Only when you choose our NCP-MCA Guide Torrent will you find it easier to pass this significant NCP-MCA examination and have a sense of brand new experience of preparing the NCP-MCA exam.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q21-Q26):

NEW QUESTION # 21

An administrator needs to restore a snapshot from a VM running in AWS that was created with a single VM blueprint Within. which Calm tab should the administrator perform this task?

- A. Recovery
- B. Manage
- C. Snapshots

Answer: C

Explanation:

According to the Nutanix Calm documentation¹, the Snapshots tab allows the administrator to view, create, and restore snapshots of the VMs that are part of a blueprint. The Manage tab only shows the status and actions of the blueprint, and the Recovery tab is used for disaster recovery operations². References:

NEW QUESTION # 22

What option is included in the Macros Virtual Machine Common Properties?

- A. @@(calm_runbook_uid)@@
- **B. @@{calm_runbook_name}@@**
- C. @@{endpoint.index}@@
- D. @@(address)@@

Answer: B

Explanation:

The macro @@{calm_runbook_name}@@ is included in the Macros Virtual Machine Common Properties.

This macro provides the name of the runbook that is being executed, which is useful for referencing and logging purposes within tasks and scripts.

NEW QUESTION # 23

Within a Calm blueprint, which two actions can an administrator apply to a Service under the Guest Customization section? (Choose two.)

- A. Modify the base OS image
- **B. Apply a Sysprep file**
- C. Choose UEFI or Legacy BIOS
- **D. Apply a Cloudinit Script**

Answer: B,D

Explanation:

Within a Calm blueprint, an administrator can apply two actions to a Service under the Guest Customization section: Apply a Cloudinit Script and Apply a Sysprep file. These actions allow the administrator to customize the configuration and behavior of the virtual machines that are provisioned from the blueprint. A Cloudinit Script is a set of commands or scripts that run on Linux-based virtual machines during the boot process. A Sysprep file is a configuration file that specifies the Windows settings and options for the virtual machines.

These actions can be used to perform tasks such as setting the hostname, network configuration, user accounts, software installation, and more. References:

NEW QUESTION # 24

An administrator is tasked with setting up a Policy Engine for a Calm VM.

What information does the administrator require to complete this task?

- A. Private Key of the Calm VXL For the Scale-Out Calm VMU provide the private key of all VMs.
- B. Public key of the Calm VM. For the Scale-Out Calm VIVI, provide the public key of all VMs,

- C. Every Prism Central Virtual IP address to be managed by the policy engine for Calm.
- **D. Networking information for all devices to be managed by the policy engine for Calm.**

Answer: D

Explanation:

The policy engine is a single VM setup for the single or scale-out Prism Central. When you enable the policy engine for your Calm instance, a new VM is created and deployed for the policy engine. All you need is an available IP address that belongs to the same network as that of your Prism Central VM for the policy engine VM. You do not need to provide any public or private keys, or any Prism Central virtual IP addresses for this task. References: Nutanix Support & Insights, Calm on ESXi Deployment | Nutanix Community

NEW QUESTION # 25

What is required to enable Self-Service access for users?

- **A. Assigning RBAC roles**
- B. Configuring a scheduler job
- C. Uploading a VM Image
- D. Creating an Environment

Answer: A

Explanation:

To provide users with access to Nutanix Self-Service (formerly Calm), an administrator must configure Role- Based Access Control (RBAC) within the context of a Project.

Access to Self-Service is not global; it is defined at the Project level.1 An administrator must:

- * Add the user (or their Active Directory group) to a Project.
- * Assign a Role to that user within the project.
- * Project Admin: Full control over the project.2
- * Developer: Can create blueprints and applications.
- * Consumer: Can only launch blueprints available in the Marketplace.3
- * Operator: Can perform day-2 operations on existing applications.4

Without an assigned role in a project, a user cannot access the Self-Service portal features or view any blueprints.

NEW QUESTION # 26

.....

Provided you get the certificate this time with our NCP-MCA practice materials, you may have striving and excellent friends and promising colleagues just like you. It is also as obvious magnifications of your major ability of profession, so NCP-MCA practice materials may bring underlying influences with positive effects.
