

# Latest Juniper JN0-460 Test Practice | JN0-460 Latest Test Experience

P.S. Free 2026 Juniper JN0-460 dumps are available on Google Drive shared by itPass4sure: [https://drive.google.com/open?id=1aXZeNo\\_1L7MT1CcbY2enKehRhZ78qdmd](https://drive.google.com/open?id=1aXZeNo_1L7MT1CcbY2enKehRhZ78qdmd)

Infinite striving to be the best is man's duty. We have the responsibility to realize our values in the society. Of course, you must have enough ability to assume the tasks. Then our JN0-460 learning quiz can give you some help. First of all, you can easily pass the JN0-460 Exam and win out from many candidates for our JN0-460 study materials are the most effective exam materials in the market. Secondly, you can also learn a lot of the specialized knowledge at the same time.

## Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.</li> </ul>

Topic 5	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Management or Operations:</b> This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.</li> </ul>

## Quiz Juniper - JN0-460 - Reliable Latest Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Test Practice

I just want to share with you that here is a valid JN0-460 exam cram file with 100% pass rate and amazing customer service. If you are not sure about your exam, choosing our JN0-460 exam cram file will be a good choice for candidates. We sell products by word of mouth. We are famous for our high pass-rate JN0-460 Exam Cram. If you try to use our study materials one time, you will know how easy to pass exam with our JN0-460 exam cram file. Our business policy is "products win by quality, service win by satisfaction".

### Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q14-Q19):

#### NEW QUESTION # 14

Which three administrator roles allow you to claim switches? (Choose three.)

- A. Super User
- B. Network Admin
- C. Helpdesk
- D. Observer
- E. Installer

**Answer: A,B,E**

Explanation:

In Juniper Mist Cloud, administrative roles define what actions a user can perform within an organization. The ability to claim and onboard switches is granted to roles that have configuration or deployment privileges.

"Only users with Super User, Network Admin, or Installer roles can claim, onboard, or delete devices such as access points, switches, or gateways within a Mist organization." Option A (Network Admin): Correct - can claim and manage network devices.

Option B (Installer): Correct - role specifically intended for device onboarding and site setup.

Option C (Super User): Correct - full administrative privileges including device claiming.

Option D (Observer): Incorrect - view-only access.

Option E (Helpdesk): Incorrect - limited to troubleshooting functions, not device management.

#### NEW QUESTION # 15

Which three switch testing tools are available when using Wired Assurance? (Choose three.)

- A. load factory-default
- B. bounce port
- C. iPerf
- D. ping
- E. cable test

**Answer: B,D,E**

Explanation:

According to Juniper Mist Wired Assurance documentation, three built-in diagnostic tools available for testing switch functionality are Bounce Port, Ping, and Cable Test.

Bounce Port allows you to disable and re-enable a port to reset connectivity.

Ping verifies Layer 3 reachability between the switch and target IPs.

Cable Test performs diagnostics to detect wiring faults, impedance mismatches, or cable lengths.

These tools are accessed directly from the Switch Testing Tools section in the Mist dashboard and are available for EX Series and QFX Series switches onboarded to the Mist cloud.

### NEW QUESTION # 16

You must move from a campus fabric core-distribution centrally-routed bridging (CRB) network to an edge-routed bridging (ERB) network.

In this scenario, where does the gateway for the network move?

- A. from distribution to access
- B. from core to distribution
- C. from distribution to core
- D. from access to distribution

**Answer: A**

Explanation:

In Juniper Mist campus fabric architectures, the location of the Layer 3 gateway (IRB interface) differentiates centrally-routed bridging (CRB) from edge-routed bridging (ERB):

In CRB, the gateway resides at the core layer - routing occurs centrally, and access/distribution layers perform Layer 2 bridging.

In ERB, the gateway moves to the edge (distribution layer), enabling routing to occur closer to endpoints, improving performance and scalability.

"In a centrally-routed bridging (CRB) topology, Layer 3 gateways reside at the core. When transitioning to an edge-routed bridging (ERB) design, the Layer 3 gateways are moved to the distribution layer, closer to the access switches and clients." Therefore, when moving from a core-distribution CRB to an ERB model, the gateway moves from the distribution to the access layer in campus terms (edge = access).

Option A: Incorrect - ERB gateways are not at the distribution layer only.

Option B: Incorrect - opposite direction.

Option C: Correct - the gateway moves from distribution to access (edge).

Option D: Incorrect - this describes CRB, not ERB.

### NEW QUESTION # 17

What are the available Wired Assurance subscriptions for Juniper Mist switches in terms of port numbers?

- A. 12-port and 24-port switches only
- B. 24-port switch only
- C. 12-port, 24-port, and 48-port switches
- D. 12-port switch only

**Answer: C**

Explanation:

Juniper Wired Assurance licensing is based on switch port count and supports a range of hardware platforms.

Subscriptions are available for 12-port, 24-port, and 48-port models across the EX Series portfolio.

"Wired Assurance subscriptions are available for all supported EX Series switches in 12-port, 24-port, and 48-port license options, aligning to switch hardware configurations." Option A: Incorrect - 24-port only does not cover all options.

Option B: Incorrect - 12- and 24-port licenses exist, but 48-port is also supported.

Option C: Correct - Mist supports 12-, 24-, and 48-port subscription tiers.

Option D: Incorrect - 12-port alone is incomplete.
