There is no doubt that in the future information society, knowledge and skills will be a major driver for economic growth and one of the major contributors to the sustainable development of the information industry. And getting the related Certified Wireless Security Professional (CWSP) certification in your field will be the most powerful way for you to show your professional knowledge and skills. However, it is not easy for the majority of candidates to prepare for the exam in order to pass it, if you are one of the candidates who are worrying about the exam now, congratulations, there is a panacea for you--our CWSP-208 Study Tool.

Our Certified Wireless Security Professional (CWSP) (CWSP-208) exam dumps comes in three formats: CWNP CWSP-208 PDF dumps file, desktop-based practice test software, and a web-based practice exam. These versions are specially designed to make Certified Wireless Security Professional (CWSP) (CWSP-208) preparation for users easier. CWSP-208 Questions in these formats of PracticeMaterial's material are enough grasp every test topic in the shortest time possible.

## PracticeMaterial CWNP CWSP-208 Dumps PDF Format

In the PDF version, real CWSP-208 exam questions are available. These CWNP CWSP-208 real questions are printable and portable. You can take this PDF document anywhere and study for the Certified Wireless Security Professional (CWSP) (CWSP-208) exam without time restrictions. PracticeMaterial regularly make changes in the CWSP-208 PDF format when required.

CWSP-208 questions in this format are relevant to the actual test.

## CWNP CWSP-208 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Vulnerabilities, Threats, and Attacks: This section of the exam evaluates a Network Infrastructure Engineer in identifying and mitigating vulnerabilities and threats within WLAN systems. Candidates are expected to use reliable information sources like CVE databases to assess risks, apply remediations, and implement quarantine protocols. The domain also focuses on detecting and responding to attacks such as eavesdropping and phishing. It includes penetration testing, log analysis, and using monitoring tools like SIEM systems or WIPS</li><li>• WIDS. Additionally, it covers risk analysis procedures, including asset management, risk ratings, and loss calculations to support the development of informed risk management plans.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Security Policy: This section of the exam measures the skills of a Wireless Security Analyst and covers how WLAN security requirements are defined and aligned with organizational needs. It emphasizes evaluating regulatory and technical policies, involving stakeholders, and reviewing infrastructure and client devices. It also assesses how well high-level security policies are written, approved, and maintained throughout their lifecycle, including training initiatives to ensure ongoing stakeholder awareness and compliance.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• WLAN Security Design and Architecture: This part of the exam focuses on the abilities of a Wireless Security Analyst in selecting and deploying appropriate WLAN security solutions in line with established policies. It includes implementing authentication mechanisms like WPA2, WPA3, 802.1X</li><li>• EAP, and guest access strategies, as well as choosing the right encryption methods, such as AES or VPNs. The section further assesses knowledge of wireless monitoring systems, understanding of AKM processes, and the ability to set up wired security systems like VLANs, firewalls, and ACLs to support wireless infrastructures. Candidates are also tested on their ability to manage secure client onboarding, configure NAC, and implement roaming technologies such as 802.11r. The domain finishes by evaluating practices for protecting public networks, avoiding common configuration errors, and mitigating risks tied to weak security protocols.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Security Lifecycle Management: This section of the exam assesses the performance of a Network Infrastructure Engineer in overseeing the full security lifecycle—from identifying new technologies to ongoing monitoring and auditing. It examines the ability to assess risks associated with new WLAN implementations, apply suitable protections, and perform compliance checks using tools like SIEM. Candidates must also demonstrate effective change management, maintenance strategies, and the use of audit tools to detect vulnerabilities and generate insightful security reports. The evaluation includes tasks such as conducting user interviews, reviewing access controls, performing scans, and reporting findings in alignment with organizational objectives.</li></ul>

## CWNP Certified Wireless Security Professional (CWSP) Sample Questions (Q43-Q48):

### NEW QUESTION # 43

Given: ABC Company has 20 employees and only needs one access point to cover their entire facility. Ten of ABC Company's employees have laptops with radio cards capable of only WPA security. The other ten employees have laptops with radio cards capable of WPA2 security. The network administrator wishes to secure all wireless communications (broadcast and unicast) for each laptop with its strongest supported security mechanism, but does not wish to implement a RADIUS/AAA server due to complexity.

What security implementation will allow the network administrator to achieve this goal?

- A. Implement an SSID with WPA-Personal that allows both AES-CCMP and TKIP clients to connect.
- B. Implement an SSID with WPA2-Personal that sends all broadcast traffic using AES-CCMP and unicast traffic using either TKIP or AES-CCMP.
- C. Implement an SSID with WPA2-Personal that allows both AES-CCMP and TKIP clients to connect.
- **D. Implement two separate SSIDs on the AP—one for WPA-Personal using TKIP and one for WPA2- Personal using AES-CCMP.**

**Answer: D**

**NEW QUESTION # 44**

You are configuring seven APs to prevent common security attacks. The APs are to be installed in a small business and to reduce costs, the company decided to install all consumer-grade wireless routers. The wireless routers will connect to a switch, which connects directly to the Internet connection providing 50 Mbps of Internet bandwidth that will be shared among 53 wireless clients and 17 wired clients.

