最新版的1z0-071套裝，覆蓋大量的Oracle認證1z0-071考試知識點

Fast2test的Oracle專家團隊利用自己的知識和經驗專門研究了最新的短期有效的培訓方式，這個培訓方法對你們是很有幫助的，可以讓你們短期內達到預期的效果，特別是那些邊工作邊學習的考生，可以省時有不費力。選擇Fast2test的培訓資料你將得到你最想要的1z0-071培訓資料。

最新的 Oracle PL/SQL Developer Certified Associate 1z0-071 免費考試真題 (Q111-Q116):

問題 #111

Examine this statement, which executes successfully:

In which order are the rows displayed?

- A. Sorted by MAXSAL
- **B. sorted by DEPARTMENT_NAME and AVGSAL**
- C. sorted by DEPARTMENT_NAME
- D. sorted by DEPARTMENT_NAME and MAXSAL
- E. sorted by AVGSAL

答案: B

解題說明:

Since the statement seems to imply that a sort operation involving department names and an average salary (AVGSAL) was executed, the best logical inference, given typical SQL query behavior and assuming a typical structure, is:

* B. sorted by DEPARTMENT_NAME and AVGSAL: Generally, when SQL queries involve grouping and aggregation, the ORDER BY clause (if explicitly mentioned or implied in your statement details) would sort by the grouping column first (DEPARTMENT_NAME) and then by any aggregated column such as average salary (AVGSAL). This order ensures that within each department, the rows are sorted according to the average salary.

問題 #112

Which three statements are true regarding subqueries? (Choose three.)

- A. Only one column or expression can be compared between the main query and subquery.
- **B. Subqueries can contain GROUP BY and ORDER BY clauses.**
- C. Main query and subquery must get data from the same tables.
- **D. Multiple columns or expressions can be compared between the main query and subquery.**
- E. Subqueries can contain ORDER BY but not the GROUP BY clause.
- **F. Main query and subquery can get data from different tables.**

答案: B,D,F

解題說明:

<http://docs.oracle.com/javadb/10.6.2.1/ref/rrefsqlj13658.html>

問題 #113

Examine the description of the SALES table:

Name	Null?	Type
PRODUCT_ID	NOT NULL	NUMBER(10)
CUSTOMER_ID	NOT NULL	NUMBER(10)
TIME_ID	NOT NULL	DATE
CHANNEL_ID	NOT NULL	NUMBER(5)
PROMO_ID	NOT NULL	NUMBER(5)
QUANTITY_SOLD	NOT NULL	NUMBER(10,2)
PRICE		NUMBER(10,2)
AMOUNT_SOLD	NOT NULL	NUMBER(10,2)

The SALES table has 55,000 rows.

Examine this statement:

```
CREATE TABLE sales1 (prod_id, cust_id, quantity_sold, price)
AS
SELECT product_id, customer_id, quantity_sold, price
FROM sales
WHERE 1 = 1;
```

Which two statements are true?

- **A. SALES1 has NOT NULL constraints on any selected columns which had those constraints in the SALES table.**
- B. SALES1 has PRIMARY KEY and UNIQUE constraints on any selected columns which had those constraints in the SALES table.
- **C. SALES1 is created with no rows.**
- D. SALES1 is created with 55,000 rows.
- E. SALES1 is created with 1 row.

答案: A,C

問題 #114

Evaluate the following SQL statement:

```
SELECT product_name || 'it's not available for order'
FROM product_information
WHERE product_status = 'obsolete';
```

You received the following error while executing the above query:

ERROR

ORA-01756: quoted string not properly terminated

What would you do to execute the query successfully?

- A. Use Quote (q) operator and delimiter to allow the use of single quotation mark in the literal character string.
- B. Use escape character to negate the single quotation mark inside the literal character string in the SELECT clause.
- C. Do not enclose the character literal string in the SELECT clause within the single quotation marks.
- D. Enclose the literal character string in the SELECT clause within the double quotation marks.

答案： A

解題說明：

問題 #115

You and your colleague Andrew have these privileges on the EMPLOYEE_RECORDS table:

1. SELECT
2. INSERT
3. UPDATE
4. DELETE

You connect to the database instance and perform an update to some of the rows in EMPLOYEE_RECORDS, but don't commit yet.

Andrew connects to the database instance and queries the table

No other user are accessing the table

Which two statements are true at this point?

- A. Andrew will be unable to perform any INSERT, UPDATE or DELETE on the table
- B. Andrew will be able to see the changes you have made
- C. Andrew will be unable to see the changes you have made
- D. Andrew will be able to modify any rows in the table that have not been modified by your transaction
- E. Andrew will be able to SELECT from the table, but be unable to modify any existing rows.

答案： C,D

解題說明：

In Oracle Database, when a transaction is not committed, the changes it makes are not visible to other sessions.

This is due to Oracle's read consistency model, which means that Andrew will not be able to see the changes you have made until they are committed.

Option A is correct because, in Oracle, another session can modify rows that have not been locked by an uncommitted transaction.

Option C is incorrect because, as per Oracle's read consistency, the changes made by an uncommitted transaction are not visible to other users.

Option D is incorrect because Andrew can perform INSERT, UPDATE, or DELETE operations on the rows that you have not modified.

Option E is incorrect because, while Andrew will be able to SELECT from the table, he will still be able to modify rows that are not locked by your uncommitted update.
