CTFL-AcT考試內容 | ISTQB Foundation Level - Acceptance Testing合法有效的通過利刃

選擇捷徑、使用技巧是為了更好地獲得成功。如果你想獲得一次就通過CTFL-AcT認證考試的保障，那麼PDFExamDumps的CTFL-AcT考古題是你唯一的、也是最好的選擇。這絕對是一個讓你禁不住讚美的考古題。你不可能找到比它更好的考試相關的資料了。這個考古題可以讓你更準確地瞭解考試的出題點，從而讓你更有目的地學習相關知識。另外，如果你實在沒有準備考試的時間，那麼你只需要記好這個考古題裏的試題和答案。因為這個考古題包括了真實考試中的所有試題，所以只是這樣你也可以通過考試。

ISQI CTFL-AcT (ISTQB 基礎級別 - 驗收測試) 認證考試是一個全球認可的軟件測試人員認證，專門針對接受測試方面的測試人員。此認證旨在測試接受測試領域測試人員的技能和知識，其涉及驗證軟件是否滿足用戶的需求和期望。CTFL-AcT 認證考試旨在確保測試人員擁有必要的技能和知識，能夠有效地計劃、設計、執行和報告接受測試活動。

最新的 ISTQB Foundation Level CTFL-AcT 免費考試真題 (Q45-Q50):

問題 #45

Which one of the following answers lists characteristic of quality in use according to the quality in use model defined in ISO 25010?

- A. Satisfaction
- B. Freedom of interference
- C. User experience
- D. Security

答案：A

解題說明:

According to ISO/IEC 25010:2011, the "Quality in Use" model includes characteristics that measure the system's impact on stakeholders during actual usage in a specific context.

The four main characteristics of Quality in Use are:

Effectiveness

Efficiency

Satisfaction

Freedom from Risk

Option C is correct because "Satisfaction" is one of the core quality-in-use characteristics and refers to the degree to which user needs are fulfilled in context.

Other options:

A (User experience) is a broader term not formally defined as a Quality in Use characteristic in ISO 25010.

B (Security) is part of the product quality model, not quality in use.

D (Freedom of interference) is not a defined term in ISO 25010; it may be a misstatement of "freedom from risk."

問題 #46

Which one of the following statements defines beta testing BEST?

- A. Beta testing takes place early in the development process to acquire feedback from the market.
- B. Beta testers discover defects in the product that escaped during the development process.
- C. Beta testing is performed by developers at the customer's location.
- D. During beta testing, genuine users define the acceptance criteria for various realistic configurations.

答案: B

問題 #47

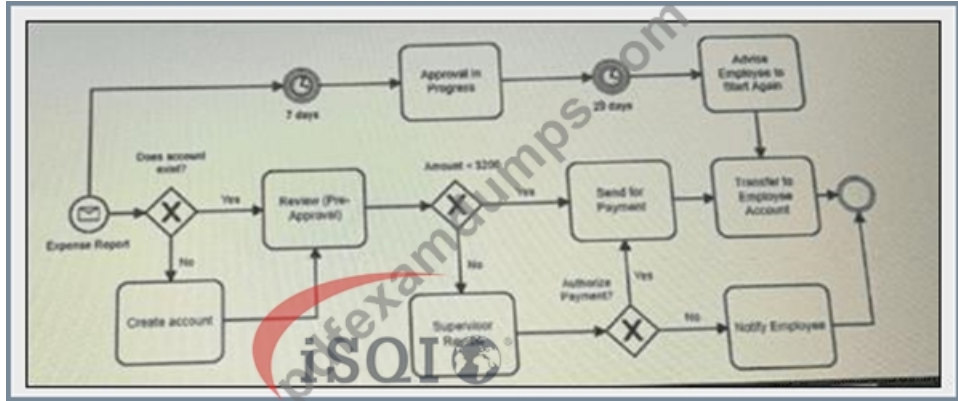

As a part of a travel expense reimbursement management system, the following business process is defined:

* After receipt of the expense report, a new account must be created if the employee does not already have one. The report is then reviewed.

* Amounts less than \$200 are automatically approved, while amounts equal to or greater than \$200 must be approved by the supervisor. If the request is rejected, the employee is informed. The employee is reimbursed by payment to his or her bank account.

* If the request is not processed within 7 days, the employee receives an "ongoing" e-mail. If the request is not completed within 30 days, then the process is stopped, and the employee receives a cancellation e-mail asking her/him to resubmit the refund request

The following BPMN model has been submitted for review Which of the following comments is MOST Likely to have been made on this BPMN model?

- A. The "Supervisor Review" activity should be positioned after the "Send for Payment" activity
- B. After "Advise Employee to Start Again" the flow should go to an "end" event
- C. This BPMN model is correct, so there should not be any review comments
- D. The second timing event should be "30 days" instead of "23 days"

答案: D

解題說明:

Comprehensive Detailed Explanation:

According to the scenario described in the question, the business process for expense reimbursement includes two key timing

constraints:

If the request is not processed within 7 days, an "ongoing" email is sent to the employee.

If the request is not completed within 30 days, the process is canceled and the employee is asked to resubmit the request.

However, in the BPMN model presented in the image, the second timing event (clock icon near "Approval in Progress") incorrectly shows 23 days instead of 30 days. This discrepancy misrepresents the actual business rule and violates the accuracy required in process modeling.

ISTQB Foundation Level Extension - Acceptance Testing syllabus and the Certified Tester Foundation Level Business Process Testing (CTFL-BAT) emphasize that a process model should correctly reflect the specified behavior, rules, and constraints of the business scenario. An incorrect timer can lead to miscommunication between stakeholders and incorrect automation or implementation logic.

Therefore, Option A is the most likely review comment since it directly points to this inconsistency in the model.

問題 #48

Which tool fits the mentioned acceptance test activities BEST?

- A. Model-based testing tools for managing incidents.
- **B. Business process management tools for modeling business processes and rules.**
- C. Test management and automation tools for business process model-based acceptance test generation.
- D. Requirements management tools for managing acceptance test execution campaigns.

答案： B

解題說明：

Acceptance testing often relies on understanding and validating business processes and business rules. These are typically visualized and documented using business process modeling techniques such as BPMN (Business Process Model and Notation) and decision tables (DMN - Decision Model and Notation).

Business Process Management (BPM) tools are specifically designed for modeling and managing such workflows and rules. These tools are commonly used during acceptance test design to align tests with business objectives and processes.

Option C is correct because it directly aligns with the use of business process modeling in acceptance testing activities.

Other options:

A is incorrect because requirements management tools are more focused on requirement traceability and prioritization, not managing test execution campaigns.

B confuses roles - test management/automation tools can assist with test generation, but "business process model-based" generation is more accurately linked to BPM or model-based testing tools.

D is incorrect - model-based testing tools are used for test case generation, not incident management.

C). Business process management tools for modeling business processes and rules.

問題 #49

How does ISTQB CTFL test activities relate to the IQBBA FL business analysis and requirements engineering activities?

- A. Business analysts who follow the IQBBA requirements engineering process will not be involved in designing test cases.
- **B. Test analysis and test design activities may result in changes of acceptance criteria.**
- C. The IQBBA solution evaluation phase precedes the ISTQB test implementation and test execution activities.
- D. Business analysts and tester have to decide, whether they follow the IQBBA or ISTQB lifecycle processes, because they exclude each other.

答案： B

問題 #50
