Microsoft eCDN

Microsoft eCDN solves the network congestion problem that occurs during large corporate virtual events such as all-hands meetings.

Microsoft eCDN forms a mesh network over the LAN, which reduces the load by up to 98%. With WebRTC as its foundation, Microsoft eCDN eliminates the need for any software or hardware installations. Microsoft eCDN is included with a Teams Premium license, but you can also purchase this solution for organizers who don't have a Teams Premium license.

* Microsoft eCDN works out of the box without any configuration. The network configuration for Microsoft eCDN ensures that remote workers and/or heavy video traffic doesn't strain your network nor oblige you to invest in costly infrastructure.
