Use Latest Nutanix NCP-US Dumps For Smooth Preparation

Our evaluation system for NCP-US test material is smart and very powerful. First of all, our researchers have made great efforts to ensure that the data scoring system of our NCP-US test questions can stand the test of practicality. Once you have completed your study tasks and submitted your training results, the evaluation system will begin to quickly and accurately perform statistical assessments of your marks on the NCP-US Exam Torrent. You only need to spend 20 to 30 hours on practicing and consolidating of our NCP-US learning material, you will have a good result. After years of development practice, our NCP-US test torrent is absolutely the best. You will embrace a better future if you choose our NCP-US exam materials.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q17-Q22):

NEW QUESTION # 17

While creating a replication rule for a bucket, an administrator finds that the Object Store drop-down option under the Destination section shows an empty list. Which two conditions explain possible causes for this issue? (Choose two.)

- A. The deployment of the Object Store is not in a running state.
- B. The logged-in user does not have permissions to view the Object Store.
- C. The deployment of the Object Store is not in a Complete state.
- D. The Remote site has not been configured in the Protection Group.

Answer: A,B

NEW QUESTION # 18

A corporate compliance team has asked an administrator to stop using default passwords in the environment. The administrator needs to update the password used on the FSVM.

In which order should the administrator change the FSVM's default password?

Task Step

Step 1

Step 2

step 3

Step 4

Select

Log onto a file server VM via SSH

Change the password

Respond to the prompts, providing the current and new Nutanix user password Repeat the steps on the remaining FSVMs A company decided to switch their existing Windows file server to a new Files instance. After successfully deploying Files, an administrator now needs to plan to reduce the impact of any potential outage. As the source file server resides across the WAN from the destination file server over an unreliable network connection.

The administrator needs to ensure there is minimal impact to data already copied, should a network outage occur.

How should the administrator meet this requirement?

- A. Check where the data copy failed and restart from that location.
- B. use rsync in incremental copy mode.
- C. use Microsoft DFS-R to replicate the files.
- D. use a method allowing files to be copied in restartable mode.

Answer: D

Explanation:

Task Step Step 1 Step 2 step 3 Step 4 Select Log onto a file server VM via SSH Change the password Respond to the prompts, providing the current and new Nutanix user password Repeat the steps on the remaining FSVMs

NEW QUESTION # 19

An administrator is tasked with deploying a Microsoft Server Failover Cluster for a critical application that uses shared storage.

The failover cluster instance will consist of VMs running on an AHV-hosted cluster and bare metal servers for maximum resiliency.

What should the administrator do to satisfy this requirement?

- A. Create a Bucket with Objects.
- B. Provision a Volume Group with Volume.
- C. Provision a new Storage Container.
- D. Create an SMB Share with Files.

Answer: B

NEW QUESTION # 20

An administrator is in the process of migrating shares from one Nutanix Files cluster in the primary data center (DC) to another Files cluster running in a new DC that has been built. The administrator is using Smart DR to perform this migration as it provides less downtime. Upon a successful sync during a scheduled maintenance window, users are unable to save to the new share. How should the administrator resolve the issue?

- A. Set share type to multiprotocol
- B. Set share read-only to false

- C. Enable Self-Service Restore
- D. Enable Continuous Availability

Answer: B

NEW QUESTION # 21

An administrator has mapped a Volume Group named VG1 to a VM. Due to changes in the application running inside the VM, two additional volumes are required. At the time of creation, the VM was assigned to a Protection Domain named PDI. Which two steps should the administrator take to add the additional volumes to the VM while maintaining data protection? (Choose two.)

- A. Add two additional vDisks to VG1.
- B. Manually update PD1 to include the newly created vDisks.
- C. Map the new vDisks as volumes to the VM.
- D. Add the new vDisks to the same Consistency Group.

Answer: A,D

Explanation:

To add additional volumes to a VM that is mapped to a VG, you need to add more vDisks to that VG1. vDisks are virtual disks that reside on Storage Containers².

To maintain data protection for a VM that is assigned to a Protection Domain (PD), you need to add any new vDisks to the same Consistency Group (CG) as the existing ones³. A CG is a subset of entities in a PD that are snapshotted in a crash-consistent manner².

NEW QUESTION # 22

.....

Just as an old saying goes, it is better to gain a skill than to be rich. Contemporarily, competence far outweighs family backgrounds and academic degrees. One of the significant factors to judge whether one is competent or not is his or her NCP-US certificates. Generally speaking, NCP-US certificates function as the fundamental requirement when a company needs to increase manpower in its start-up stage. In this respect, our NCP-US practice materials can satisfy your demands if you are now in preparation for a NCP-US certificate.
