## Pass Guaranteed 2026 Microsoft PL-600: Authoritative Microsoft Power Platform Solution Architect Exam Fees

If passing the PL-600 certification exam in a short time is a goal of yours, we're here to help you get there on your first attempt by providing you with PL-600 real exam dumps you need to succeed. We have three formats of PL-600 updated questions. This is done so that every Microsoft PL-600 exam applicant may find useful PL-600 study material here, regardless of how they want to learn.

Microsoft PL-600 Exam is designed for individuals who want to become a Microsoft Power Platform Solution Architect. Microsoft Power Platform Solution Architect certification validates your ability to design, create, and implement solutions using Microsoft Power Platform technologies.

### Microsoft Power Platform Solution Architect Sample Questions (Q76-Q81):

#### NEW QUESTION # 76

Case Study 3 - Fabrikam, inc.

Background

Fabrikam, Inc. manufactures industrial metal cutting machines. The company installs and services the machines for customers. Fabrikam has manufacturing plants in Canada, France, and China. The company also has regional service organizations that are responsible for installation and maintenance of the machines.

## Current environment

### Overview

Operations for the company are managed very informally. Only a small number of long-term employees are aware of all manufacturing processes. The company has been experiencing quality issues associated with its manufacturing operations and installations.

The company wants to implement a way to capture quality inspection results for each machine produced. Current inspection checklists are stored in the Files section of a Teams channel for inspectors. Inspectors commonly print the incorrect inspection checklist.

The company has specific inspection stations for certain inspection steps. Each station has the gauges and equipment required for related inspection steps. There is often a backlog at specific inspection stations. This results in delays in shipping machines to customers.

### Accounting system

The current system does not handle shop floor or manufacturing planning functionality.

Machines are assigned serial numbers and placed in stock until they are shipped to customers.

Employee information is maintained only within the accounting system. Access to the information is strictly controlled due to privacy regulations and company policies.

### Other systems

The company has an enterprise Microsoft 365 subscription. The company uses Microsoft 365 only for sending and receiving email.

The company uses photos of employees to generate employee badges. Photos are uploaded into Microsoft 365 user profiles.

The company recently started using Dynamics 365 Field Service to manage and maintain the machines that it installs for its customers. The app has not been customized.

The company has added roles, skills, and certification proficiencies to Dynamics 365 Field Service resources to support both customer onsite inspections and final manufacturing inspections.

### Requirements

#### Quality inspection app

Fabrikam is evaluating Microsoft Power Platform to determine whether it can meet the company's requirements for a manufacturing defect and quality inspection solution. Each machine produced must be subjected to a quality inspection at various points during production. Each machine must undergo a more extensive quality inspection before the machine can be shipped to the customer.

#### Inspection orders

Inspection orders must:

- Allow entry of quality ratings of passed or failed for each quality metric identified for the machine being rated.
- Include information about the person who performed each inspection step and any comments made by the inspector.
- Be automatically marked as failed if one inspection step rating is marked as failed.
- Be automatically marked for re-inspection should a machine fail inspection. The new inspection order must be created by using the originating inspection order as a template.

Inspectors must fill in findings comments and upload at least one photo for any inspection step that is marked as failed.

#### Inspection standardization

Standardized checklists must be stored in the solution for use by inspectors. A copy must be created when a new inspection is initiated. The solution must:

Prevent an inspector from proceeding to the next step of the checklist until required information for a step is entered.

Support the addition of steps to inspections to support custom features added to a machine for a customer.

Support the direct input of measurements from testing gauges to avoid incorrect readings being entered by inspectors.

Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

Support the ability to store photo references within each inspection step to document defects found during inspections.

#### Security

Users must be active employees of Fabrikam

When a user signs into the inspection solution, the solution must display a picture of the employee who has signed in.

Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

You must prevent users from changing inspection order data once an inspection is marked as final.

#### Analytics and reporting

The solution must:

Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.

Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).

Provide a printed quality certificate to be included with each machine.

#### Issues

During initial testing of the solution, testers report that they cannot see the photos taken during a previously failed inspection.

You need to recommend a method for transferring machine information to Dynamics 365 Field Service. What should you recommend?

- A. Dual-write
- **B. Microsoft Dataverse connector**
- C. Dual-write

**Answer: B**

Explanation:

Scenario: Information about each machine produced must be transferred to Dynamics 365 Field Service.

Use the Microsoft Dataverse connector when connecting to the Microsoft Dataverse used for Microsoft Dynamics 365 Sales, Microsoft Dynamics 365 Customer Service, Microsoft Dynamics 365 Field Service, Microsoft Dynamics 365 Marketing, and Microsoft Dynamics 365 Project Service Automation.

Explanation

Answer Area

Requirement

Coordinate long-term end-to-end delivery of financial counseling services to farmers.

Manage project accounting and recognize revenue compliant with international financial reporting standards.

Notify users of their overdue tasks on a daily basis.

Model-driven app

Dynamics 365 Finance

Power Automate

NEW QUESTION # 78

A company is creating a Power Platform solution to manage employees.

The company has the following requirements:

Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

Allow only approved device types to access the solution and company data.

You need to recommend a solution that meets the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Configuration

Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

- Team access
- Privacy preference
- Field security profile
- Hierarchy security profile

Allow only approved device types to access the solution and company data.

- Endpoint security
- Compliance policy
- Conditional access
- Mobile threat integration

Answer:

Explanation:

The screenshot shows the 'Requirement' and 'Configuration' sections. The requirement 'Allow only the human resource manager to change an employee's employment status when an employee is dismissed.' is linked to 'Field security profile' in the configuration list. The requirement 'Allow only approved device types to access the solution and company data.' is linked to 'Compliance policy' in the configuration list.

NEW QUESTION # 79

You need to recommend tools for agents and management.

Which tools should you recommend? To answer, select the appropriate option in the answer area.  
 NOTE: Each correct selection is worth one point.

User type	Tool
Agent	<div style="border: 1px solid gray; padding: 5px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> <span></span> <span>▼</span> </div> <ul style="list-style-type: none"> <li>Power BI</li> <li>Dashboard</li> <li>Microsoft Power Automate</li> <li>Microsoft Power Apps</li> </ul> </div>
Management	<div style="border: 1px solid gray; padding: 5px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> <span></span> <span>▼</span> </div> <ul style="list-style-type: none"> <li>Power BI</li> <li>Microsoft Power Apps</li> <li>Microsoft AppSource</li> <li>Microsoft Power Automate</li> </ul> </div>

**Answer:**

Explanation:

**User type**

**Tool**

Agent

▼

- Power BI
- Dashboard
- Microsoft Power Automate
- Microsoft Power Apps

Management

▼

- Power BI
- Microsoft Power Apps
- Microsoft AppSource
- Microsoft Power Automate

Explanation

Box 1: Dashboard

Agents need dashboards to show a current count of all reservations on the entity.

Box 2: Power BI

Management requires paginated reports for stakeholders.

**NEW QUESTION # 80**

You need to recommend a solution for integrating luggage information.

What should you recommend? To answer, drag the appropriate types to the correct tables. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
