named contoso.com

What should you do?

- A. Create a provisioning package (.ppkg) file and email the file to the user
- B. Create a Sysprep Unattend (.xml) file and email the file to the user
- C. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file to a Microsoft
- D. Create a Windows To Go workspace and ship the workspace to the user

**Answer: A**

Explanation:

A provisioning package (.ppkg) is a container for a collection of configuration settings. With Windows 10, you can create provisioning packages that let you quickly and efficiently configure a device without having to install a new image.

Provisioning packages are simple enough that with a short set of written instructions, a student or non-technical employee can use them to configure their device. This can result in a significant reduction in the time required to configure multiple devices in your organization.

#### NEW QUESTION # 42

Your on-premises network contains an Active Directory Domain Services (AD DS) domain.

You have an Azure subscription that contains a virtual network named VNet1. VNet1 contains five virtual machines and is NOT connected to the on-premises network.

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You purchase Windows 365 Enterprise licenses.

You need to deploy Cloud PC. The solution must meet the following requirements:

- \* All users must be able to access their Cloud PC at any time without any restrictions.
- \* The users must be able to connect to the virtual machines on VNet1.

How should you configure the provisioning policy for Windows 365? To answer, drag the appropriate options to the correct settings. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Options**

- Azure network connection
- Enterprise
- Frontline
- Microsoft Entra Hybrid Join
- Microsoft Entra Join
- Microsoft hosted network

**Answer Area**

Join type:

Network:

License type:

**Answer:**

**Explanation:**

**Options**

- Azure network connection
- Enterprise
- Frontline
- Microsoft Entra Hybrid Join
- Microsoft Entra Join
- Microsoft hosted network

**Answer Area**

Join type: Microsoft Entra Hybrid Join

Network: Azure network connection

License type: Enterprise

**Explanation:**

**Options**

- Azure network connection
- Enterprise
- Frontline
- Microsoft Entra Hybrid Join
- Microsoft Entra Join
- Microsoft hosted network

**Answer Area**

Join type: Microsoft Entra Hybrid Join

Network: Azure network connection

License type: Enterprise

#### NEW QUESTION # 43

.....

PassExamDumps You can modify settings of practice test in terms of Endpoint Administrator MD-102 Practice Questions types and mock exam duration. Both MD-102 exam practice tests (web-based and desktop) save your every attempt and present result of the

attempt on the spot. Actual exam environments of web-based and desktop Microsoft practice test help you overcome exam fear. Our Microsoft desktop practice test software works after installation on Windows computers.
