Experience-Cloud-Consultant Exam is designed for individuals who have experience in implementing and managing Salesforce Experience Cloud solutions.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q60-Q65):

NEW QUESTION # 60

Recently, Ursa Major Solar (UMS) decided it no longer wants to utilize Data Categories to control article visibility for its customer portal. UMS's users will need to be logged in to the portal in order to view any Knowledge articles. Outside of Data Categories, what is another way UMS can control Knowledge article visibility?

- A. Audience Targeting
- B. Sharing Rules
- C. Permission Sets

- D. Branding Sets

Answer: C

NEW QUESTION # 61

Northern Trail Outfitters (NTO) offers a new product that is different in North America, EMEA, and AsiaPacific regions. Pages have been created and published for this product. The site manager has applied criteria to ensure that visibility for these product pages are applied as per the requirements for each region.

NTO further wants to control the users who see a specific page of this product by setting its visibility.

Which three visibility options are available in Experience Cloud? Choose 3 answers

- A. None
- B. Audience
- C. Visible
- D. Personal
- E. Default

Answer: A,B,E

Explanation:

Three visibility options available in Experience Cloud are None, Default, and Audience. Visibility options allow you to control who can see a page or a component on your Experience Cloud site. None is an option that allows you to hide a page or a component from all users. Default is an option that allows you to display a page or a component to all users who have access to the site.

Audience is an option that allows you to display a page or a component only to users who belong to a specific audience. An audience is a group of users who share common attributes, such as profile, location, or language.

NEW QUESTION # 62

Ursa Major Solar (UMS) has a discussion thread on its Experience Cloud site for customers to provide feedback on the company's latest product release. To help ensure new members understand what the discussion thread is meant for and to monitor their first posts, UMS would like to approve the first post of any new member who has joined within 7 days or less.

What is needed to configure this?

- A. Create a moderation rule with the appropriate member criteria.
- B. Create a moderation rule with the appropriate content criteria.
- C. Create a Community moderator with Approval permissions.
- D. Create a Community moderator with Delete permissions.

Answer: A

Explanation:

This option allows UMS to approve the first post of any new member who has joined within 7 days or less. UMS can create a moderation rule that applies to posts and comments, and specify the member criteria as "Joined Date is within last 7 days". UMS can also choose the action as "Require Approval" and assign a moderator group to review and approve the posts.

NEW QUESTION # 63

Ursa Major Solar (UMS) is evaluating Salesforce Partner Relationship Management (PRM) to help improve its current channel sales performance.

In which two ways can Salesforce PRM help UMS accelerate channel sales?

Choose 2 answers

- A. Automate partner entitlement assignment in Channel Sales teams
- B. Extend automated quoting capabilities to partners
- C. Enable partner lead routing
- D. Use partner tiering in channel sales hierarchy

Answer: B,C

Explanation:

Partner lead routing allows UMS to assign leads to partners based on predefined criteria, such as location, product, or industry. This helps UMS distribute leads more efficiently and increase partner engagement. Automated quoting capabilities allow partners to generate quotes for customers using UMS's pricing and discount rules. This helps partners close deals faster and more accurately.

NEW QUESTION # 64

No More Homelessness (NMH) is about to create a public site for volunteers where they will be able to sign up for volunteering opportunities at local events. Each registration will result in a record being created for a custom Event Registration object.

Which three considerations should NMH keep in mind for records created by guest users?

Choose 3 answers

- A. When possible, one should create and assign queues as owners of records created by guest users.
- B. Setting the default owner for records created by guests is an option in Experience Cloud sites.
- C. Queues cannot be assigned as owners of records created by guest users.
- D. Any active user in an org can be assigned as the default owner of records created by guest users.
- E. Default owner does not need Read/Write access to view the records created by guest users.

Answer: B,C,D

Explanation:

For records created by guest users, NMH should keep in mind that queues cannot be assigned as owners, setting the default owner is an option in Experience Cloud sites, and any active user in an org can be assigned as the default owner. A queue is a location where records can be routed to await processing by a group of users. However, queues cannot be assigned as owners of records created by guest users because guest users do not have access to queues. Setting the default owner for records created by guests is an option in Experience Cloud sites that allows NMH to specify who will own the records created by guest users on their public site. Any active user in an org can be assigned as the default owner of records created by guest users, as long as they have the appropriate permissions and access to the object.

NEW QUESTION # 65

.....
