Pass Guaranteed Quiz PL-400 - High Hit-Rate Online Microsoft Power Platform Developer Bootcamps

Up to now, we have business connection with tens of thousands of exam candidates who adore the quality of our PL-400 exam

questions. Besides, we try to keep our services brief, specific and courteous with reasonable prices of PL-400 Study Guide. All your questions will be treated and answered fully and promptly. So as long as you contact us to ask for the questions on the PL-400 learning guide, you will get the guidance immediately.

Reason to prefer PL-400 Dumps of Certification Questions:

- It provides you with real PL-400 exam questions to let you practice in an exam-simulated environment. This is important because it will allow you to experience in advance how the certification test will be taken and help you gain confidence in your ability to pass.
- You can download the real PDF files of simulators, mock or practice exams from the dashboard of our user-friendly website as well as a mobile app, and can export them to your mobile devices easily.
- The questions have been scanned for the presence of any errors. These exam dumps guarantee success-driven results in few days, if candidates follow its formats, cover all subjects and attempt its practice test.
- The Test Engine software used to create the test is very advanced and gives a very realistic exam environment, which means that the candidate will get a better idea of what it will be like to take the actual certification test. Useable exam questions are the only thing that enables you to pass the PL-400 Exam.
- It is easy to use and gives you everything in one place. Queries are the only thing that you will need. Worry-free studying of the PL-400 exam questions. Search the questions you need, and start studying. According to history and the survey, the price of the premium is very low.

Microsoft Power Platform Developer Sample Questions (Q193-Q198):

NEW QUESTION # 193

You need to handle errors in UpdateRecord.js.

Which code segment should you add at line UR06?

- A. `catch(exception e){
console.WriteLine(e)}`
- B. `function (error){
console.log(error.message)}`
- C. `catch(error) {
alert("Caught error: " + error.message);}`
- D. `Exception exception = Server.GetLastError() ;
if(exception != null){`

Answer: C

Topic 3, Contoso Pharmaceuticals

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

Contoso Pharmaceuticals manufactures and sells drugs to retail and wholesale pharmacies, hospitals, and research facilities.

The company plans to implement Dynamics 365 Sales and Dynamics 365 Finance.

Current environment

Contoso maintains a Microsoft Excel workbook that lists all drugs they supply.

Pharmacies submit order requests through email.

All information at customer locations is handwritten by customer representatives.

Contoso uses Cerner, which is a medical industry application that uses a proprietary database.

Some accounts are referrals from other pharmacies.

Every pharmacy has its own Dynamics 365 Sales instance.

Requirements

General

Contoso wants to ensure that there is minimal custom code and custom connectors in the system.

Accounts

Ensure that the names of the pharmacies are synced between the accounting and the customer management systems.

Account numbers should be entered automatically into the pharmaceutical system that is in a Cerner database and kept in sync.

When the account is entered into the system, extra fields must appear if the referral customer box is selected. If the box is not selected, the extra fields must not appear.

A trigger must be created that changes the Priority field to 1 in the Account record 10 days after an Account record is created.

A field named Priority_Trigger must be created to trigger the Priority field.

A field named Facility type field must be added in order to select whether a customer is a retail pharmacy, wholesale pharmacy, research facility, or hospital.

Users

UserA must be able to create and publish Power Apps apps.

UserB must be the owner of all the systems and be able to provide permissions and create all new environments.

UserC must be able to create apps connected to the systems and update the security roles and entities.

Pharmacy representatives must only be able to run the apps and access their own records.

Access to the accounting Power Apps app must be restricted to accounting team members.

End users must have minimum access to the required systems.

Only supervisors must be able to view phone numbers in the Accounts form.

Developers must be able to create new apps for all users.

Sales users must only have access to their own records.

Reporting

Pharmacy orders must be displayed in four graphs as follows:

Annual revenue over \$100,000

Annual revenues under \$100,000

Research facilities

Hospitals

The graphs must be interactive, and users must be able to drill down on any dimension.

Customizations

Ensure that notifications are sent to the sales team when a lead is added by using Slack.

Ensure that leads have a review stage added to the sales process.

Doctors must be manually added to a custom entity named Doctor if the doctor is not listed.

Refill dates for customer prescriptions should be automatically determined and a notification should be sent to the customer.

Fields for the doctor's name and phone number must be displayed in the customer record.

The doctor entered on the customer's record must be validated against doctors that exist in the system.

The new solution will be sold to other pharmacies for use. The application must not allow changes to be made.

The solution must be error free so that when it is installed in other environments it does not cause issues.

A custom mobile app must be created to allow salespeople to add or search by pharmacy name.

Pharmacy records must be uniquely identified by pharmacy name, address, contact name, and phone number.

When a pharmacy is added by using the mobile app, the phone number must be validated to be all digits.

NEW QUESTION # 194

You are creating a business process flow for an organization's Request for Quote process.

You need to ensure that the business process flow meets the company's requirements.

Which components should you use? To answer, drag the appropriate components to the correct requirements.

Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes to scroll to view content. Select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Components	Requirement	Component
Step	The process starts with the receipt of the request for quote.	
Stage	Ensure that credit checks are performed for new users only.	
Custom control		
Branching condition	Merge all process paths into the main flow.	

