NEW QUESTION # 147

You have two Azure subscriptions named Sub1 and Sub2 that contain the virtual networks shown in the following table.

You need to ensure that VM1 and VM2 can communicate. The solution must minimize costs and administrative effort. What should you use?

- A. a user-defined route (UDR)
- B. an Azure VPN gateway
- C. network peering
- D. Azure Route Server
- E. a network virtual appliance (NVA)

Answer: C

NEW QUESTION # 148

You have an Azure web app named App1 that streams video content to users. App1 is located in the East US Azure region.

Users in North America stream the video content without any interruption.

Users in Asia and Europe report that the video buffer often and do not play back smoothly.

You need to recommend a solution to improve video streaming to the European and Asian users.

What should you recommend?

- A. Scale up the App Service plan.
- B. Configure an Azure Content Delivery Network (CDN) endpoint.
- C. Configure Azure File Sync.
- D. Scale out the App Service plan.

Answer: B

Explanation:

A content delivery network (CDN) is a distributed network of servers that can efficiently deliver web content to users. CDNs store cached content on edge servers in point-of-presence (POP) locations that are close to end users, to minimize latency.

Azure Content Delivery Network (CDN) offers developers a global solution for rapidly delivering high-bandwidth content to users by caching their content at strategically placed physical nodes across the world.

NEW QUESTION # 149

You have an Azure subscription named Subscription1 that contains the following resource group:

Name: RG1

Region: West US

Tag: "tag1": "value1"

You assign an Azure policy named Policy1 to Subscription1 by using the following configurations:

Exclusions: None

Policy definition: Append tag and its default value

Assignment name: Policy1

Parameters:

- Tag name: Tag2

- Tag value: Value2

After Policy1 is assigned, you create a storage account that has the following configurations:

Name: storage1

Location: West US

Resource group: RG1

Tags: "tag3": "value3"

You need to identify which tags are assigned to each resource.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/resource-group-using-tags>

NEW QUESTION # 150

You need to configure the Device settings to meet the technical requirements and the user requirements.

Which two settings should you modify? To answer, select the appropriate settings in the answer area.

Answer:

Explanation:

Explanation

Box 1: Selected

Only selected users should be able to join devices

Box 2: Yes

Require Multi-Factor Auth to join devices.

From scenario:

* Ensure that only users who are part of a group named Pilot can join devices to Azure AD

* Ensure that when users join devices to Azure Active Directory (Azure AD), the users use a mobile phone to verify their identity.

NEW QUESTION # 151

.....

Moreover, you do not need an active internet connection to utilize Free4Torrent desktop Microsoft AZ-104 practice exam software. It works without the internet after software installation on Windows computers. The Free4Torrent web-based Microsoft AZ-104 Practice Test requires an active internet and it is compatible with all operating systems.
