### **NEW QUESTION # 37**

When modeling underground pipelines, which type of structural feature would represent the casing that contains those pipes?

- A. Structure junction
- B. Structure boundary
- C. Structure line

**Answer: C**

Explanation:

Structure lines are used to contain domain network line features, such as pipe casings.

**NEW QUESTION # 38**

In ArcGIS Utility Network, which association type should be used to represent electrical devices (such as fuses or switches) inside a junction box within a substation?

- A. Connectivity association
- B. Structural attachment association
- C. **Containment association**

**Answer: C**

Explanation:

Containment associations represent devices housed within a container feature, such as a junction box.

**NEW QUESTION # 39**

Before batch calculation or validation rules can be evaluated in a utility network, which two steps must be completed?

- A. Create asset packages and update tiers
- B. **Add error datasets to the map and publish/overwrite the utility network service with Validation enabled**
- C. Enable topology and assign containment rules

**Answer: B**

Explanation:

Validation requires error datasets to be added and the utility network service to be published with Validation capability enabled.
