Hot Reliable DEP-2025 Exam Sample | Latest Apple DEP-2025: Apple Deployment and Management Exam 100% Pass

You've seen us everywhere. Now see us like

NEVER BEFORE

كنت معنا دائمًا، لكن هذه المرة،
سترى شيئًا جديدًا تمامًا.

Furthermore, it is our set of DEP-2025 brain dumps that stamp your success with a marvelous score. The dumps include DEP-2025 study questions that likely to be set in real DEP-2025 exam. They provide you a swift understanding of the key points of DEP-2025 covered under the syllabus contents. Going through them enhances your knowledge to the optimum level and enables you to ace exam without any hassle. No need of running after unreliable sources such as free courses, online DEP-2025 courses for free and DEP-2025 dumps that do not ensure a passing guarantee to the DEP-2025 exam candidates.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 2	• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 3	• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.

Topic 4	• Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Topic 5	• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 6	• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 7	• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 8	• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 9	• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 10	• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 11	• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 12	• Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 13	• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.

DEP-2025 pass rate - DEP-2025 test online materials - Lead2pass pass test

In case there are any changes happened to the DEP-2025 exam, the experts keep close eyes on trends of it and compile new updates constantly so that our DEP-2025 exam questions always contain the latest information. It means we will provide the new updates of our DEP-2025 Study Materials freely for you later since you can enjoy free updates for one year after purchase. And you can free download the demos to check it by yourself.

Apple Deployment and Management Exam Sample Questions (Q122-Q127):

NEW QUESTION # 122
Where do you find a bypass code that's stored for organization-linked Activation Lock on an Apple device?

- A. In the user's Managed Apple Account
- B. In Apple Business Manager or Apple School Manager
- C. In the user's personal Apple Account

- D. In the MDM solution

Answer: D

Explanation:
When Activation Lock is enabled on a supervised Apple device, the organization needs a way to recover the device if a user leaves or forgets credentials. Apple Learning states that MDM can escrow and store abypass codefor Activation Lock. This code can then be used by IT administrators to unlock and reactivate the device without needing the original Apple ID. It is not stored in ABM/ASM, nor tied to the user's Managed Apple Account or personal Apple ID. Instead, it resides in the organization's MDM solution for controlled use. This ensures organizations can always return supervised devices to service while still maintaining theft deterrence against unauthorized users.
References:Apple Platform Deployment - "Activation Lock and MDM bypass codes."

NEW QUESTION # 123
What must you download from Apple Business Manager and then upload to MDM to configure Managed Distribution of apps?

- A. A public key certificate
- B. A private key certificate
- C. A device token
- D. A content token

Answer: D

Explanation:
A content token links app licenses to MDM for distribution. TheApple Business Manager User Guidestates,
"To configure Managed Distribution, download the content token from Apple Business Manager and upload it to your MDM server. This token authorizes the MDM to manage and distribute apps to enrolled devices."Options B, C, and D are unrelated to app distribution.

Apple Business Manager User Guide, "Apps and Books" section.
Mobile Device Management Protocol Reference, "App Management" section.

NEW QUESTION # 124
Which of these account roles in Apple Business Manager or Apple School Manager can enable federated authentication?

- A. People Manager
- B. Content Manager
- C. Authentication Manager
- D. Device Enrollment Manager

Answer: A

Explanation:
Apple defines strict roles and permissions for tasks in Apple Business Manager (ABM) and Apple School Manager (ASM). Federated Authentication requires elevated privileges, as it links your Apple deployment to an identity provider such as Microsoft Entra ID. According to Apple's learning guides, only the roles ofAdministrator and People Managercan enable and configure federated authentication. Other roles such as Content Manager or Device Enrollment Manager have no authority to make federation-level changes. This restriction ensures only trusted admins with organizational oversight can integrate Apple IDs with external identity systems, minimizing security risk and maintaining compliance.
References:Apple Business Manager User Guide - "Roles and privileges"; Apple Learning - "Federated Authentication."

NEW QUESTION # 125
What is true when you transfer licenses to another location in Apple Business Manager?

- A. You can transfer licenses even if they are currently assigned to devices.
- B. License transfers require approval for both the sending and receiving locations.
- C. Apple Business Manager installs the latest available version of macOS.
- D. Both the sending and receiving locations must be part of the same organization.

Answer: D

Explanation:
Licenses can only transfer within an organization. TheApple Business Manager User Guidestates, "Licenses can be transferred between locations, but both the sending and receiving locations must belong to the same organization in Apple Business Manager." Option D is false as licenses must be unassigned first.
References:
Apple Business Manager User Guide, "Manage Licenses" section.
Apple Platform Deployment Guide, "License Management" section.

NEW QUESTION # 126
What's required to unenroll a supervised device from an MDM solution?

- A. User acceptance
- B. A wipe command
- C. An Apple ID
- D. An administrator's approval

Answer: D

Explanation:
Unenrolling a supervised device from an MDM solution requires an administrator's approval, typically executed by removing the MDM profile via the MDM server. For supervised devices (via ADE or Apple Configurator), users cannot remove the profile themselves, ensuring organizational control. An Apple ID (option B) isn't required for unenrollment, though it may relate to Activation Lock. User acceptance (option C) isn't needed for supervised devices. A wipe command (option D) may accompany unenrollment but isn't mandatory. TheApple Platform Deployment Guideoutlines this process for supervised devices.
Reference:Apple Platform Deployment Guide(Chapter: Managing Enrollment).
