Latest Professional-Cloud-DevOps-Engineer Exam Bootcamp & Professional-Cloud-DevOps-Engineer Valid Exam Blueprint

As is known to us, perfect after-sales service for buyers is a very high value. Our Professional-Cloud-DevOps-Engineer guide torrent not only has the high quality and efficiency but also the perfect service system after sale. If you decide to buy our Professional-Cloud-DevOps-Engineer test torrent, we would like to offer you 24-hour online efficient service, you have the right to communicate with us without any worries at any time you need, and you will receive a reply, we are glad to answer your any question about our Professional-Cloud-DevOps-Engineer Guide Torrent. You have the right to communicate with us by online

contacts or by an email. The high quality and the perfect service system after sale of our Professional-Cloud-DevOps-Engineer exam questions have been appreciated by our local and international customers. So you can rest assured to buy.

Google Cloud Certified - Professional Cloud DevOps Engineer Exam Sample Questions (Q44-Q49):

NEW QUESTION # 44

You support an application that stores product information in cached memory. For every cache miss, an entry is logged in Stackdriver Logging. You want to visualize how often a cache miss happens over time. What should you do?

- A. Create a logs-based metric in Stackdriver Logging and a dashboard for that metric in Stackdriver Monitoring.
- B. Link Stackdriver Logging as a source in Google Data Studio. Filter the logs on the cache misses.
- C. Configure Stackdriver Profiler to identify and visualize when the cache misses occur based on the logs.
- D. Configure BigQuery as a sink for Stackdriver Logging. Create a scheduled query to filter the cache miss logs and write them to a separate table

Answer: A

Explanation:

Explanation

<https://cloud.google.com/logging/docs/logs-based-metrics#counter-metric>

NEW QUESTION # 45

You are building an application that runs on Cloud Run. The application needs to access a third-party API by using an API key. You need to determine a secure way to store and use the API key in your application by following Google-recommended practices. What should you do?

- A. Save the API key in Cloud Key Management Service (Cloud KMS) as a key. Reference the key as an environment variable in the Cloud Run application.
- B. Save the API key in Secret Manager as a secret. Mount the secret key under the `/sys/api_key` directory and decrypt the key in the Cloud Run application.
- C. Encrypt the API key by using Cloud Key Management Service (Cloud KMS) and pass the key to Cloud Run as an environment variable. Decrypt and use the key in Cloud Run.
- D. Save the API key in Secret Manager as a secret. Reference the secret as an environment variable in the Cloud Run application.

Answer: D

Explanation:

The best option for storing and using the API key in your application by following Google-recommended practices is to save the API key in Secret Manager as a secret and reference the secret as an environment variable in the Cloud Run application. Secret Manager is a service that allows you to store and manage sensitive data, such as API keys, passwords, and certificates, in Google Cloud. A secret is a resource that represents a logical secret, such as an API key. You can save the API key in Secret Manager as a secret and use IAM policies to control who can access it. You can also reference the secret as an environment variable in the Cloud Run application by using the `$(SECRET_NAME)` syntax. This way, you can securely store and use the API key in your application without exposing it in your code or configuration files.

NEW QUESTION # 46

You have an application running in Google Kubernetes Engine. The application invokes multiple services per request but responds too slowly. You need to identify which downstream service or services are causing the delay. What should you do?

- A. Use a distributed tracing framework such as OpenTelemetry or Stackdriver Trace.
- B. Analyze VPC flow logs along the path of the request.
- C. Investigate the Liveness and Readiness probes for each service.
- D. Create a Dataflow pipeline to analyze service metrics in real time.

Answer: D

NEW QUESTION # 47

You support a Node.js application running on Google Kubernetes Engine (GKE) in production. The application makes several HTTP requests to dependent applications. You want to anticipate which dependent applications might cause performance issues. What should you do?

- A. Instrument all applications with Stackdriver Profiler.
- **B. Instrument all applications with Stackdriver Trace and review inter-service HTTP requests.**
- C. Modify the Node.js application to log HTTP request and response times to dependent applications. Use Stackdriver Logging to find dependent applications that are performing poorly.
- D. Use Stackdriver Debugger to review the execution of logic within each application to instrument all applications.

Answer: B

NEW QUESTION # 48

You support an application running on App Engine. The application is used globally and accessed from various device types. You want to know the number of connections. You are using Stackdriver Monitoring for App Engine. What metric should you use?

- A. tcp_ssl_proxy/open_connections
- B. flex/connections/current
- **C. flex/instance/connections/current**
- D. tcp_ssl_proxy/new_connections

Answer: C

NEW QUESTION # 49

.....

VCEngine has many Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) practice questions that reflect the pattern of the real Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) exam. VCEngine allows you to create a Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) exam dumps according to your preparation. It is easy to create the Google Professional-Cloud-DevOps-Engineer Practice Questions by following just a few simple steps. Our Google Cloud Certified - Professional Cloud DevOps Engineer Exam (Professional-Cloud-DevOps-Engineer) exam dumps are customizable based on the time and type of questions.

Latest Professional-Cloud-DevOps-Engineer Exam Bootcamp: <https://www.vceengine.com/Professional-Cloud-DevOps-Engineer-vce-test-engine.html>

We can make solemn commitment that our Professional-Cloud-DevOps-Engineer study materials have no mistakes, Cloud DevOps Engineer Professional-Cloud-DevOps-Engineer real dumps at Cloud DevOps Engineer-Dumps are updated regularly as well in line with the latest Cloud DevOps Engineer Professional-Cloud-DevOps-Engineer exam and gives you success in Professional-Cloud-DevOps-Engineer exam, You can try the free demo version of any Google Cloud Certified - Professional Cloud DevOps Engineer Exam Professional-Cloud-DevOps-Engineer exam dumps format before buying, We are also providing guaranteed success and after using Professional-Cloud-DevOps-Engineer practice exam questions, you will be able to clear the Google Professional-Cloud-DevOps-Engineer test on the first attempt.

How do I mathematically represent a digital Professional-Cloud-DevOps-Engineer frequency, At the end of his sophomore year, a friend back at Business Careerstold him about a couple of instructors who Professional-Cloud-DevOps-Engineer Exam Discount Voucher were doing a great job helping students obtain professional IT certifications.

TOP Professional-Cloud-DevOps-Engineer Study Group: Google Cloud Certified - Professional Cloud DevOps Engineer Exam - Trustable Google Latest Professional-Cloud-DevOps-Engineer Exam Bootcamp

We can make solemn commitment that our Professional-Cloud-DevOps-Engineer Study Materials have no mistakes, Cloud DevOps Engineer Professional-Cloud-DevOps-Engineer real dumps at Cloud DevOps Engineer-Dumps are updated regularly as well in line with the latest Cloud DevOps Engineer Professional-Cloud-DevOps-Engineer exam and gives you success in Professional-Cloud-DevOps-Engineer exam.
