Accurate ADA-C01 Answers, Valid Exam ADA-C01 Book

P.S. Free 2026 Snowflake ADA-C01 dumps are available on Google Drive shared by FreeCram: https://drive.google.com/open?id=1WtedumgF96HLVr3Tw-iQR2Nvs6dbFYjE

With ADA-C01 guide torrent, you can easily pass professional qualification exams of various industries, even if you are not a college graduate, and you have never come into contact with this professional knowledge. With ADA-C01 exam torrent, you can also quickly get started, easily grasp the key points of the exam, and gain access to well-known companies. ADA-C01 Guide Torrent helps you to use the least time to get the maximum improvement. With our ADA-C01 certification training, you pay for money, but you can get time and knowledge that money cannot buy.

For candidates who preparing for the exam, knowing the latest information for the exam is quite necessary. ADA-C01 exam cram of us can offer free update for 365 days for you, and we have skilled professionals examine the update every day, once we have the update version, we will send you the first time. ADA-C01 training materials is not only high-quality, but also contain certain quantity, therefore they will be enough for you to pass the exam. We have a professional service team, and the service staffs have professional knowledge for ADA-C01 Exam Materials, if you have any questions, you can consult us.

SnowPro Advanced Administratorlatest test questions & ADA-C01 reliable braindumps & SnowPro Advanced Administratorfree practice dumps

Our product backend port system is powerful, so it can be implemented even when a lot of people browse our website can still let users quickly choose the most suitable for his ADA-C01 learning materials, and quickly completed payment. It can be that the process is not delayed, so users can start their happy choice journey in time. Once the user finds the learning material that best suits them, only one click to add the ADA-C01 learning material to their shopping cart, and then go to the payment page to complete the

payment, our staff will quickly process user orders online.

Snowflake SnowPro Advanced Administrator Sample Questions (Q44-Q49):

NEW QUESTION # 44
A Snowflake Administrator created a role ROLE_MANAGED_ACCESS and a schema SCHEMA_MANAGED_ACCESS as follows:
USE ROLE SECURITYADMIN;
CREATE ROLE ROLE_MANAGED_ACCESS;
GRANT ROLE ROLE_MANAGED_ACCESS TO ROLE SYSADMIN;
GRANT USAGE ON WAREHOUSE COMPUTE_WH TO ROLE ROLE_MANAGED_ACCESS;
GRANT ALL privileges ON DATABASE WORK TO ROLE ROLE_MANAGED_ACCESS;
USE ROLE ROLE_MANAGED_ACCESS;
CREATE SCHEMA SCHEMA_MANAGED_ACCESS WITH MANAGED ACCESS;
USE ROLE SECURITYADMIN;
GRANT SELECT, INSERT ON FUTURE TABLES IN SCHEMA SCHEMA MANAGED ACCESS to
ROLE_MANAGED_ACCESS; The Administrator now wants to disable the managed access on the schema.
How can this be accomplished?

- A. USE ROLE ROLE_MANAGED_ACCESS;
  DROP SCHEMA WORK. SCHEMA MANAGED_ACCESS;
  CREATE SCHEMA SCHEMA_MANAGED_ACCESS WITHOUT MANAGED ACCESS;
  Then recreate all needed objects.
- B. REVOKE SELECT, INSERT ON FUTURE TABLES IN SCHEMA SCHEMA_MANAGED_ACCESS FROM
  ROLE_MANAGED_ACCESS; ALTER SCHEMA SCHEMA MANAGED ACCESS DISABLE MANAGED ACCESS;
- C. USE ROLE ROLE MANAGED_ACCESS;
  DROP SCHEMA WORK. SCHEMA_MANAGED_ACCESS;
  CREATE SCHEMA SCHEMA_MANAGED_ACCESS;
  Then recreate all needed objects.
- D. ALTER SCHEMA SCHEMA MANAGED ACCESS DISABLE MANAGED ACCESS;

Answer: D

Explanation:
According to the Snowflake documentation1, you can change a managed access schema to a regular schema using the ALTER SCHEMA statement with the DISABLE MANAGED ACCESS keywords. This will disable the managed access feature on the schema and revert the access control to the default behavior. Option B is incorrect because dropping and recreating the schema will also delete all the objects and metadata in the schema, which is not necessary to disable the managed access. Option C is incorrect because revoking the privileges on the future tables from the role is not required to disable the managed access. Option D is incorrect because there is no WITHOUT MANAGED ACCESS option in the CREATE SCHEMA statement.

