We sincerely suggest you to spare some time to have a glance over the following items on our web for our Plat-Con-201 exam questions.

Salesforce Certified Omnistudio Consultant Sample Questions (Q106-Q111):

NEW QUESTION # 106

A health provider company is building a new application for its medical officers. The company wants to display medical test reports for patients. Medical test reports is a custom object, related to the Patients object.

For each patient, the company needs to list each medical test report including the report name, date requested, and date generated. From each medical test report, the user should be able to take the following actions:

- * Approve
- * Print for Review
- * Send for Retest

Which OmniStudio tools should the consultant use to design a solution to meet these requirements?

- A. OmniScript with multiple Step elements
- **B. Single FlexCard with multiple actions**
- C. Multiple FlexCards with single action
- D. Salesforce list view with custom buttons/links

Answer: B

Explanation:

The OmniStudio tools that the consultant should use to design a solution to meet these requirements are:

Single FlexCard with multiple actions. A FlexCard is a tool that can display data and actions in a card format.

The consultant can use a single FlexCard to display the medical test reports for each patient, including the report name, date requested, and date generated. A FlexCard can also have multiple actions, such as buttons or links, that can invoke OmniScripts or Integration Procedures. The consultant can use multiple actions to enable the user to approve, print for review, or send for retest each medical test report

NEW QUESTION # 107

How many levels deep can reusable OmniScripts be nested?

- **A. 0**
- B. Unlimited
- C. 1
- D. 2

Answer: A

Explanation:

Reusable OmniScripts are OmniScripts that can be embedded within other OmniScripts to create modular and reusable components. They can be nested up to unlimited levels deep, as long as there are no circular references or conflicts between the parent and child OmniScripts.

The other options are not correct because:

* 2: This is too low and does not reflect the full potential of reusable OmniScripts.

* 5: This is also too low and does not reflect the full potential of reusable OmniScripts.

* 1: This is incorrect and does not make sense, as reusable OmniScripts are meant to be nested within other OmniScripts.

NEW QUESTION # 108

A business needs to create a FlexCard to display open cases for an account. The cases should display differently depending on their priority.

* Low or Medium priority cases should display case data and an Update Account Info action.

* High priority cases should include a red border, an alert notification, and an Escalate action.

What is the most efficient way to meet these requirements?

- A. Create two FlexCards, one for Low / Medium priority cases and another for High priority cases.
- **B. Create a FlexCard with two card states. Use conditions on the state to filter for priority.**
- C. Create a FlexCard with one card state. Use conditions on the fields and actions to filter for priority.
- D. Create two FlexCards with one card state each. Use conditions on the states to filter for priority.

Answer: B

Explanation:

The most efficient way to meet the requirements is to create a FlexCard with two card states. A card state defines how a FlexCard displays data and actions based on certain conditions. The consultant can use conditions on the state to filter for priority, and then customize the fields and actions for each state. This way, the FlexCard can display different information and options for low/medium and high priority cases

NEW QUESTION # 109

A business has a requirement to display an account and all of the associated contacts on a page. The number of contacts will vary for each account. For each contact, the page should display first name, last name, email, at phone number with options to edit the contact information or send a message. The primary contact for an a should be highlighted with a blue border.

Which two FlexCards features should the consultant recommend to meet these requirements?

Choose 2 answers

- **A. Repeat Block**
- B. Flyouts
- **C. Data table**
- D. States

Answer: A,C

Explanation:

The two FlexCard features that the consultant should recommend to meet these requirements are Datatable and Repeat Block. A Datatable element can display a list of records in a tabular format, with columns for each field and rows for each record. The consultant can use a Datatable element to display the contacts for an account, with options to edit or send a message. A Repeat Block element is a container that can display multiple instances of a FlexCard based on a data source. The consultant can use a Repeat Block element to display a FlexCard for each contact, and use a condition to apply a blue border for the primary contact

NEW QUESTION # 110

A consultant needs to design an OmniScript to capture the following information:

- * Select one payment method from a list of options
- * Enter the address information with autocomplete
- * Enter a phone number

Which OmniScript elements should be used to capture this information?

- A. Checkbox, Geolocation, and Number
- **B. Radio, TypeAhead, and Telephone**
- C. Multi-Select. Address, and Telephone
- D. Select, TypeAhead, and Number

Answer: B

Explanation:

The correct OmniScript elements to capture the information are Select, TypeAhead, and Number. Select allows the user to choose one option from a list of values, TypeAhead provides autocomplete suggestions for address fields, and Number validates that the input is a numeric value. Radio, Multi-Select, and Checkbox are not suitable for single selection scenarios. Geolocation is not an OmniScript element, and Telephone is not a valid data type for phone numbers.
