The VMware Cloud Operations 8.x Professional V2 (2V0-32.24) certification is a valuable credential that every VMware professional should earn it. The VMware 2V0-32.24 certification exam offers a great opportunity for beginners and experienced professionals to demonstrate their expertise. With the VMware Cloud Operations 8.x Professional V2 (2V0-32.24) certification exam everyone can upgrade their skills and knowledge. There are other several benefits that the 2V0-32.24 Exam holders can achieve after the success of the VMware Cloud Operations 8.x Professional V2 (2V0-32.24) certification exam. However, you should keep in mind to pass the VMware 2V0-32.24 certification exam is not an easy task. It is a challenging job.

VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details

Topic 1	• VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.
Topic 2	• Administrative and Operational Tasks: This section of the exam measures skills of Cloud Administrators and covers daily operational tasks such as content and environment management in vRealize Suite Lifecycle Manager. It also includes managing licensing, alert systems, dashboards, metrics, cost assessments, capacity optimization, workload planning, and system monitoring. Additionally, it explores access control, patching, and retention settings in vRealize Log Insight, ensuring ongoing operational excellence across VMware tools.
Topic 3	• Installing, Configuring, and Setting Up: This section of the exam measures skills of Implementation Specialists and covers the end-to-end setup process for vRealize Suite Lifecycle Manager, vRealize Operations, and Log Insight. It includes prerequisites, installation steps (manual and automated), identity and access configuration, environment settings, data sources, content packs, and system integrations to enable a functional cloud management platform.
Topic 4	• Planning and Designing: This section of the exam measures the skills of Cloud Architects and covers the architectural models and sizing requirements for vRealize Operations and vRealize Log Insight. It evaluates the ability to choose between standalone, clustered, and high-availability setups, and to plan appropriately based on scenario-based requirements for capacity and deployment type, ensuring well-designed cloud solutions.
Topic 5	• Troubleshooting and Repairing: This section of the exam measures skills of Support Engineers and covers the diagnosis and resolution of common performance and configuration issues in vRealize Operations, Log Insight, and Lifecycle Manager. It also includes cluster management options, log bundle generation, password handling, and changing authentication settings, equipping professionals to ensure system reliability.
Topic 6	• Architecture and Technologies: This section of the exam measures the skills of Cloud Architects and covers the core differences between VMware Cloud Management offerings, focusing on SaaS versus on-premises deployments. It introduces the capabilities of vRealize Suite Lifecycle Manager, vRealize Operations, and vRealize Log Insight, helping professionals understand the foundational technologies that support VMware's cloud ecosystem.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q26-Q31):

NEW QUESTION # 26
An administrator has added Microsoft Azure as a data source in vRealize Operations.
Which is the minimal time interval that is supported for data collection?

- A. 1 minute
- B. 5 minutes
- C. 10 minutes
- D. 30 minutes

Answer: D

Explanation:
When Microsoft Azure is added as a data source in vRealize Operations, the minimal supported time interval for data collection is 30 minutes. This is the smallest interval at which data can be retrieved from Azure, ensuring that performance and resource utilization data is gathered at regular intervals for monitoring and analysis.

NEW QUESTION # 27

Which three features are available in vRealize Log Insight? (Choose three.)

- A. Application Discovery Dashboard
- B. Interactive Analytics
- C. Use of Remote Collectors
- D. Management Pack Marketplace
- E. Event Forwarding
- F. Machine Learning Analytics

Answer: B,C,E

Explanation:
Interactive Analytics: vRealize Log Insight provides an interactive analytics interface that allows users to search, query, and visualize log data in real time.
Use of Remote Collectors: Remote Collectors in vRealize Log Insight allow logs to be collected from remote locations and forwarded to the central vRLI instance for processing.
Event Forwarding: vRealize Log Insight supports event forwarding, enabling the forwarding of log data to other systems or central servers, which helps with centralized log management.

NEW QUESTION # 28
An administrator needs to deploy a 3-node High Availability cluster of vRealize Operations using custom CA- signed certificates. An existing vRealize Operations development environment has previously been deployed using vRealize Suite Lifecycle Manager. Which method should the Administrator use to complete this objective?

- A. Deploy vRealize Operations analytics cluster using Command Line Interface.
- B. Deploy vRealize Operations analytics cluster using vRealize Suite Lifecycle Manager.
- C. Deploy 3 nodes independently, replace certificates and then form the 3-node cluster.
- D. Deploy a single node cluster at the begining to further expand it to 3 nodes in the next step.

Answer: B

Explanation:
To deploy a 3-node High Availability cluster of vRealize Operations with custom CA-signed certificates, the best approach is to use vRealize Suite Lifecycle Manager (vRSLCM). Since vRSLCM has already been used in the existing vRealize Operations development environment, it simplifies the deployment process for a 3- node cluster, allowing for easy management of certificates and cluster configuration.
Using vRSLCM allows for the configuration of custom CA-signed certificates during the deployment, and it supports the creation of the necessary cluster nodes in a seamless manner. This ensures that the HA configuration is maintained and the custom certificates are applied properly across all nodes.

NEW QUESTION # 29
An administrator updated the alert and symptom definitions. The administrator now wants to complete an upgrade to the latest version of vRealize Operations.
Which two actions can be done to preserve the customized content? (Choose two.)

- A. Select the checkbox 'Reset Default Content' when performing the upgrade
- B. Backup the customized content by cloning it
- C. Import your custom content
- D. Backup the customized content as a YAML file
- E. Select the checkbox 'Preserve Custom Content" when performing the upgrade

Answer: B,E

Explanation:
Select the checkbox 'Preserve Custom Content' when performing the upgrade: During the upgrade process, you can select the "Preserve Custom Content" option to ensure that any custom content, including alerts and symptoms, is retained during the upgrade to the latest version of vRealize Operations.
Backup the customized content by cloning it: Before upgrading, it's a good practice to backup customized content by cloning it. This ensures that you have a copy of the custom configurations in case they are lost or need to be restored after the upgrade.

NEW QUESTION # 30

An administrator has been tasked with optimizing capacity and overall performance in their existing virtual infrastructure.

How can the capabilities of vRealize Operations help complete this task?

- A. It enforces IT regulatory standards, integrated compliance, and automated drift remediation.
- B. It adjusts the queue depth for datastores presented by storage arrays.
- C. It automatically migrates virtual machines into a public cloud.
- D. It determines recommendations for oversized and undersized virtual machines.

Answer: D

Explanation:
vRealize Operations provides capacity optimization by analyzing the performance of virtual machines (VMs) in the environment. It identifies recommendations for resizing VMs that are either oversized (underutilized resources) or undersized (resources being overutilized), ensuring more efficient resource allocation. This helps optimize overall capacity and performance in the virtual infrastructure.
