#### NEW QUESTION # 41

An IT Manager is reviewing a feature comparison between their current on-premises IT monitoring tools and the OpsRamp AIOps platform.

Feature Comparison:

| Capability | Legacy Tools | OpsRamp (HPE SaaS) |

| : | : | : |

| Discovery & Monitoring | Manual, siloed by domain | Full-stack, hybrid cloud |

| Alerting | Static thresholds, high volume | AIOps-driven correlation |

| Remediation | Manual runbooks | Automated, policy-based |

| Management | Multiple, separate consoles | Unified, service-centric view | After reviewing the chart, the IT Manager states, "I'm concerned about alert fatigue. My team is overwhelmed with notifications, and they can't tell what's important." How should the sales professional use the information in the chart to address this specific objection?

- A. Explain that OpsRamp's full-stack discovery will find even more things to generate alerts for.
- **B. Highlight that OpsRamp uses AIOps to correlate events, suppressing noise and intelligently escalating only the root-cause incidents, thus reducing alert fatigue.**
- C. Emphasize that OpsRamp can automate the remediation of issues, so the alerts are less important.