NEW QUESTION # 45
A Snowflake account is configured with SCIM provisioning for user accounts and has bi-directional synchronization for user identities. An Administrator with access to SECURITYADMIN uses the Snowflake UI to create a user by issuing the following commands:
use role USERADMIN;
create or replace role DEVELOPER_ROLE;
create user PTORRES PASSWORD = 'hello world!' MUST_CHANGE_PASSWORD = FALSE default_role =
DEVELOPER_ROLE; The new user named PTORRES successfully logs in, but sees a default role of PUBLIC in the web UI.
When attempted, the following command fails:
use DEVELOPER_ROLE;
Why does this command fail?

- A. The DEVELOPER_ROLE needs to be granted to SYSADMIN before user PTORRES will be able to use the role.
- B. The new role can only take effect after USERADMIN has logged out.
- C. USERADMIN needs to explicitly grant the DEVELOPER_ROLE to the new USER.
- D. The new role will only take effect once the identity provider has synchronized by way of SCIM with the Snowflake account.

Answer: C

Explanation:

According to the Snowflake documentation1, creating a user with a default role does not automatically grant that role to the user. The user must be explicitly granted the role by the role owner or a higher-level role. Therefore, the USERADMIN role, which created the DEVELOPER_ROLE, needs to explicitly grant the DEVELOPER_ROLE to the new user PTORRES using the GRANT ROLE command. Otherwise, the user PTORRES will not be able to use the DEVELOPER_ROLE and will see the default role of PUBLIC in the web UI. Option A is incorrect because the DEVELOPER_ROLE does not need to be granted to SYSADMIN before user PTORRES can use the role. Option B is incorrect because the new role can take effect immediately after it is created and granted to the user, and does not depend on the USERADMIN role logging out. Option D is incorrect because the new role will not be affected by the identity provider synchronization, as it is created and managed in Snowflake.

NEW QUESTION # 46

A Snowflake organization MYORG consists of two Snowflake accounts:

Account Name	Snowflake Region	Snowflake Edition
ACCOUNT1	AWS_EU_WEST_2	ENTERPRISE
ACCOUNT2	AZURE_WESTEUROPE	STANDARD

The ACCOUNT1 has a database PROD_DB and the ORGADMIN role enabled.
Management wants to have the PROD_DB database replicated to ACCOUNT2.
Are there any necessary configuration steps in ACCOUNT1 before the database replication can be configured and initiated in ACCOUNT2?

- A. It is not possible to replicate a database from an Enterprise edition Snowflake account to a Standard edition Snowflake account.
- B. No configuration steps are necessary in ACCOUNT1. Replicating databases across accounts within the same Snowflake organization is enabled by default.
- C. USE ROLE ORGADMIN;
  SELECT SYSTEMSGLOBAL_ACCOUNT_SET_PARAMETER ('MYORG. ACCOUNT1',
  'ENABLE_ACCOUNT_DATABASE_REPLICATION', 'TRUE');
  SELECT SYSTEMSGLOBAL_ACCOUNT_SET_PARAMETER ('MYORG. ACCOUNT2',
  'ENABLE_ACCOUNT_DATABASE_REPLICATION', 'TRUE');
  USE ROLE ACCOUNTADMIN;
  ALTER DATABASE PROD DB ENABLE REPLICATION TO ACCOUNTS MYORG. ACCOUNT2;
- D. USE ROLE ORGADMIN;
  SELECT SYSTEMSGLOBAL ACCOUNT SET_PARAMETER ('MYORG. ACCOUNT1',
  'ENABLE_ACCOUNT_DATABASE_REPLICATION', 'TRUE');
  USE ROLE ACCOUNTADMIN;
  ALTER DATABASE PROD_DB ENABLE REPLICATION TO ACCOUNTS MYORG. ACCOUNT2
  IGNORE EDITION CHECK;

