So, start your journey by today, get the PassExamDumps Microsoft Cybersecurity Architect (SC-100) study material, and study well. No one can keep you from rising as a star in the sky.

Microsoft Cybersecurity Architect Sample Questions (Q171-Q176):

NEW QUESTION # 171
You have a Microsoft 365 subscription that is protected by using Microsoft 365 Defender You are designing a security operations strategy that will use Microsoft Sentinel to monitor events from Microsoft 365 and Microsoft 365 Defender You need to recommend a solution to meet the following requirements:
* Integrate Microsoft Sentinel with a third-party security vendor to access information about known malware
* Automatically generate incidents when the IP address of a command-and control server is detected in the events What should you configure in Microsoft Sentinel to meet each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 172
You have an Azure subscription that has Microsoft Defender for Cloud enabled.
You are evaluating the Azure Security Benchmark V3 report as shown in the following exhibit.

You need to verify whether Microsoft Defender for servers is installed on all the virtual machines that run Windows. Which compliance control should you evaluate?

- A. Endpoint Security
- B. Data Protection
- C. Incident Response
- D. Asset Management
- E. Posture and Vulnerability Management

Answer: C

Explanation:
https://docs.microsoft.com/en-us/security/benchmark/azure/security-controls-v3-endpoint-security

NEW QUESTION # 173
Hotspot Question
You have an Azure subscription that contains an Azure Kubernetes Service (AKS) cluster named AKS1. AKS1 hosts a Windows node pool named Pool1 and a Linux node pool named Pool2.
You are designing a pool update strategy for AKS1.
You need to recommend how often to replace the operating system images deployed to the nodes. The solution must meet the following requirements:
- Minimize how long it takes to apply operating system updates once the updates are released.
- Minimize administrative effort.
What should you recommend for each pool? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
Box 1: Monthly
Windows supports monthly node image version upgrades.
Box 2: Weekly
Linux supports weekly node image version upgrades.
Note: Azure Kubernetes Service patch and upgrade guidance
This section of the Azure Kubernetes Service (AKS) day-2 operations guide describes patching and upgrading strategies for AKS worker nodes and Kubernetes versions. As a cluster operator, you need to have a plan for keeping your clusters up to date and monitoring Kubernetes API changes and deprecations over time.