Answer:

Explanation:

Components	Requirement	Component
Step	The process starts with the receipt of the request for quote.	Step
Stage	Ensure that credit checks are performed for new users only.	Branching condition
Custom control		
Branching condition	Merge all process paths into the main flow.	Stage

Explanation

Requirement	Component
The process starts with the receipt of the request for quote.	Step
Ensure that credit checks are performed for new users only.	Branching condition
Merge all process paths into the main flow.	Stage

Box 1: Step

Each step represents a field where data can be entered.

Stages tell you where you are in the process, while steps are action items that lead to a desired outcome.

Box 2: Branching condition

You can enhance a business process flow with branching. If you have the create permissions on business process flows, you'll be able to create business process flow with multiple branches by using the If-Else logic.

Box 3: Stage

Each stage contains a group of steps.

NEW QUESTION # 195

A company has a model-driven app.

A custom button on a form calls a JavaScript function that validates form data fields and creates a web basket. The JavaScript function then displays a message to the user.

Users are located in the United States, which uses ISO Code 1033, and France, which uses ISO Code 1036.

Users in France report that the message displays in English.

You need to modify the RibbonDiffXml file to ensure that messages appear in the user's language.

How should you complete the CommandDefinition node? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
<CommandDefinitions>
  <CommandDefinition Id= "GenerateBasket.Command">
    <Actions>
      <JavaScriptFunction FunctionName=" generatebasket"
Library="$webresource:mb_/scripts/basket.js">
        <
          Value="
          />
        <
          CrmParameter
          IntParameter
          StringParameter
        <
          1033
          1036
          OrgLcid
          UserLcid
        <
      </JavaScriptFunction>
    </Actions>
  </CommandDefinition>
</CommandDefinitions>
```

Answer:

Explanation:

```
<CommandDefinitions>
<CommandDefinition Id= "GenerateBasket.Command">
  <Actions>
    <JavaScriptFunction FunctionName=" generatebasket
library="$webresource:mb_/scripts/basket.js">
      <
        Value="
        />
      <
        CrmParameter
        IntParameter
        StringParameter
      <
        1033
        1036
        OrgLcid
        UserLcid
      <
    </JavaScriptFunction>
  </Actions>
</CommandDefinition>
</CommandDefinitions>
```

```

<CommandDefinitions>
  <CommandDefinition Id= "GenerateBasket.Command">
    <Actions>
      <JavaScriptFunction FunctionName=" generatebasket"
        Library="$webresource:mb_/scripts/basket.js">
        <
          <table border="1">
            <tr><td>▼</td><td>Value="</td><td>▼</td></tr>
            <tr><td>CrmpParameter</td><td>1033</td><td></td></tr>
            <tr><td>IntParameter</td><td>1036</td><td></td></tr>
            <tr><td>StringParameter</td><td>OrgLcid</td><td></td></tr>
            <tr><td></td><td>UserLcid</td><td></td></tr>
          </table>
        </JavaScriptFunction>
      </Actions>
    </CommandDefinition>
  </CommandDefinitions>

```

NEW QUESTION # 196

You are designing a one-way integration from Microsoft Dataverse to another system.

You must use an Azure Function to update the other system. The integration must send only newly created records to the other system. The solution must support scenarios where a component of the integration is unavailable for more than a few seconds to avoid data loss.

You need to design the integration solution.

Solution: Register a service endpoint in the Dataverse instance that connects to an Azure Service Bus queue.

Register a step at the endpoint which runs asynchronously on the record's Create message and in the post-operation stage.

Configure the Azure Function to process records as they are added to the queue.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: B

NEW QUESTION # 197

You need to use the Dynamics 365 Sales Web API to retrieve metadata information.

How should you complete the Web API queries? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Metadata item

Web API query

Entity

GET /api/data/v9.0/EntityDefinitions(

	▼	= 'account')
Name		
EntityName		
LogicalName		
SchemaName		

Attribute

GET /api/data/v9.0/EntityDefinitions(

	▼	= 'account')/Attributes(LogicalName=telephone1)
Name		
LogicalName		
SchemaName		
AttributeName		

Relationship

GET /api/data/v9.0/RelationshipDefinitions(

	▼	= 'Account_Tasks')
Name		
LogicalName		
SchemaName		
RelationshipName		

Global Option Set GET /api/data/v9.0/GlobalOptionSetDefinitions(

	▼	= 'metric_goalttype')
Name		
LogicalName		
SchemaName		
AttributeName		

Answer:

Explanation:

Answer Area

Metadata item	Web API query
Entity	<pre>GET /api/data/v9.0/EntityDefinitions(</pre> = 'account') Name EntityName LogicalName SchemaName
Attribute	<pre>GET /api/data/v9.0/EntityDefinitions(</pre> = 'account')/Attributes(LogicalName=telephone1) Name LogicalName SchemaName AttributeName
Relationship	<pre>GET /api/data/v9.0/RelationshipDefinitions(</pre> = 'Account_Tasks') Name LogicalName SchemaName RelationshipName
Global Option Set	<pre>GET /api/data/v9.0/GlobalOptionSetDefinitions(</pre> = 'metric_goalttype') Name LogicalName SchemaName AttributeName