To ensure the wireless network is as secure as possible from common attacks, what security measure can you implement given only the hardware referenced?

- A. 802.1X/EAP-PEAP
- B. WPA2-Enterprise
- C. WPA2-Personal
- D. WPA-Enterprise

**Answer: C**

Explanation:

Given that only consumer-grade routers are used and no RADIUS server or enterprise infrastructure is mentioned, WPA2-Personal is the most secure option available. It uses a pre-shared key (PSK) for authentication and AES-CCMP for encryption, offering strong protection for small businesses lacking enterprise equipment.

Enterprise methods such as WPA2-Enterprise, 802.1X, and EAP-PEAP require a RADIUS server or authentication backend, which isn't supported in typical consumer-grade routers.

**NEW QUESTION # 45**

The IEEE 802.11 Pairwise Transient Key (PTK) is derived from what cryptographic element?

- A. Group Temporal Key (GTK)
- B. PeerKey (PK)
- C. Key Confirmation Key (KCK)
- D. Phase Shift Key (PSK)
- E. Pairwise Master Key (PMK)
- F. Group Master Key (GMK)

**Answer: E**

Explanation:

The PTK (Pairwise Transient Key) is derived during the 4-Way Handshake using:  
PMK (from PSK or EAP authentication)

ANonce and SNonce (nonces from authenticator and supplicant)

MAC addresses of client and AP

The PTK is then split into keys used for encryption and integrity protection.

Incorrect:

A). PSK can derive the PMK, but not the PTK directly.

B). GMK is used to derive the GTK, not PTK.

D). GTK is for group traffic encryption.

E & F. PK and KCK are components of PTK or alternate key usage-not used to derive PTK.

CWSP-208 Study Guide, Chapter 3 (PTK Derivation and Usage)

IEEE 802.11i-2004 Key Hierarchy

**NEW QUESTION # 46**

What attack cannot be detected by a Wireless Intrusion Prevention System (WIPS)?

- A. Deauthentication flood
- B. MAC Spoofing
- C. EAP flood
- **D. Eavesdropping**
- E. Hot-spotter
- F. Soft AP

**Answer: D**

Explanation:

WIPS (Wireless Intrusion Prevention Systems) monitor the RF environment and detect unauthorized activities. However, eavesdropping involves passive listening to wireless communications without transmitting any signals. Because the attacker is not transmitting or generating any detectable activity, a WIPS has no RF signal to detect and is thus unable to identify or prevent this attack.

CWNP CWSP-208 Official Exam Objectives: "WLAN Threats", "WIPS Capabilities and Limitations"

#### **NEW QUESTION # 47**

Given: XYZ Company has recently installed an 802.11ac WLAN. The company needs the ability to control access to network services, such as file shares, intranet web servers, and Internet access based on an employee's job responsibilities.

What WLAN security solution meets this requirement?

- A. An autonomous AP system with MAC filters
- **B. A WLAN controller with RBAC features**
- C. WPA2-Personal with support for LDAP queries
- D. A WLAN router with wireless VLAN support
- E. A VPN server with multiple DHCP scopes

**Answer: B**

Explanation:

Role-Based Access Control (RBAC) enables dynamic assignment of permissions and access rights based on a user's job function.

A WLAN controller with RBAC:

Can apply policies post-authentication.

Controls access to internal services (e.g., file shares, apps).

Assigns users to different VLANs or applies firewall rules based on roles.

Incorrect:

A). MAC filtering is not scalable or secure.

B). WPA2-Personal does not support user-based policies or LDAP integration.

C). DHCP scope assignment is not linked to user roles.

E). VLAN assignment via SSID is static and does not consider job function.

#### **NEW QUESTION # 48**

.....

In order to better meet users' need, our Certified Wireless Security Professional (CWSP) study questions have set up a complete set of service system, so that users can enjoy our professional one-stop service. We not only in the pre-sale for users provide free demo, when buy the user can choose in we provide in the three versions, at the same time, our CWSP-208 training materials also provides 24-hour after-sales service, even if you are failing the exam, don't pass the exam, the user may also demand a full refund with purchase vouchers, make the best use of the test data, not for the user to increase the economic burden. Such a perfect one-stop service of our CWSP-208 Test Guide, believe you will not regret your choice, and can better use your time, full study, efficient pass the exam.