Answer: D

Explanation:
Explanation
According to the Snowflake documentation1, database replication across accounts within the same organization requires the following steps:
*Link the accounts in the organization using the ORGADMIN role.
*Enable account database replication for both the source and target accounts using the SYSTEM$GLOBAL_ACCOUNT_SET_PARAMETER function.
*Promote a local database to serve as the primary database and enable replication to the target accounts using the ALTER DATABASE ... ENABLE REPLICATION TO ACCOUNTS command.
*Create a secondary database in the target account using the CREATE DATABASE ... FROM SHARE command.
*Refresh the secondary database periodically using the ALTER DATABASE ... REFRESH command.
Option A is incorrect because it does not include the step of creating a secondary database in the target account. Option C is incorrect because replicating databases across accounts within the same organization is not enabled by default, but requires enabling account database replication for both the source and target accounts. Option D is incorrect because it is possible to replicate a database from an Enterprise edition Snowflake account to a Standard edition Snowflake account, as long as the IGNORE EDITION CHECK option is used in the ALTER DATABASE ... ENABLE REPLICATION TO ACCOUNTS command2.
Option B is correct because it includes all the necessary configuration steps in ACCOUNT1, except for creating a secondary

database in ACCOUNT2, which can be done after the replication is enabled.

NEW QUESTION # 47

What roles can be used to create network policies within Snowflake accounts? (Select THREE).

- A. SYSADMIN
- B. ORGADMIN
- C. Any role that owns the database where the network policy is created
- D. Any role with the global permission of CREATE NETWORK POLICY
- E. ACCOUNTADMIN
- F. SECURITYADMIN

Answer: D,E,F

Explanation:
Network policies are used to restrict access to the Snowflake service and internal stages based on user IP address1. To create network policies, a role must have the global permission of CREATE NETWORK POLICY2. By default, the system-defined roles of SECURITYADMIN and ACCOUNTADMIN have this permission3. However, any other role can be granted this permission by an administrator4. Therefore, the answer is B, C, and E. The other options are incorrect because SYSADMIN and ORGADMIN do not have the CREATE NETWORK POLICY permission by default3, and network policies are not tied to specific databases5.

NEW QUESTION # 48

What are characteristics of data replication in Snowflake? (Select THREE).

- A. Replication can only occur within the same cloud provider.
- B. Users must be granted REPLICATIONADMIN privileges in order to enable replication.
- C. The ALTER DATABASE ... ENABLE REPLICATION TO ACCOUNTS command must be issued from the primary account.
- D. Databases created from shares can be replicated.
- E. Users can have unlimited primary databases and they can be replicated to an unlimited number of accounts if all accounts are within the same organization.
- F. To start replication run the ALTER DATABASE ... REFRESH command on the account where the secondary database resides.

Answer: C,D,E

Explanation:
* Option A is correct because the ALTER DATABASE ... ENABLE REPLICATION TO ACCOUNTS command must be issued from the primary account that owns the database to be replicated1.
* Option B is incorrect because users must be granted REPLICATIONGRANTER privileges in order to enable replication1.
* Option C is incorrect because to start replication, the ALTER DATABASE ... REFRESH command must be run on the primary database, not the secondary database1.
* Option D is incorrect because replication can occur across different cloud providers, as well as across regions2.
* Option E is correct because databases created from shares can be replicated, as long as the share is active and the database is not dropped or altered1.
* Option F is correct because users can have unlimited primary databases and they can be replicated to an unlimited number of accounts if all accounts are within the same organization1.

NEW QUESTION # 49

......

It is universally accepted that the exam is a tough nut to crack for the majority of candidates, but the related ADA-C01 certification is of great significance for workers in this field so that many workers have to meet the challenge. Fortunately, you need not to worry about this sort of question any more, since you can find the best solution in this website--our ADA-C01 Training Materials. We will send the latest version of our ADA-C01 training materials to our customers for free during the whole year after purchasing. Last but not least, our worldwide after sale staffs will provide the most considerate after sale service for you in twenty four hours a day, seven days a week.
