Our three versions of HPE7-A08 exam braindumps are the PDF, Software and APP online and they are all in good quality. All popular official tests have been included in our HPE7-A08 study materials. So you can have wide choices. In fact, all of the three versions of the HPE7-A08 practice prep are outstanding. You will enjoy different learning interests under the guidance of the three versions of HPE7-A08 training guide.

HP HPE7-A08 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Install and Configure the Wired Network Solution: This domain evaluates the abilities of Network Engineers to provision and configure HPE Aruba Networking switches both via Aruba Networking Central and command-line interface. It covers physical switch setup, Layer 2 and Layer 3 configuration and validation, multicast features, security implementations, quality of service (QoS) settings, and integration of Aruba Networking solutions into existing environments.

Topic 2	<ul style="list-style-type: none"> • Troubleshoot the Wired Network Solution: Candidates in this section, typically Network Support Specialists, are tested on identifying common wired network failures such as IP or VLAN mismatches, hardware issues, or port misconfigurations. It also involves analyzing performance problems caused by QoS or configuration errors and formulating effective remediation plans to restore correct network operations.
Topic 3	<ul style="list-style-type: none"> • Create the Implementation Plan for the Wired Network Solution: This section measures the skills of Network Designers who focus on understanding the HPE switching portfolio and selecting the right products to match various customer requirements. Candidates must also demonstrate the ability to create detailed and effective implementation plans based on given designs or customer scenarios to ensure successful wired network deployments.
Topic 4	<ul style="list-style-type: none"> • Manage, Maintain, Optimize, and Monitor the Wired Network Solution: This part measures the skills of Network Operations Engineers in managing and maintaining wired network infrastructures. It includes developing configuration management strategies, interpreting network operational data to make informed decisions, and programmatically auditing or configuring Aruba Networking switches to optimize performance and reliability.

The HPE7-A08 certificate is hard to get. If you really crave for it, our HPE7-A08 guide practice is your best choice. We know it is hard for you to make decisions. You will feel sorry if you give up trying. Also, the good chance will slip away if you keep standing still. Our price is reasonable and inexpensive. You totally can afford for our HPE7-A08 Preparation engine. And we give some discounts from time to time, so you can buy at a more favorable price.

HPE Aruba Networking Switching Professional Exam Sample Questions (Q80-Q85):

NEW QUESTION # 80

Which CLI command verifies active OSPF neighbors?

- A. show ip route ospf
- B. show ospf adjacencies
- C. show ospf neighbors
- D. show ip ospf

Answer: C

Explanation:

The show ospf neighbors command lists OSPF peer relationships, showing adjacency states and router IDs, ensuring dynamic routing is functioning properly.

NEW QUESTION # 81

Which methods can be used to configure Aruba switches directly via CLI?

(Select two.)

Response:

- A. Telnet
- B. Console connection
- C. SSH
- D. Aruba Central

Answer: B,C

NEW QUESTION # 82

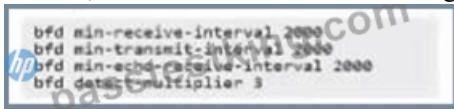

How does an HPE Aruba Networking CX VSX solution make the hardware replacement of a single switch a non-disruptive operation for Layer 2 configurations?

- A. By allowing the system MAC in the ServiceOS to be changed to the original system MAC.
- B. By the utilization of any of the four reserved ranges as system-MAC addresses.
- C. By the VSX-sync option for synchronization of the system-MAC.
- D. By entering the primary switch system-MAC on the secondary switch.

Answer: A

NEW QUESTION # 83

OSPF peering is configured between HPE Aruba Networking CX 6300 switches utilizing BFD. You've made this configuration on switch B, while switch A is in the default configuration:

```
bfd min-receive-interval 2000
bfd min-transmit-interval 2000
bfd min-echo-receive-interval 2000
bfd detect-multiplier 3
```

Which BFD Tx/Rx interval values will switch A use for the show bfd session?

- A. Switch A show BFD sessions using 6000ms
- B. Switch A show BFD sessions using 300ms
- C. Switch A show BFD sessions using 500ms
- D. Switch A show BFD sessions using 2000ms

Answer: D

Explanation:

This question involves OSPF peering configured between CX 6300 switches using BFD (Bidirectional Forwarding Detection). BFD parameters include transmit (Tx) and receive (Rx) intervals.

Switch B has custom BFD interval values configured, but switch A is at default configuration.

According to Aruba CX default BFD parameters, the Tx and Rx intervals default to 2000ms (2 seconds). This is why switch A's show BFD session displays intervals of 2000ms even if switch B uses different values.

BFD interval negotiation results in the highest Tx/Rx interval being used, or default in case one side is unconfigured.

NEW QUESTION # 84

Which CLI command verifies if a trunk port is forwarding traffic correctly on an Aruba CX switch?

- A. display trunk forwarding
- B. show trunk interface
- C. show vlan trunk
- D. show interface trunk

Answer: D

Explanation:

The show interface trunk command displays VLANs allowed on the trunk, ensuring the correct VLANs are forwarded between switches and preventing communication failures.

NEW QUESTION # 85
