免費下載ITIL4-DPI考題 - ITIL4-DPI PDF

IT行業中很多雄心勃勃的專業人士為了在IT行業中能更上一層樓, 離IT頂峰更近一步, 都會選擇ITIL ITIL4-DPI這個難度較高的認證考試來獲取通認證證書從而獲得行業認可。ITIL ITIL4-DPI 的難度比較高所以通過率也比較低。

但是報名參加ITIL ITIL4-DPI 認證考試是個明智的選擇，因為在如今競爭激烈的IT行業應該要不斷的提升自己。但是您可以選擇很多方式幫你通過考試。

最新的 ITIL 4 Strategist ITIL4-DPI 免費考試真題 (Q32-Q37):

問題 #32

A service provider has a small technical support team, who are based in a remote location and provide support to a critical service. The support group have a reputation for providing excellent service. Head office, who control budget decisions, are implementing an improvement project for the service.

What should the service provider do FIRST to identify the support team's involvement in the project?

- A. Use the same method of communication as agreed with all project stakeholders
- B. Inform the support team that they will receive regular email updates
- C. Initiate a discussion with the support group to understand their preferred method of communication
- D. Agree a method for involving the support team in financial decisions

答案: C

解題說明:

DPI's OCM guidance emphasizes engaging stakeholders early and ensuring communication methods are tailored to their needs. By first discussing preferred communication methods with the remote support team (B), the organization ensures their active involvement and reduces the risk of disengagement. Option A is one-way communication. Option C is irrelevant (they don't make financial decisions). Option D assumes one-size-fits-all, which contradicts DPI's principle of stakeholder-specific communication. (Reference: ITIL 4 Strategist DPI, section on "OCM - stakeholder engagement and communication planning")

問題 #33

An internal service provider is creating a business case to justify the purchase of a new service management toolset. The business case includes several options from multiple vendors.

Which is MOST important to include in the business case?

- A. A description of how the guiding principles will be used to implement the toolset
- B. The techniques used to develop the service provider's strategy
- C. The risks to the toolset vendors of not selecting their product
- D. An evaluation of organizational constraints on the use of the toolset

答案: D

解題說明:

DPI explains that a business case must include an evaluation of constraints (financial, technical, cultural, and organizational) that might affect adoption of the solution. This ensures feasibility and realistic planning.

Option A (strategy techniques) is irrelevant here. Option B is vendor-focused, not organizational. Option D (guiding principles) supports implementation but is not central to justifying the case.

(Reference: ITIL 4 Strategist DPI, section on "Business cases - evaluating options and constraints")

問題 #34

Which concept or activity involves reviewing data to identify what is working well and what needs to be done differently?

- A. Improvement
- B. Planning
- C. Vision
- D. Direction

答案: A

解題說明:

The continual improvement model in ITIL DPI explicitly requires reviewing data and performance outcomes to determine what is successful and what requires adjustment. This is the essence of improvement—using measurement and feedback to guide future action. Direction (A) and vision (D) are long-term guiding elements, while planning (B) organizes work. Only improvement is about data-driven reflection and adaptation.

(Reference: ITIL 4 Strategist DPI, section on "Continual improvement model - steps to evaluate and adapt")

問題 #35

A service provider has established the success factor of "improved availability of wi-fi service." Using the SMART model, which is the BEST key performance indicator to use to measure this?

- A. 5% increase in user satisfaction scores for the wi-fi service
- B. Increase in wi-fi service reliability by the end of quarter 2
- C. 10% increase in resolution of wi-fi incidents within target time by the end of quarter 3
- D. 5% reduction in number of complaints to the service desk by the end of the year

答案： C

解題說明：

SMART KPIs must be Specific, Measurable, Achievable, Relevant, and Time-bound. Option A is specific to wi-fi availability, measurable (10% increase), achievable, relevant, and time-bound (by end of Q3). Options B and C measure perceptions (complaints/satisfaction) but are indirect. Option D lacks a measurable percentage or defined metric. DPI stresses that success factors should be measured by clear, objective performance outcomes, not just subjective satisfaction.

(Reference: ITIL 4 Strategist DPI, section on "Defining and measuring critical success factors and KPIs")

問題 #36

An organization is mapping a value stream for an IT service. In the current map, the same activity is repeated multiple times. When identifying opportunities to remove waste from the value streams, it has been determined that several days could be removed from the delivery time by eliminating repeated work.

What is this an example of?

- A. Optimizing a workflow through the organization
- B. Cascading goals through the organization
- C. Building value chains on effective practices
- D. Establishing clear objectives for assessments

答案： A

解題說明：

In DPI, value stream mapping identifies bottlenecks, redundancies, and delays. Eliminating repeated activities to save time is an example of workflow optimization (Option C). This reflects Lean principles embedded in DPI - improving flow, reducing waste, and enhancing efficiency. Cascading goals (A), effective practices (B), and objectives for assessments (D) are unrelated to workflow waste elimination.

(Reference: ITIL 4 Strategist DPI, section on "Value stream mapping - optimizing workflow and eliminating waste")

問題 #37
